Subject index for Volume 81
(January through December, 2003)

A

α-Amylase
Influence of substrate and/or neurohormonal mimic on in vitro pancreatic enzyme release from calves postruminally infused with partially hydrolyzed starch and/or casein, 1323
Pancreatic exocrine secretion in steers infused postruminally with casein and cornstarch, 1051
α-Linolenic Acid
Effects of flax supplementation and a combined trenbolone acetate and estradiol implant on circulating insulin-like growth factor-I and muscle insulin-like growth factor-I messenger RNA levels in beef cattle, 3028
Absorption
Effects of volatile fatty acid supply on their absorption and on water kinetics in the rumen of sheep sustained by intragastric infusions, 2609
Hormonal regulation of calcium homeostasis in two breeds of dogs during growth at different rates, 1568
Ionophores have limited effects on jejunal glucose absorption and energy metabolism in mice, 2072
Accuracy
Accuracy of predicting weight and percentage of beef carcass retail product using ultrasound and live animal measures, 466
The relationship between ultrasound measurements and carcass fat thickness and longissimus muscle area in beef cattle, 676
Acid-Base Balance
Influence of oscillating dietary crude protein concentration on performance, acid-base balance, and nitrogen excretion of steers, 2660
Acid-Base Equilibrium
Effect of the live weight gain of steers during winter grazing on digestibility, acid-base balance, blood flow, and oxygen consumption by splanchnic tissues during adaptation and subsequent feeding of a high-grain diet, 3130
Effects of dietary electrolyte balance on the chemistry of blood and urine in lactating sows and sow litter performance, 3067
Quantitative analysis of acid-base balance in *Bos indicus* steers subjected to transportation of long duration, 1434
Acidosis
Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
Effects of bacterial direct-fed microbials and yeast on site and extent of digestion, blood chemistry, and subclinical ruminal acidosis in feedlot cattle, 1628
Interaction between bunk management and monensin concentration on finishing performance, feeding behavior, and ruminal metabolism during an acidosis challenge with feedlot cattle, 2869
The role of acidogenic diets and β-hydroxybutyate on lymphocyte proliferation and serum antibody response against bovine respiratory viruses in Holstein steers, 3088
Acute-Phase Proteins
Effect of transportation and commingling on the acute-phase protein response, growth, and feed intake of newly weaned beef calves, 1120
Acyl-CoA Desaturase
Effect of a high-linolenic acid diet on lipogenic enzyme activities, fatty acid composition, and meat quality in the growing pig, 1967
Acyl-CoA Oxidase
Dietary fat has minimal effects on fatty acid metabolism transcript concentrations in pigs, 423
Adhesion
Diet and procedures used to detach particle-associated microbes from ruminal digesta influence chemical composition of microbes and estimation of microbial growth in Rusitec fermenters, 537
Adipocytes
Dietary fat has minimal effects on fatty acid metabolism transcript concentrations in pigs, 423
Lipogenic enzyme activities in different adipose depots of Pirenaican and Holstein bulls and heifers taking into account adipocyte size, 432
Porcine leptin inhibits lipogenesis in porcine adipocytes, 3008
Adipose Tissue
Carcass, sensory, and adipose tissue traits of Brangus steers fed casein-formaldehyde-protected starch and/or canola lipid, 2457
Estimation of genetic parameters for ultrasound-predicted percentage of intramuscular fat in Angus cattle using random regression models, 35
Lipogenic enzyme activities in different adipose depots of Pirenaican and Holstein bulls and heifers taking into account adipocyte size, 432
Age
Effect of age at slaughter on carcass traits and meat quality of Italian heavy pigs, 2448
Liquid supplement and forage intake by range beef cows, 294
Aggression
Aggressive behavior is reduced in bulls actively immunized against gonadotropin-releasing hormone, 411
Aggressive Behavior
Large round bale feeder design affects hay utilization and beef cow behavior, 109
Aging
Amino acid sequences of multiple fast and slow troponin T isoforms expressed in adult bovine skeletal muscles, 1185
Relationship between aging and nutritionally controlled growth rate on heat production of heifers, 1847
Agricultural Science
Critical perspectives of animal agriculture: Introduction, 2880
Agriculture
A Long-term Study of Knowledge, Risk and Ethics for Students Enrolled in an Introductory Biotechnology Course, 1348
Internationalization of the Animal Science undergraduate curriculum: A survey of its current status, barriers to its implementation and its value, 1088
Alfalfa Hay
Combinations of alfalfa hay and wet corn gluten feed in limit-fed growing diets for beef cattle, 1671
Alkaline Phosphatase
Effectiveness of an experimental consensus phytase in improving dietary phytate-phosphorus utilization by weanling pigs, 2751
Alkaloids
Effects of feeding ergovaline on lamb performance in a heat stress environment, 1538
Amazonia
Production and economic potentials of cattle in pasture-based systems of the western Amazon region of Brazil, 2923
Amino Acids
Content of ileal EAAC1 and hepatic GLT-1 high-affinity glutamate transporters is increased in growing vs. nongrowing lambs, paralleling increased tissue D- L-glutamate, plasma glutamine, and alanine concentrations, 1030
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Effect of soybean meal particle size on amino acid and energy digestibility in grower-finisher swine, 697
Effects of Adding Fiber Sources to Reduced-Crude Protein, Amino Acid-Supplemented Diets on Nitrogen Excretion, Growth Performance, and Carcass Traits of Finishing Pigs, 492
Evaluation of low-ash poultry meal as a protein source in canine foods, 2279
Growth, carcass traits, and plasma amino acid concentrations of gilts fed low-protein diets supplemented with amino acids including histidine, isoleucine, and valine, 1529
Influence of dietary protein level, amino acid supplementation, and dietary energy levels on growing-finishing pig performance and carcass composition, 3075

Influences of dietary protein level, amino acid supplementation and environmental temperature on performance, body composition, organ weights and total heat production of growing pigs, 1998
Ryegrass-based and barley supplementation: Partition of nitrogenous nutrients among splanchnic tissues and hind limb in finishing lambs, 3160
Simulating the partitioning of dietary amino acids-New directions, 60
Amino Acid Sequence
Amino acid sequences of multiple fast and slow troponin T isoforms expressed in adult bovine skeletal muscles, 1185
Ammonia
Ammonia, volatile fatty acids, phenolics, and odor offensiveness in manure from growing pigs fed diets reduced in protein concentration, 1754
Anabolic Agents
Protein turnover and sensory traits of longissimus muscle from implanted and nonimplanted heifers, 1728
Analogs
Effects of deslorelin acetate implants in horses: Single implants in stallions and steroid-treated geldings and multiple implants in mares, 1300
Analysis
Bioeconomic evaluation of sow longevity and profitability, 2915
Discrete time survival analysis of lamb mortality in a terminal sire composite population, 1399
Analytical Methods
A survey of methods of analysis for minerals in feedstuffs, 3218
Challenges in measuring insoluble dietary fiber, 3233
Challenges in measuring moisture content of feeds, 3255
Challenges with nonfiber carbohydrate methods, 3226
Androstenone
Detection of quantitative trait loci for fat androstenone levels in pigs, 385
Anesthesia
Sleep time following anesthesia in mouse lines selected for resistance or susceptibility to fescue toxicosis, 2562
Anestrus
Ovarian cyclicity in thyroid-suppressed ewes treated with propylthiouracil immediately before onset of seasonal anestrus, 29
Angora
Effects of prolactin administered to a perfused area of the skin of Angora goats, 279
Angus
Estimated copper requirement of Angus and Simmental heifers, 865
Animal Breeding
Stillbirth in the pig in relation to genetic merit for farrowing survival, 2419
Animal Feeding
Liquid supplement and forage intake by range beef cows, 294
Animal Genetic Resources
Design and standards for genetic evaluation of swine seedstock populations, 2409
Animal Husbandry
Value-added animal agriculture: Inclusion of Race and Gender in the Professional Formula, 2895
Animal Nutrition
Effect of feeding glyphosate-tolerant (Roundup-Ready events GA21 or nk603) corn compared with reference hybrids on feedlot steer performance and carcass characteristics, 2600
Animal Production
Critical perspectives in animal agriculture: A response, 2908
Animals
Experiential learning in the animal sciences: Development of a multispecies large animal management and production practicum, 3202
Antagonists
Domperidone can ameliorate deleterious reproductive effects and reduced weight gain associated with fescue toxicosis in heifers, 2568
Anthraquinones
Effects of 9,10 anthraquinone on ruminal fermentation, total-tract digestion, and blood metabolite concentrations in sheep, 323
Antibacterial Activity
Nutritional evaluation of egg byproducts in diets for early-weaned pigs, 2270
Antibiotics
Effect of fishmeal replacement with spray-dried animal plasma and colistin on intestinal structure, intestinal microbiology, and performance of weanling pigs challenged with *Escherichia coli* K99, 1220
Growth performance, nutrient digestibility, and fecal microflora in weanling pigs fed live yeast, 1004
Molecular ecological analysis of porcine ileal microbiota responses to antimicrobial growth promoters, 3035
Response of early weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, zinc oxide, fumaric acid, or antibiotic, 1790
Antibodies
Response of early-weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, 1781
Response of early weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, zinc oxide, fumaric acid, or antibiotic, 1790
Apoptosis
Effects of butyrate on apoptosis in the pig colon and its consequences for skatole formation and tissue accumulation, 239
Effects of dexamethasone on lymphoid tissue in the gut and thymus of neonatal calves fed with colostrum or milk replacer, 2322
Artificial Insemination
A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166
Effect of boar exposure at time of insemination on factors influencing fertility in gilts, 9
Influence of hormone supplementation to extended semen on artificial insemination, uterine contractions, establishment of a sperm reservoir, and fertility in swine, 821
Supplemental norgestomet, progesterone, or melengestrol acetate increases pregnancy rates in suckled beef cows after timed inseminations, 571
Synchronization of *Bos indicus* × *Bos taurus* cows for timed artificial insemination using gonadotropin-releasing hormone plus prostaglandin $F_{2\alpha}$ in combination with melengestrol acetate, 830
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Uterine immune reaction and reproductive performance of sows inseminated with extended semen and infused with pooled whole dead semen, 2818
Ascites
Erythropoiesis regulation during the development of ascites syndrome in broiler chickens: A possible role of corticosterone, 784
Ash, Digestibility
Evaluation of low-ash poultry meal as a protein source in canine foods, 2279
Astragalus lentiginosus
Grazing of spotted locoweed (*Astragalus lentiginosus* by cattle and horses in Arizona, 2285
Augmentation
Real-time augmentation of USDA yield grade application to beef carcasses using video image analysis, 2239
Average Daily Gain
A dose-response study of melengestrol acetate on feedlot performance and carcass characteristics of beef steers, 2699
Evaluation of the South African Dorper as a terminal sire breed for growth, carcass, and palatability characteristics, 368

B

β-Adrenergic Agonists
Development of a model to describe the compositional growth and dietary lysine requirements of pigs fed ractopamine, 1106
Ractopamine treatment biases in the prediction of pork carcass composition, 16
The effect of feeding ractopamine (Paylean) on muscle quality and sensory characteristics in three diverse genetic lines of swine, 1508
β-Adrenergic Receptors
β-Adrenergic receptor subtypes that mediate ractopamine stimulation of lipolysis, 662

Stereoselectivity of porcine β-adrenergic receptors for ractopamine stereoisomers, 122
β-Glucans
Growth performance, carcass and pork quality of finisher pigs fed oat-based diets containing different levels of β-glucans, 449
β-Hydroxybutyrate
The role of acidogenic diets and β-hydroxybutyate on lymphocyte proliferation and serum antibody response against bovine respiratory viruses in Holstein steers, 3088
Backfat
Fine mapping of quantitative trait loci and assessment of positional candidate genes for backfat on bovine chromosome 14 in a commercial line of *Bos taurus*, 1919
Heritability of body length and measures of body density and their relationship to backfat thickness and loin muscle area in swine, 1943
The importance of a high feed intake during lactation of primiparous sows nursing large litters, 594
Bacteria
Dietary galactooligosaccharides affect ileal and total tract nutrient digestibility, ileal and fecal bacterial concentrations, and ileal fermentative characteristics of growing pigs, 2535
Effect of Irradiation of Individual Feed Ingredients and the Complete Diet on Nursery Pig Performance, 1799
Swine manure composition affects the biochemical origins, composition, and accumulation of odorous compounds, 2131
Barley
Effect of grain processing and silage on microbial protein synthesis and nutrient digestibility in beef cattle fed barley-based diets, 1057
Effects of moisture, roller setting, and saponin-based surfactant on barley processing, ruminal degradation of barley, and growth performance by feedlot steers, 2145
Influence of dietary urea level on digestive function and growth performance of cattle fed steam-flaked barley-based finishing diets, 2383
Ryegrass-based diet and barley supplementation: Partition of energy-yielding nutrients among splanchnic tissues and hind limbs in finishing lambs, 1068
Ryegrass-based and barley supplementation: Partition of nitrogenous nutrients among splanchnic tissues and hind limb in finishing lambs, 3160
Bayesian Theory
Bayesian inference about parameters of a longitudinal trajectory when selection operates on a correlated trait, 2714
Beef
Accuracy and repeatability of beef carcass longissimus muscle area measurements, 1980
Accuracy of predicting weight and percentage of beef carcass retail product using ultrasound and live animal measures, 466
A mixture model-based cluster analysis of DNA microarray gene expression data on Brahman and Brahman composite steers fed high-, medium-, and low-quality diets, 1900
Beef customer satisfaction: Trained sensory panel ratings and Warner-Bratzler shear force values, 143
Chilling and cooking rate effects on some myofibrillar determinants of tenderness of beef, 1473
Color stability of semitendinosus, semimembranosus, and biceps femoris steaks packaged in a high-oxygen modified atmosphere, 2230
Detection of quantitative trait loci for growth and carcass composition in cattle, 2976
Effectiveness of short-term feeding strategies for altering conjugated linoleic acid content of beef, 1862
Effectiveness of the SmartMV Prototype BeefCam System to Sort Beef Carcasses into Expected Palatability Groups, 441
Effects of forage and sunflower oil levels on ruminal biohydrogenation of fatty acids and conjugated linoleic acid formation in beef steers fed finishing diets, 3174
Effects of growth implants on consumer perceptions of meat tenderness in beef steers, 3052
Effects of implant regimens (trenbolone acetate-estradiol administered alone or in combination with zeranol) and vitamin D_3 on fresh beef color and quality, 135
Effects of postexsanguination vascular infusion of carcasses with calcium chloride or a solution of saccharides, sodium chloride, and phosphates on beef display-color stability, 669
Effects of postexsanguination vascular infusion of cattle with a solution of saccharides, sodium chloride, and phosphates or with calcium chloride on quality and sensory traits of steaks and ground beef, 156
Effects of repetitive use of hormonal implants on beef carcass quality, tenderness, and consumer ratings of beef palatability, 984
Mechanical measures of uncooked beef longissimus muscle can predict sensory panel tenderness and Warner-Bratzler shear force of cooked steaks, 1721
Online prediction of beef tenderness using a computer vision system equipped with a BeefCam module, 457
On-line prediction of yield grade, longissimus muscle area, preliminary yield grade, adjusted preliminary yield grade, and marbling score using the MARC beef carcass image analysis system, 150
Prediction of retail product weight and percentage using ultrasound and carcass measurements in beef cattle, 1736
Prerigor injection using glycolytic inhibitors in low-quality beef muscles, 997
Real-time augmentation of USDA yield grade application to beef carcasses using video image analysis, 2239
Relationships of consumer sensory ratings, marbling score, and shear force value to consumer acceptance of beef strip loin steaks, 2741
Retail yields from beef chuck and round subprimals from two grade groups when merchandised as single muscle cuts, 1482
Beef Cattle
A dynamic model of metabolizable energy utilization in growing and mature cattle. III. Model evaluation, 1390
A dynamic model of metabolizable energy utilization in growing and mature cattle. II. Metabolizable energy utilization for gain, 1382
A dynamic model of metabolizable energy utilization in growing and mature cattle. I. Metabolizable energy utilization for maintenance and support metabolism, 1371
Aggressive behavior is reduced in bulls actively immunized against gonadotropin-releasing hormone, 411
Analyses of growth curves of Nellore cattle by multiple-trait and random regression models, 918
A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166
Association of single nucleotide polymorphisms in the growth hormone and growth hormone receptor genes with blood serum insulin-like growth factor I concentration and growth traits in Angus cattle, 641
Characterization of season and sampling method effects on measurement of forage quality in fescue-based pastures, 1308
Carcass, sensory, and adipose tissue traits of Brangus steers fed casein-formaldehyde-protected starch and/or canola lipid, 2457
Detection of quantitative trait loci for growth and beef carcass fatness traits in a cross between *Bos taurus* (Angus) and *Bos indicus* (Brahman) cattle, 1933
Direct and correlated responses to selection for yearling weight on reproductive performance of Nelore cows, 376
Effect of early weaning on the performance of three-year-old, first-calf beef heifers and calves reared in the subtropics, 1136
Effect of grain processing and silage on microbial protein synthesis and nutrient digestibility in beef cattle fed barley-based diets, 1057
Effect of source of energy and rate of growth on performance, carcass characteristics, ruminal fermentation, and serum glucose and insulin of early-weaned steers, 843
Effects of roughage source and level on intake by feedlot cattle, 8
Effects of supplemental energy and/or degradable intake protein on performance, grazing behavior, 304
Effects of supplementary selenium source on the performance and blood measurements in beef cows and their calves, 856
Environmental stress in confined beef cattle, 110
Estimation of genetic parameters for ultrasound-predicted percentage of intramuscular fat in Angus cattle using random regression models, 35
Evaluation of age of dam effects on maternal performance of multilactation daughters from high- and low-milk EPD sires at three locations in the Southern United States, 1693
Evaluation of maternal performance of daughters from high and low milk EPD sires, 1406
Expected increases in genetic merit from using optimized contributions in two livestock populations of beef cattle and sheep, 2964
Fenceline contact of beef calves with their dams at weaning reduces the negative effects of separation on behavior and growth rate, 116

Genetic evaluation of an index of birth weight and yearling weight to improve efficiency of beef production, 2425
Genetic evaluation of growth in Nellore cattle by multiple-trait and random regression models, 927
Genetic Parameter Estimates for Serum Insulin-Like Growth Factor-I Concentration and Ultrasound Measurements of Backfat Thickness and Longissimus Muscle Area in Angus Beef Cattle, 2164
Genetic parameters for carcass traits and their live animal indicators in Simmental cattle, 1427
Genetic relationships between scrotal circumference and female reproductive traits, 395
Growth and pubertal development in Brahman-, Boran-, Tuli-, Belgian Blue-, Hereford- and Angus-sired F1 bulls, 1414
Identification of mitochondrial DNA substitutions related to meat quality in Japanese Black cattle, 68
Influence of oscillating dietary crude protein concentration on performance, acid-base balance, and nitrogen excretion of steers, 2660
Maternal grandsire, granddam, and sire breed effects on growth and carcass traits of crossbred cattle, 904
Pancreatic exocrine secretion in steers infused postruminally with casein and cornstarch, 1051
Reducing the cost of beef production through genetic improvement in residual feed intake: Opportunity and challenges to application, 9
Simulation study of teat score in first-parity Gelbvieh cows: Parameter estimation, 2959
The history of energetic efficiency research: Where have we been and where are we going?, 27
The multifactorial nature of food intake control, 139
The relationship between ultrasound measurements and carcass fat thickness and longissimus muscle area in beef cattle, 676
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in stocker cattle, 2856

Beef Cows
Body condition at parturition and postpartum weight changes do not influence the incidence of short-lived corpora lutea in postpartum beef cows, 2390
Influence of body condition at calving and postpartum nutrition on endocrine function and reproductive performance of primiparous beef cows, 3107
Influence of estradiol, progesterone, and nutrition on concentrations of gonadotropins and GnRH receptors, and abundance of mRNA for GnRH receptors and gonadotropin subunits in pituitary glands of beef cows, 269
Influence of milk production potential on forage dry matter intake by multiparous and primiparous Brangus females, 1837
Large round bale feeder design affects hay utilization and beef cow behavior, 109
Stock-piled forage or limit-fed corn as alternatives to hay for gestating and lactating beef cows, 1099

Beef Production
Genomic and computing strategies in the optimization of the genetic component of specification beef, 24
Technology to complement forage-based beef production systems in the West, 18

Behavior
Aggressive behavior is reduced in bulls actively immunized against gonadotropin-releasing hormone, 411
A laser-based method to measure thermal nociception in dairy cows: Short-term repeatability and effects of power output and skin condition, 945
Effect of repeated ketoprofen administration during surgical castration of bulls on cortisol, immunological function, feed intake, growth, and behavior, 1253
Fenceline contact of beef calves with their dams at weaning reduces the negative effects of separation on behavior and growth rate, 116
Large round bale feeder design affects hay utilization and beef cow behavior, 109
Predicting the consequences of social stressors on pig food intake and performance, 2995
The effects of ractopamine on the behavior and physiology of finishing pigs, 416
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in stocker cattle, 2856

Belly
Comparison of different methods to assess the composition of pig bellies in progeny testing, 1177

Best Linear Unbiased Prediction
Full pedigree quantitative trait locus analysis in commercial pigs using variance components, 2155

Betaine
Dietary Betaine Supplementation Affects Energy Metabolism of Pigs, 1202

Binding Proteins
Effects of antimicrobials and weaning on porcine serum insulin-like growth factor binding protein levels, 1456
Effects of growth hormone and feeding level on endocrine measurements, hormone receptors, muscle growth and performance of prepubertal heifers, 2189
Effects of protein deprivation on subsequent growth performance, gain of body components, and protein requirements in growing pigs, 705

Biochemical Receptors
Effects of growth hormone and feeding level on endocrine measurements, hormone receptors, muscle growth and performance of prepubertal heifers, 2189

Biochemical Transport
Content of ileal EAAC1 and hepatic GLT-1 high-affinity glutamate transporters is increased in growing vs. nongrowing lambs, paralleling increased tissue D- L-glutamate, plasma glutamine, and alanine concentrations, 1030
Nitrogen metabolism and recycling in Holstein heifers, 545

Biohydrogenation
Effects of forage and sunflower oil levels on ruminal biohydrogenation of fatty acids and conjugated linoleic acid formation in beef steers fed finishing diets, 3174

Biotechnology
Consumer attitudes toward biotechnology: Lessons for animal-related applications, 196
Determining whether transgenic and endogenous plant DNA and transgenic protein are detectable in muscle from swine fed Roundup Ready soybean meal, 1447
Livestock, ethics, and quality of life, 2887

Birth Weight
Genetic parameters for within-litter variation in piglet birth weight and change in within-litter variation during suckling, 604
Influence of litter size and creep feeding on preweaning gain and influence of preweaning growth on growth to slaughter in barrows, 2434

Blood
Effect of chromium propionate on growth, carcass traits, pork quality, and plasma metabolites in growing-finishing pigs, 2515
The effect of breed and intrauterine crowding on fetal erythropoiesis on day 35 of gestation in swine, 2352

Blood Analysis
Effects of supplemental energy and/or degradable intake protein on performance, grazing behavior, intake, digestibility, and fecal and blood indices by beef steers grazed on dormant native tallgrass prairie, 304

Blood Composition
Growth performance, dry matter and nitrogen digestibilities, serum profile, and carcass and meat quality of pigs with distinct g, 1142

Blood Flow
Effect of the live weight gain of steers during winter grazing on digestibility, acid-base balance, blood flow, and oxygen consumption by splanchnic tissues during adaptation and subsequent feeding of a high-grain diet, 3130

Blood Meal
Effects of blood meal pH and irradiation on nursery pig performance, 1013

Blood Plasma
Effect of fishmeal replacement with spray-dried animal plasma and colistin on intestinal structure, intestinal microbiology, and performance of weanling pigs challenged with *Escherichia coli* K99, 1220
The effect of thermal environment and spray-dried plasma on the acute-phase response of pigs challenged with lipopolysaccharide, 1166

Blood Plasma Ammonia
Synchrony of nutrient supply to the rumen and dietary energy source and their effects on the growth and metabolism of lambs, 1332

Blood Vessels
Relationships between uterine and fetal traits in rabbits selected on uterine capacity, 1265
Boars
Effect of boar exposure at time of insemination on factors influencing fertility in gilts, 9
Boar Taint
Detection of quantitative trait loci for fat androstenone levels in pigs, 385
Body Composition
Development of a model to describe the compositional growth and dietary lysine requirements of pigs fed ractopamine, 1106
Genetic Parameter Estimates for Serum Insulin-Like Growth Factor-I Concentration and Ultrasound Measurements of Backfat Thickness and Longissimus Muscle Area in Angus Beef Cattle, 2164
Growth, nutrient utilization, and body composition of dairy calves fed milk replacers containing different amounts of protein, 1641
Modeling chemical and physical body composition of the growing pig, 159
Reallocation of body resources in lactating mice highly selected for litter size, 939
Body Condition
Body condition at parturition and postpartum weight changes do not influence the incidence of short-lived corpora lutea in postpartum beef cows, 2390
Body Density
Heritability of body length and measures of body density and their relationship to backfat thickness and loin muscle area in swine, 1943
Body Length
Heritability of body length and measures of body density and their relationship to backfat thickness and loin muscle area in swine, 1943
Body Protein
Effects of protein deprivation on subsequent growth performance, gain of body components, and protein requirements in growing pigs, 705
Body Temperature
Strategies to reduce feedlot cattle heat stress: Effects on tympanic temperature, 649
Body Water
Dehydration in stressed ruminants may be the result of a cortisol-induced diuresis, 512
Body Weight
Domperidone can ameliorate deleterious reproductive effects and reduced weight gain associated with fescue toxicosis in heifers, 2568
Investigation of breeding strategies to increase the probability that German shepherd dog and Labrador retriever dog guides would attain optimum size, 2950
Quantitative trait locus detection in commercial broiler lines using candidate regions, 1158
Relationship Between Body Weight and Level of Fat Supplementation on Fatty Acid Digestion in Feedlot Cattle, 2653
Bones
Chronic metabolic acid load induced by changes in dietary electrolyte balance increased chloride retention but did not compromise bone in growing swine, 197
Hormonal regulation of calcium homeostasis in two breeds of dogs during growth at different rates, 1568
Bone Strength
Effectiveness of an experimental consensus phytase in improving dietary phytate-phosphorus utilization by weanling pigs, 2751
Bone Tissue
Circadian variation in biochemical markers of bone cell activity and insulin-like growth factor-I in two-year-old horses, 2804
Boron
Effect of boron supplementation of pig diets on the production of tumor necrosis factor-α and interferon-γ, 2552
Bos indicus
Effects of growth implants on consumer perceptions of meat tenderness in beef steers, 3052
Effects of lasalocid on circulating concentrations of leptin and insulin-like growth factor-I and reproductive performance of postpartum Brahman cows, 1363
Quantitative analysis of acid-base balance in *Bos indicus* steers subjected to transportation of long duration, 1434
Synchronization of *Bos indicus* × *Bos taurus* cows for timed artificial insemination using gonadotropin-releasing hormone plus prostaglandin $F_{2\alpha}$ in combination with melengestrol acetate, 830
Bovidae
Domperidone can ameliorate deleterious reproductive effects and reduced weight gain associated with fescue toxicosis in heifers, 2568
Technical note: Time-resolved immunofluorometric assay for growth hormone in ruminants, 1294
Bovine
Protein turnover and sensory traits of longissimus muscle from implanted and nonimplanted heifers, 1728
Bovine
The role of acidogenic diets and β-hydroxybutyate on lymphocyte proliferation and serum antibody response against bovine respiratory viruses in Holstein steers, 3088
Bovine Serum Albumin
Effect of capacitation of stallion sperm with polyvinylalcohol or bovine serum albumin on penetration of bovine zona-free or partially zona-removed equine oocytes, 2080
Brachiaria
Production and economic potentials of cattle in pasture-based systems of the western Amazon region of Brazil, 2923
Brahman
Effect of sire on μ- and m-calpain activity and rate of tenderization as indicated by myofibril fragmentation indices of steaks from Brahman cattle, 2440
Estimated genetic parameters for palatability traits of steaks from Brahman cattle, 54
Brain
Central and peripheral concentrations of tumor necrosis factor-α in Chinese Meishan pigs stimulated with lipopolysaccharide, 1274
Breeding
Economic weights for feed intake in the growing pig derived from a growth model and an economic model, 895
Breeding Season
The male effect, mounting behavior, and the onset of estrus in farmed muskoxen, 2669
Breeding Value
A comparison of hydrogen ion concentration and pH genetic predictions and fixed effect estimations when assessing pork quality, 611
Estimates of genetic parameters and genetic change for reproduction, weight, and wool characteristics of Targhee sheep, 630
Stillbirth in the pig in relation to genetic merit for farrowing survival, 2419
Breeds
Evaluation of Duroc- vs. Pietrain-sired pigs for carcass and meat quality measures, 1895
Maternal grandsire, granddam, and sire breed effects on growth and carcass traits of crossbred cattle, 904
Broilers
Effect of spray-dried bovine serum on intake, health, and growth of broilers housed in different environments, 2776
Quantitative trait locus detection in commercial broiler lines using candidate regions, 1158
Bromocriptine
Specific window of prolactin inhibition in late gestation decreases mammary parenchymal tissue development in gilts, 1823
Bulls
Effect of ketoprofen, lidocaine local anesthesia, and combined xylazine and lidocaine caudal epidural anesthesia during castration of beef cattle on stress responses, immunity, growth, and behavior, 1281
Effect of repeated ketoprofen administration during surgical castration of bulls on cortisol, immunological function, feed intake, growth, and behavior, 1253
Growth and pubertal development in Brahman-, Boran-, Tuli-, Belgian Blue-, Hereford- and Angus-sired F1 bulls, 1414
Butyrates
Effects of butyrate on apoptosis in the pig colon and its consequences for skatole formation and tissue accumulation, 239
By-products
Influence of steam-peeled potato-processing waste inclusion level in beef finishing diets: Effects on digestion, feedlot performance, and meat quality, 2675

C

Calcium
- Chronic metabolic acid load induced by changes in dietary electrolyte balance increased chloride retention but did not compromise bone in growing swine, 197
- Hormonal regulation of calcium homeostasis in two breeds of dogs during growth at different rates, 1568

Calves
- Abundance of message for insulin-like growth factors-I and -II and for receptors for growth hormone, insulin-like growth factors-I and -II, and insulin in the intestine and liver of pre- and full-term calves, 2294
- Dexamethasone and colostrum feeding differently affect hepatic gluconeogenic enzymes in neonatal calves, 3095
- Effect of early weaning on the performance of three-year-old, first-calf beef heifers and calves reared in the subtropics, 1136
- Effect of transportation and commingling on the acute-phase protein response, growth, and feed intake of newly weaned beef calves, 1120
- Effects of dexamethasone on lymphoid tissue in the gut and thymus of neonatal calves fed with colostrum or milk replacer, 2322
- Effects of feeding supplemental fat to beef cows on cold tolerance in newborn calves, 885
- Fenceline contact of beef calves with their dams at weaning reduces the negative effects of separation on behavior and growth rate, 116
- Growth, nutrient utilization, and body composition of dairy calves fed milk replacers containing different amounts of protein, 1641
- The effect of abrupt weaning of suckler calves on the plasma concentrations of cortisol, catecholamines, leukocytes, acute-phase proteins and in vitro interferon-gamma production, 2847
- The ontogeny of the somatotropic axis in male and female Hereford calves from birth to one year of age, 2811

Capacitation
- Effect of capacitation of stallion sperm with polyvinylalcohol or bovine serum albumin on penetration of bovine zona-free or partially zona-removed equine oocytes, 2080

Carbohydrates
- Challenges with nonfiber carbohydrate methods, 3226
- Effect of carbohydrate source on growth performance, carcass traits, and meat quality of growing-finishing pigs, 2488
- Use of carbohydrases in corn–soybean meal-based nursery diets, 2496

Carcass Composition
- Detection of quantitative trait loci for growth and beef carcass fatness traits in a cross between *Bos taurus* (Angus) and *Bos indicus* (Brahman) cattle, 1933
- Effect of carbohydrate source on growth performance, carcass traits, and meat quality of growing-finishing pigs, 2488
- Effect of feather meal on live animal performance and carcass quality and composition of growing-finishing swine, 172
- Effect of source of energy and rate of growth on performance, carcass characteristics, ruminal fermentation, and serum glucose and insulin of early-weaned steers, 843
- Evaluation of Duroc- vs. Pietrain-sired pigs for carcass and meat quality measures, 1895
- Evaluation of the E+V video image analysis system as a predictor of pork carcass meat yield, 1193
- Leptin as a predictor of carcass composition in beef cattle, 1
- Maternal grandsire, granddam, and sire breed effects on growth and carcass traits of crossbred cattle, 904
- Ractopamine treatment biases in the prediction of pork carcass composition, 16
- The relationship between ultrasound measurements and carcass fat thickness and longissimus muscle area in beef cattle, 676

Carcasses
- Accuracy of predicting weight and percentage of beef carcass retail product using ultrasound and live animal measures, 466
- Effect of chromium propionate on growth, carcass traits, pork quality, and plasma metabolites in growing-finishing pigs, 2515
- Effects of postexsanguination vascular infusion of carcasses with calcium chloride or a solution of saccharides, sodium chloride, and phosphates on beef display-color stability, 669
- Effects of repetitive use of hormonal implants on beef carcass quality, tenderness, and consumer ratings of beef palatability, 984
- Genetic parameters for carcass traits and their live animal indicators in Simmental cattle, 1427
- Growth performance, carcass and pork quality of finisher pigs fed oat-based diets containing different levels of β-glucans, 449
- Influence of litter size and creep feeding on preweaning gain and influence of preweaning growth on growth to slaughter in barrows, 2434
- On-line prediction of yield grade, longissimus muscle area, preliminary yield grade, adjusted preliminary yield grade, and marbling score using the MARC beef carcass image analysis system, 150
- Prediction of retail product weight and percentage using ultrasound and carcass measurements in beef cattle, 1736

Carcass Grading
- Accuracy and repeatability of beef carcass longissimus muscle area measurements, 1980
- Online prediction of beef tenderness using a computer vision system equipped with a BeefCam module, 457
- Real-time augmentation of USDA yield grade application to beef carcasses using video image analysis, 2239

Carcass Quality
- Carcass, sensory, and adipose tissue traits of Brangus steers fed casein-formaldehyde-protected starch and/or canola lipid, 2457
- Growth performance, dry matter and nitrogen digestibilities, serum profile, and carcass and meat quality of pigs with distinct g, 1142
- Identification of mitochondrial DNA substitutions related to meat quality in Japanese Black cattle, 68
- Influence of grazing dormant native range or winter wheat pasture on subsequent finishing cattle performance, carcass characteristics and ruminal metabolism, 3191

Carcass Traits
- Detection of quantitative trait loci for growth and carcass composition in cattle, 2976
- Effects of postexsanguination vascular infusion of cattle with a solution of saccharides, sodium chloride, and phosphates or with calcium chloride on quality and sensory traits of steaks and ground beef, 156

Carcass Yield
- An evaluation of the lamb vision system as a predictor of lamb carcass red meat yield percentage, 1488
- Real-time augmentation of USDA yield grade application to beef carcasses using video image analysis, 2239

Carnitine Palmitoyltransferase
- Dietary fat has minimal effects on fatty acid metabolism transcript concentrations in pigs, 423

Castration
- Aggressive behavior is reduced in bulls actively immunized against gonadotropin-releasing hormone, 411
- Effect of ketoprofen, lidocaine local anesthesia, and combined xylazine and lidocaine caudal epidural anesthesia during castration of beef cattle on stress responses, immunity, growth, and behavior, 1281
- Effect of repeated ketoprofen administration during surgical castration of bulls on cortisol, immunological function, feed intake, growth, and behavior, 1253

Catecholamines
- The effect of abrupt weaning of suckler calves on the plasma concentrations of cortisol, catecholamines, leukocytes, acute-phase proteins and in vitro interferon-gamma production, 2847
- The effects of ractopamine on the behavior and physiology of finishing pigs, 416

Cattle
- Age at puberty, total fat and conjugated linoleic acid content of carcass, and circulating metabolic hormones in beef heifers fed a diet high in linoleic acid beginning at four months of age, 261
- Amino acid sequences of multiple fast and slow troponin T isoforms expressed in adult bovine skeletal muscles, 1185
- Combinations of alfalfa hay and wet corn gluten feed in limit-fed growing diets for beef cattle, 1671
- Controlling variation in feed intake through bunk management, 133
- Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
- Effect of copper source and level on performance and copper status of cattle consuming molasses-based supplements, 1357
- Effect of feeding glyphosate-tolerant (Roundup-Ready events GA21 or nk603) corn compared with reference hybrids on feedlot steer performance and carcass characteristics, 2600
- Effect of photoperiod on hepatic growth hormone receptor 1A expression in steer calves, 1440

Effect of the live weight gain of steers during winter grazing on digestibility, acid-base balance, blood flow, and oxygen consumption by splanchnic tissues during adaptation and subsequent feeding of a high-grain diet, 3130
Effects of breed (Angus vs Simmental) and copper and zinc source on mineral status of steers fed high dietary iron, 318
Effects of *DGAT1* variants on milk production traits in German cattle breeds, 1911
Estradiol plus progesterone treatment modulates select elements of the proinflammatory cytokine cascade in steers: Attenuated nitric oxide and thromboxane B_2 production in endotoxemia, 1546
Evidence of a major gene influencing hair length and heat tolerance in *Bos taurus* cattle, 80
Fertility assessment through heterospermic insemination of flow-sorted sperm in cattle, 1814
Fine mapping of quantitative trait loci and assessment of positional candidate genes for backfat on bovine chromosome 14 in a commercial line of *Bos taurus*, 1919
Influence of dietary cobalt source and concentration on performance, vitamin B_{12} status, and ruminal and plasma metabolites in growing and finishing steers, 3151
Influence of dietary urea level on digestive function and growth performance of cattle fed steam-flaked barley-based finishing diets, 2383
Influence of grazing dormant native range or winter wheat pasture on subsequent finishing cattle performance, carcass characteristics and ruminal metabolism, 3191
Influence of steam-peeled potato-processing waste inclusion level in beef finishing diets: Effects on digestion, feedlot performance, and meat quality, 2675
Influence of substrate and/or neurohormonal mimic on in vitro pancreatic enzyme release from calves postruminally infused with partially hydrolyzed starch and/or casein, 1323
Insulin-like growth factor binding proteins in granulosa and thecal cells from bovine ovarian follicles at different stages of development, 2826
Leptin as a predictor of carcass composition in beef cattle, 1
Lipogenic enzyme activities in different adipose depots of Pirenaican and Holstein bulls and heifers taking into account adipocyte size, 432
Oxytocin-induced secretion of prostaglandin $F_{2\alpha}$ in postpartum beef cows: Effects of progesterone and estradiol-17β treatment, 1830
Quantitative analysis of acid-base balance in *Bos indicus* steers subjected to transportation of long duration, 1434
Relationship Between Body Weight and Level of Fat Supplementation on Fatty Acid Digestion in Feedlot Cattle, 2653
Season of the year influences testosterone secretion in bulls administered luteinizing hormone, 1023
Simplified in situ method for estimating ruminal dry matter and protein degradability of concentrates, 520
Strategies to reduce feedlot cattle heat stress: Effects on tympanic temperature, 649
The effect of pregnancy on visceral growth and energy use in beef heifers, 1853
The effects of varying the interval from follicular wave emergence to progestin withdrawal on follicular dynamics and the synchrony of estrus in beef cattle, 1562
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Undegradable intake protein supplementation of compensating spring-born steers and summer-born steers during summer grazing, 791
Use of insulin-like growth factor-I during embryo culture and treatment of recipients with gonadotropin-releasing hormone to increase pregnancy rates following the transfer of in vitro-produced embryos to heat-stressed, lactating cows, 1590
Wet corn gluten feed and alfalfa hay combinations in steam-flaked corn finishing cattle diets, 3121

Cattle Feeding
Corn processing method in finishing diets containing wet corn gluten feed, 3182
Interaction between bunk management and monensin concentration on finishing performance, feeding behavior, and ruminal metabolism during an acidosis challenge with feedlot cattle, 2869

Cell Cultures
Recent Advances that Impact Skeletal Muscle Growth and Development Research, 1

Cell Growth
Effects of dexamethasone on lymphoid tissue in the gut and thymus of neonatal calves fed with colostrum or milk replacer, 2322
The effect of pregnancy on visceral growth and energy use in beef heifers, 1853

Cells
Recent Advances that Impact Skeletal Muscle Growth and Development Research, 1

Cellulase
Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37

Cellulose
Influence of fibrolytic enzymes on the hydrolysis and fermentation of pure cellulose and xylan by mixed ruminal microorganisma in vitro, 1040

Cellulose Digestion
Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37

Cervidae
Technical note: Time-resolved immunofluorometric assay for growth hormone in ruminants, 1294

Chemical Analysis
Variability in mixing efficiency and laboratory analyses of a common diet mixed at 25 experiment stations, 484

Chemical Composition
Modeling chemical and physical body composition of the growing pig, 159

Chicks
Efficacy of an *E. coli* phytase expressed in yeast for releasing phytate-bound phosphorus in young chicks and pigs, 474

Chilling
Accelerated chilling of carcasses to improve pork quality, 1464
Chilling and cooking rate effects on some myofibrillar determinants of tenderness of beef, 1473

Chlorides
Chronic metabolic acid load induced by changes in dietary electrolyte balance increased chloride retention but did not compromise bone in growing swine, 197

Chlortetracycline
Effects of antimicrobials and weaning on porcine serum insulin-like growth factor binding protein levels, 1456

Cholecalciferol
Hormonal regulation of calcium homeostasis in two breeds of dogs during growth at different rates, 1568

Chromium
Effect of chromium propionate and metabolizable energy on growth, carcass traits, and pork quality of growing-finishing pigs, 191
Effect of chromium propionate on growth, carcass traits, pork quality, and plasma metabolites in growing-finishing pigs, 2515

Circadian Rhythm
Circadian variation in biochemical markers of bone cell activity and insulin-like growth factor-I in two-year-old horses, 2804
Effects of dietary fermentable carbohydrates on behavior and heat production in group-housed sows, 182
Effects of two different dietary fermentable carbohydrates on activity and heat production in group-housed pigs, 1210

Classification
Effectiveness of the SmartMV Prototype BeefCam System to Sort Beef Carcasses into Expected Palatability Groups, 441

Coat
Evidence of a major gene influencing hair length and heat tolerance in *Bos taurus* cattle, 80

Cobalt
Influence of dietary cobalt source and concentration on performance, vitamin B_{12} status, and ruminal and plasma metabolites in growing and finishing steers, 3151

Cold Stress
The effect of thermal environment and spray-dried plasma on the acute-phase response of pigs challenged with lipopolysaccharide, 1166

College Students
A Long-term Study of Knowledge, Risk and Ethics for Students Enrolled in an Introductory Biotechnology Course, 1348

Colon
Effects of butyrate on apoptosis in the pig colon and its consequences for skatole formation and tissue accumulation, 239
Color
Effects of implant regimens (trenbolone acetate-estradiol administered alone or in combination with zeranol) and vitamin D_3 on fresh beef color and quality, 135
Effects of postexsanguination vascular infusion of carcasses with calcium chloride or a solution of saccharides, sodium chloride, and phosphates on beef display-color stability, 669
Online prediction of beef tenderness using a computer vision system equipped with a BeefCam module, 457
Colostrum
Dexamethasone and colostrum feeding differently affect hepatic gluconeogenic enzymes in neonatal calves, 3095
Compensatory Growth
Effect of Dietary Protein Fluctuations and Space Allocation on Performance and Carcass Quality of Growing-Finishing Pigs, 2783
Effect of the live weight gain of steers during winter grazing on digestibility, acid-base balance, blood flow, and oxygen consumption by splanchnic tissues during adaptation and subsequent feeding of a high-grain diet, 3130
Effects of protein deprivation on subsequent growth performance, gain of body components, and protein requirements in growing pigs, 705
Undegradable intake protein supplementation of compensating spring-born steers and summer-born steers during summer grazing, 791
Complementary DNA
A mixture model-based cluster analysis of DNA microarray gene expression data on Brahman and Brahman composite steers fed high-, medium-, and low-quality diets, 1900
Complementary DNA macroarray analyses of differential gene expression in porcine fetal and postnatal muscle, 2179
Composition
Effect of chromium propionate on growth, carcass traits, pork quality, and plasma metabolites in growing-finishing pigs, 2515
Estimation of genetic parameters for ultrasound-predicted percentage of intramuscular fat in Angus cattle using random regression models, 35
Evaluation of the South African Dorper as a terminal sire breed for growth, carcass, and palatability characteristics, 368
Concentration
A comparison of hydrogen ion concentration and pH genetic predictions and fixed effect estimations when assessing pork quality, 611
Conjugated Linoleic Acid
Age at puberty, total fat and conjugated linoleic acid content of carcass, and circulating metabolic hormones in beef heifers fed a diet high in linoleic acid beginning at four months of age, 261
Effects of forage and sunflower oil levels on ruminal biohydrogenation of fatty acids and conjugated linoleic acid formation in beef steers fed finishing diets, 3174
Consensus
Effectiveness of an experimental consensus phytase in improving dietary phytate-phosphorus utilization by weanling pigs, 2751
Consumer Attitudes
Consumer attitudes toward biotechnology: Lessons for animal-related applications, 196
Consumer Preferences
Characterization and consumer acceptance of three muscles from Hampshire × Rambouillet cross sheep expressing the callipyge phenotype, 2213
Consumer Satisfaction
Relationships of consumer sensory ratings, marbling score, and shear force value to consumer acceptance of beef strip loin steaks, 2741
Contemporary Comparisons
Evaluation models and genetic parameters for calving difficulty in beef cattle, 933
Contemporary Issues
Science, values, and common ground, 2904
Contraction
Influence of hormone supplementation to extended semen on artificial insemination, uterine contractions, establishment of a sperm reservoir, and fertility in swine, 821
Controlled Release
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Cooking
Chilling and cooking rate effects on some myofibrillar determinants of tenderness of beef, 1473
Copper
Effect of copper source and level on performance and copper status of cattle consuming molasses-based supplements, 1357
Effects of breed (Angus vs Simmental) and copper and zinc source on mineral status of steers fed high dietary iron, 318
Estimated copper requirement of Angus and Simmental heifers, 865
Growth performance, nutrient digestibility, and fecal microflora in weanling pigs fed live yeast, 1004
Corn
Effects of supplemental energy and/or degradable intake protein on performance, grazing behavior, intake, digestibility, and fecal and blood indices by beef steers grazed on dormant native tallgrass prairie, 304
Stock-piled forage or limit-fed corn as alternatives to hay for gestating and lactating beef cows, 1099
Corpus Luteum
Body condition at parturition and postpartum weight changes do not influence the incidence of short-lived corpora lutea in postpartum beef cows, 2390
Nitric oxide and the ovary, 1
Correlated Response
Bayesian inference about parameters of a longitudinal trajectory when selection operates on a correlated trait, 2714
Direct and correlated responses to selection for yearling weight on reproductive performance of Nelore cows, 376
Corticosterone
Erythropoiesis regulation during the development of ascites syndrome in broiler chickens: A possible role of corticosterone, 784
Cortisol
Estradiol plus progesterone treatment modulates select elements of the proinflammatory cytokine cascade in steers: Attenuated nitric oxide and thromboxane B_2 production in endotoxemia, 1546
The effect of abrupt weaning of suckler calves on the plasma concentrations of cortisol, catecholamines, leukocytes, acute-phase proteins and in vitro interferon-gamma production, 2847
The effect of thermal environment and spray-dried plasma on the acute-phase response of pigs challenged with lipopolysaccharide, 1166
Cows
Effect of fish meal supplementation on plasma and endometrial fatty acid composition in nonlactating beef cows, 2840
Expression of the uterine Mx protein in cyclic and pregnant cows, gilts, and mares, 1552
Liquid supplement and forage intake by range beef cows, 294
Nutritional- and suckling-mediated anovulation in beef cows, 48
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: II. Pregnancy and economics, 563
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: I. Performance, forage intake, and nutrient balance, 800
Creatine
Creatine monohydrate supplemented in swine finishing diets and fresh pork quality: III. Evaluating the cumulative effect of creatine monohydrate and alpha-lipoic acid, 2469
Crowding
Effect of Dietary Protein Fluctuations and Space Allocation on Performance and Carcass Quality of Growing-Finishing Pigs, 2783
Crude Protein
Effects of Adding Fiber Sources to Reduced-Crude Protein, Amino Acid-Supplemented Diets on Nitrogen Excretion, Growth Performance, and Carcass Traits of Finishing Pigs, 492
Growth, carcass traits, and plasma amino acid concentrations of gilts fed low-protein diets supplemented with amino acids including histidine, isoleucine, and valine, 1529
Cultivars
Effect of carbohydrate source on growth performance, carcass traits, and meat quality of growing-finishing pigs, 2488
Cured Meat
Effect of age at slaughter on carcass traits and meat quality of Italian heavy pigs, 2448

Effect of conjugated linoleic acid on meat quality, lipid metabolism, and sensory characteristics of dry-cured hams from heavy pigs, 2219
Curriculum
Internationalization of the Animal Science undergraduate curriculum: A survey of its current status, barriers to its implementation and its value, 1088
Cytokines
Effect of boron supplementation of pig diets on the production of tumor necrosis factor-α and interferon-γ, 2552
The effect of thermal environment and spray-dried plasma on the acute-phase response of pigs challenged with lipopolysaccharide, 1166
Uterine immune reaction and reproductive performance of sows inseminated with extended semen and infused with pooled whole dead semen, 2818
Cytoplasmic Inheritance
Identification of mitochondrial DNA substitutions related to meat quality in Japanese Black cattle, 68
Models with cytoplasmic effects for birth, weaning, and fleece weights, and litter size at birth for a population of Targhee sheep, 61
Models with nuclear, cytoplasmic, and environmental effects for production traits of Columbia sheep, 1926

D

Dactylis glomerata
Biohydrogenation of unsaturated fatty acids in continuous culture fermenters during digestion of orchardgrass or red clover with three levels of ground corn supplementation, 1611
Dairy Cattle
Estimation of linkage disequilibrium in a sample of the United Kingdom dairy cattle population using unphased genotypes, 617
Dairy Cows
A laser-based method to measure thermal nociception in dairy cows: Short-term repeatability and effects of power output and skin condition, 945
Alternative approaches to predicting methane emissions from dairy cows, 3141
Comparison of three techniques for estimating the forage intake of lactating dairy cows on pasture, 2357
Composition and digestive tract retention time of ruminal particles with functional specific gravity greater or less than 1.02, 2639
Data Analysis
The impact of data structure on genetic (co)variance components of early growth in sheep, estimated using an animal model with maternal effects, 101
Data Simulation
Simulation study of teat score in first-parity Gelbvieh cows: Parameter estimation, 2959
Deep Litter Housing
Performance of finishing pigs in hoop structures and confinement during winter and summer, 1663
Degradation
Amino acid sequences of multiple fast and slow troponin T isoforms expressed in adult bovine skeletal muscles, 1185
Screening of exogenous enzymes for ruminant diets: Relationship between biochemical characteristics and in vitro ruminal degradation, 2628
Simplified in situ method for estimating ruminal dry matter and protein degradability of concentrates, 520
Delphinium
Evaluation of vaccination against methyllycaconitine toxicity in mice, 232
The tocicity and kinetics of larkspur alkaloid, methyllycaconitine, in mice, 1237
Denervation
Heterogeneity of Protein Expression within Muscle Fibers, 94
Design
Design and standards for genetic evaluation of swine seedstock populations, 2409
Fender design and insulation of farrowing huts: effects on performance of outdoor sows and piglets, 955
Detection
The male effect, mounting behavior, and the onset of estrus in farmed muskoxen, 2669
Detergent Fiber
Challenges in measuring insoluble dietary fiber, 3233
Development
Heterogeneity of Protein Expression within Muscle Fibers, 94
Diarrhea
Response of early weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, zinc oxide, fumaric acid, or antibiotic, 1790
Dienoic Fatty Acids
Effect of conjugated linoleic acid on meat quality, lipid metabolism, and sensory characteristics of dry-cured hams from heavy pigs, 2219
Dietary Fat
Dietary fat has minimal effects on fatty acid metabolism transcript concentrations in pigs, 423
The Effect of Dietary Energy Source on Serum Concentration of Insulin-like Growth Factor-I, Growth Hormone, Insulin, Glucose, and Fat Metabolites in Weanling Horses, 1581
Dietary Fiber
Challenges in measuring insoluble dietary fiber, 3233
Dietary Protein
Effect of Dietary Protein Fluctuations and Space Allocation on Performance and Carcass Quality of Growing-Finishing Pigs, 2783
Effect of dietary protein on calpastatin in canine skeletal muscle, 2199
Diets
Characterization of season and sampling method effects on measurement of forage quality in fescue-based pastures, 1308
Effects of two different dietary fermentable carbohydrates on activity and heat production in group-housed pigs, 1210
Growth, nutrient utilization, and body composition of dairy calves fed milk replacers containing different amounts of protein, 1641
Impact of early postweaning growth rate as affected by diet complexity and space allocation on subsequent growth performance of pigs in a wean-to-finish production system, 353
Pre-harvest factors influencing the acid resistance of *Escherichia coli* and *E. coli* O157:H7, 1080
Differentiation
Recent Advances that Impact Skeletal Muscle Growth and Development Research, 1
Digestibility
Determination of True Digestive Utilization of Phosphorus and the Endogenous Phosphorus Outputs Associated with Soybean Meal for Growing Pigs, 2766
Dietary galactooligosaccharides affect ileal and total tract nutrient digestibility, ileal and fecal bacterial concentrations, and ileal fermentative characteristics of growing pigs, 2535
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Effect of dietary energy concentration and apparent ileal digestible lysine:metabolizable energy ratio on nitrogen balance and growth performance of young pigs, 1227
Effect of grain processing and silage on microbial protein synthesis and nutrient digestibility in beef cattle fed barley-based diets, 1057
Effect of soybean meal particle size on amino acid and energy digestibility in grower-finisher swine, 697
Influence of grazing dormant native range or winter wheat pasture on subsequent finishing cattle performance, carcass characteristics and ruminal metabolism, 3191
The effect of supplementing microbial phytase and organic acids to a corn–soybean based diet fed to early-weaned pigs, 1806
Use of carbohydrases in corn–soybean meal-based nursery diets, 2496
Digestion
Biohydrogenation of unsaturated fatty acids in continuous culture fermenters during digestion of orchardgrass or red clover with three levels of ground corn supplementation, 1611
Effect of supplemental nutrient source on heifer growth and reproductive performance, and on utilization of corn silage-based diets by beef steers, 2367

Effects of enzyme supplementation of a total mixed ration on microbial fermentation in continuous culture, maintained at high and low pH, 2617
Influence of dietary urea level on digestive function and growth performance of cattle fed steam-flaked barley-based finishing diets, 2383
Nutrient digestibilities, microbial populations, and protein catabolites as affected by fructan supplementation of dog diets, 2008
Relationship Between Body Weight and Level of Fat Supplementation on Fatty Acid Digestion in Feedlot Cattle, 2653
Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Digestive Tract
Composition and digestive tract retention time of ruminal particles with functional specific gravity greater or less than 1.02, 2639
Fermented and nonfermented liquid feed to growing pigs—Effect on aspects of gastrointestinal ecology and growth performance, 2019
Tannins for suppression of internal parasites, 102
Discoloration
The effect of vitamin E supplementation on discoloration of injection-site lesions in retail cuts and the greening reaction observed in injection-site lesions in muscles of the chuck, 1885
Discrimination
The effect of stimulus height on visual discrimination in horses, 1715
Diterpenoid Alkaloids
The tocicity and kinetics of larkspur alkaloid, methyllycaconitine, in mice, 1237
Diversity
Value-added animal agriculture: Inclusion of Race and Gender in the Professional Formula, 2895
Docking
Length of docked tail and the incidence of rectal prolapse in lambs, 2725
Docosahexaenoic Acid
Effect of fish meal supplementation on plasma and endometrial fatty acid composition in nonlactating beef cows, 2840
Dogs
A dose-response experiment evaluating the effects of oligofructose and inulin on nutrient digestibility, stool quality, and fecal protein catabolites in healthy adult dogs, 3057
Effect of dietary protein on calpastatin in canine skeletal muscle, 2199
Effects of plasmid-mediated growth hormone releasing hormone supplementation in young, healthy Beagle dogs, 2301
Evaluation of low-ash poultry meal as a protein source in canine foods, 2279
Hormonal regulation of calcium homeostasis in two breeds of dogs during growth at different rates, 1568
Investigation of breeding strategies to increase the probability that German shepherd dog and Labrador retriever dog guides would attain optimum size, 2950
Nutrient digestibilities, microbial populations, and protein catabolites as affected by fructan supplementation of dog diets, 2008
Drying Methods
Challenges in measuring moisture content of feeds, 3255
Dry Matter
Simplified in situ method for estimating ruminal dry matter and protein degradability of concentrates, 520
Dystocia
Evaluation models and genetic parameters for calving difficulty in beef cattle, 933

E

Early Weaning
Effect of source of energy and rate of growth on performance, carcass characteristics, ruminal fermentation, and serum glucose and insulin of early-weaned steers, 843
Response of early-weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, 1781
The effect of supplementing microbial phytase and organic acids to a corn–soybean based diet fed to early-weaned pigs, 1806
Echinacea
Effect of dietary *Echinacea purpurea* on viremia and performance in porcine reproductive and respiratory syndrome virus-infected nursery pigs, 2139
Economic Evaluation
Economic weights for feed intake in the growing pig derived from a growth model and an economic model, 895
Economics
Bioeconomic evaluation of sow longevity and profitability, 2915
Education
Experiential learning in the animal sciences: Development of a multispecies large animal management and production practicum, 3202
Egg Products
Nutritional evaluation of egg byproducts in diets for early-weaned pigs, 2270
Eicosapentaenoic Acid
Effect of fish meal supplementation on plasma and endometrial fatty acid composition in nonlactating beef cows, 2840
Electrolytes
Chronic metabolic acid load induced by changes in dietary electrolyte balance increased chloride retention but did not compromise bone in growing swine, 197
Dehydration in stressed ruminants may be the result of a cortisol-induced diuresis, 512
Effects of dietary electrolyte balance on the chemistry of blood and urine in lactating sows and sow litter performance, 3067
Quantitative analysis of acid-base balance in *Bos indicus* steers subjected to transportation of long duration, 1434
Electroportation
Effects of plasmid-mediated growth hormone releasing hormone supplementation in young, healthy Beagle dogs, 2301
Embryo Transfer
Evaluation of the uterine environment and embryos of prepubertal gilts, 2575
Use of insulin-like growth factor-I during embryo culture and treatment of recipients with gonadotropin-releasing hormone to increase pregnancy rates following the transfer of in vitro-produced embryos to heat-stressed, lactating cows, 1590
Endocrinology
Duration of Lactation, Endocrine and Metabolic State, and Fertility of Primiparous Sows, 2088
Endogenous Protein
Comparison of the enzyme-hydrolyzed casein, guanidination, and isotope dilution methods for determining ileal endogenous protein flow in the growing rat and pig, 2525
Endophytes
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in sheep, 1316
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in stocker cattle, 2856
Endotoxins
Estradiol plus progesterone treatment modulates select elements of the proinflammatory cytokine cascade in steers: Attenuated nitric oxide and thromboxane B_2 production in endotoxemia, 1546
Energy
Effect of microbial phytase on energy availability, and lipid and protein deposition in growing swine, 2053
Impact of energy intake and pregnancy status on rate and efficiency of gain and backfat changes of sows postweaning, 209
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Energy Balance
Growth, nutrient utilization, and body composition of dairy calves fed milk replacers containing different amounts of protein, 1641
Energy Intake
Ryegrass-based diet and barley supplementation: Partition of energy-yielding nutrients among splanchnic tissues and hind limbs in finishing lambs, 1068
Energy Metabolism
A dynamic model of metabolizable energy utilization in growing and mature cattle. I. Metabolizable energy utilization for maintenance and support metabolism, 1371
A dynamic model of metabolizable energy utilization in growing and mature cattle. II. Metabolizable energy utilization for gain, 1382

A dynamic model of metabolizable energy utilization in growing and mature cattle. III. Model evaluation, 1390
The history of energetic efficiency research: Where have we been and where are we going?, 27
Energy Requirements
Dietary Betaine Supplementation Affects Energy Metabolism of Pigs, 1202
Energy Retention
Synchrony of nutrient supply to the rumen and dietary energy source and their effects on the growth and metabolism of lambs, 1332
Enterococcus
Effects of bacterial direct-fed microbials and yeast on site and extent of digestion, blood chemistry, and subclinical ruminal acidosis in feedlot cattle, 1628
Environment
Effect of spray-dried bovine serum on intake, health, and growth of broilers housed in different environments, 2776
Environmental stress in confined beef cattle, 110
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Environment Interactions
Models with cytoplasmic effects for birth, weaning, and fleece weights, and litter size at birth for a population of Targhee sheep, 61
Enzyme-Linked Immunosorbent Assay
Determining whether transgenic and endogenous plant DNA and transgenic protein are detectable in muscle from swine fed Roundup Ready soybean meal, 1447
Technical note: Time-resolved immunofluorometric assay for growth hormone in ruminants, 1294
Enzymes
Effect of age at slaughter on carcass traits and meat quality of Italian heavy pigs, 2448
Effects of enzyme supplementation of a total mixed ration on microbial fermentation in continuous culture, maintained at high and low pH, 2617
Influence of fibrolytic enzymes on the hydrolysis and fermentation of pure cellulose and xylan by mixed ruminal microorganisma in vitro, 1040
Screening of exogenous enzymes for ruminant diets: Relationship between biochemical characteristics and in vitro ruminal degradation, 2628
Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Epidural Anesthesia
Effect of ketoprofen, lidocaine local anesthesia, and combined xylazine and lidocaine caudal epidural anesthesia during castration of beef cattle on stress responses, immunity, growth, and behavior, 1281
Ergot Alkaloids
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in sheep, 1316
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in stocker cattle, 2856
Errors
Risk-adjusted expected return for selection decisions, 2984
Erythropoiesis
Erythropoiesis regulation during the development of ascites syndrome in broiler chickens: A possible role of corticosterone, 784
Escherichia coli
Effect of fishmeal replacement with spray-dried animal plasma and colistin on intestinal structure, intestinal microbiology, and performance of weanling pigs challenged with *Escherichia coli* K99, 1220
Pre-harvest factors influencing the acid resistance of *Escherichia coli* and *E. coli* O157:H7, 1080
Response of early-weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, 1781
Escherichia coli O157
Effects of live cultures of *Lactobacillus acidophilus* (strains NP45 and NP51) and *Propionibacterium freudenreichii* on performance, carcass, and intestinal characteristics, and *Escherichia coli* strain O157 shedding of finishing beef steers, 2686
Escherichia coli O157:H7
Effect of feeding the ionophores monensin and laidlomycin propionate and the antimicrobial bambermycin to sheep experimentally infected with *E. coli* O157:H7 and *Salmonella typhimurium*, 553
Escherichia coli Phytase
Effectiveness of an experimental consensus phytase in improving dietary phytate-phosphorus utilization by weanling pigs, 2751
Estimation
A comparison via simulation of least squares Lehmann-Scheffé estimators of two variances and heritability with those of restricted maximum likelihood, 1950
Estradiol
Effect of repeated administration of combination trenbolone acetate and estradiol implants on growth, carcass traits, and beef quality of long-fed Holstein steers, 2395
Growth factor messenger RNA levels in muscle and liver of steroid-implanted and nonimplanted steers, 965
Influence of estradiol, progesterone, and nutrition on concentrations of gonadotropins and GnRH receptors, and abundance of mRNA for GnRH receptors and gonadotropin subunits in pituitary glands of beef cows, 269
Quantification of mammary gland tissue size and composition changes after weaning in sows, 2583
The effects of varying the interval from follicular wave emergence to progestin withdrawal on follicular dynamics and the synchrony of estrus in beef cattle, 1562
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Time course of changes in growth factor mRNA levels in muscle of steroid-implanted and nonimplanted steers, 2733
Estradiol-17β
Effects of flax supplementation and a combined trenbolone acetate and estradiol implant on circulating insulin-like growth factor-I and muscle insulin-like growth factor-I messenger RNA levels in beef cattle, 3028
Estrogens
Resynchronization of estrus in cattle of unknown pregnancy status using estrogen, progesterone, or both, 1681
Estrous Cycle
A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166
The male effect, mounting behavior, and the onset of estrus in farmed muskoxen, 2669
Estrus
Body condition at parturition and postpartum weight changes do not influence the incidence of short-lived corpora lutea in postpartum beef cow, 2390
Resynchronization of estrus in cattle of unknown pregnancy status using estrogen, progesterone, or both, 1681
Ether Extracts
Fat analysis of feedstuffs challenges with fats and fatty acid methods, 3250
Ethics
Critical perspectives in animal agriculture: A responseCritical perspectives of animal agriculture: Introduction, 2880
Livestock, ethics, and quality of life, 2887
Science, values, and common ground, 2904
Excretion
Effects of Adding Fiber Sources to Reduced-Crude Protein, Amino Acid-Supplemented Diets on Nitrogen Excretion, Growth Performance, and Carcass Traits of Finishing Pigs, 492
Extension
Diet and evaluators affect perception of swine waste odor: An educational demonstration, 3211

F

Farrowing House
Fender design and insulation of farrowing huts: effects on performance of outdoor sows and piglets, 955
Fats
Age at puberty, total fat and conjugated linoleic acid content of carcass, and circulating metabolic hormones in beef heifers fed a diet high in linoleic acid beginning at four months of age, 261
Effect of microbial phytase on energy availability, and lipid and protein deposition in growing swine, 2053
Effects of feeding supplemental fat to beef cows on cold tolerance in newborn calves, 885

Evaluating processing temperature and feeding value of extruded-expelled soybean meal on nursery and finishing pig growth performance, 2032
Fat analysis of feedstuffs challenges with fats and fatty acid methods, 3250
Glucose clearance in grazing mares is affected by diet, pregnancy, and lactation, 1764
Leptin as a predictor of carcass composition in beef cattle, 1
Leptin, Tumor Necrosis Factor-α (TNF), and CD14 in Ovine Adipose Tissue and Changes in Circulating TNF in Lean and Fat Sheep, 2590
Fattening Performance
Effects of live cultures of *Lactobacillus acidophilus* (strains NP45 and NP51) and *Propionibacterium freudenreichii* on performance, carcass, and intestinal characteristics, and *Escherichia coli* strain O157 shedding of finishing beef steers, 2686
Fatty Acid Metabolism
Porcine leptin inhibits protein breakdown and stimulates fatty acid oxidation in C_2C_{12} myotubes, 3046
Fatty Acids
Effect of a high-linolenic acid diet on lipogenic enzyme activities, fatty acid composition, and meat quality in the growing pig, 1967
Effect of dietary fat sources on systemic and intrauterine synthesis of prostaglandins during early pregnancy in gilts, 726
Fat analysis of feedstuffs challenges with fats and fatty acid methods, 3250
Hydrogenated dietary fat improves pork quality of pigs from two lean genotypes, 1989
Relationship Between Body Weight and Level of Fat Supplementation on Fatty Acid Digestion in Feedlot Cattle, 2653
Fatty Acid Synthase
Dietary fat has minimal effects on fatty acid metabolism transcript concentrations in pigs, 423
Feather Meal
Effect of feather meal on live animal performance and carcass quality and composition of growing-finishing swine, 172
Feces
Nutrient digestibilities, microbial populations, and protein catabolites as affected by fructan supplementation of dog diets, 2008
Feed Additives
Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Feed Efficiency
Evaluation of the South African Dorper as a terminal sire breed for growth, carcass, and palatability characteristics, 368
Feeding
Large round bale feeder design affects hay utilization and beef cow behavior, 109
Feeding Behavior
Changes in single unit activity in the lateral hypothalamic area of goats during feeding, 529
Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
Liquid supplement and forage intake by range beef cows, 294
Feed Intake
Comparison of three techniques for estimating the forage intake of lactating dairy cows on pasture, 2357
Controlling variation in feed intake through bunk management, 133
Economic weights for feed intake in the growing pig derived from a growth model and an economic model, 895
Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
Effects of dietary fermentable carbohydrates on behavior and heat production in group-housed sows, 182
Effects of dietary fiber on performance of multiparous lactating sows in a tropical climate, 717
Effects of live cultures of *Lactobacillus acidophilus* (strains NP45 and NP51) and *Propionibacterium freudenreichii* on performance, carcass, and intestinal characteristics, and *Escherichia coli* strain O157 shedding of finishing beef steers, 2686
Environmental stress in confined beef cattle, 110
Impact of energy intake and pregnancy status on rate and efficiency of gain and backfat changes of sows postweaning, 209
Interaction between bunk management and monensin concentration on finishing performance, feeding behavior, and ruminal metabolism during an acidosis challenge with feedlot cattle, 2869
Reducing the cost of beef production through genetic improvement in residual feed intake: Opportunity and challenges to application, 9
The importance of a high feed intake during lactation of primiparous sows nursing large litters, 594
Feedlots
Controlling variation in feed intake through bunk management, 133
Corn processing method in finishing diets containing wet corn gluten feed, 3182
Effect of source of energy and rate of growth on performance, carcass characteristics, ruminal fermentation, and serum glucose and insulin of early-weaned steers, 843
Effects of moisture, roller setting, and saponin-based surfactant on barley processing, ruminal degradation of barley, and growth performance by feedlot steers, 2145
Interaction between bunk management and monensin concentration on finishing performance, feeding behavior, and ruminal metabolism during an acidosis challenge with feedlot cattle, 2869
Strategies to reduce feedlot cattle heat stress: Effects on tympanic temperature, 649
Feed Mixing
Variability in mixing efficiency and laboratory analyses of a common diet mixed at 25 experiment stations, 484
Feeds
A survey of methods of analysis for minerals in feedstuffs, 3218
Challenges in measuring moisture content of feeds, 3255
Detection of corn intrinsic and recombinant DNA fragments and Cry1Ab protein in the gastrointestinal contents of pigs fed genetically modified corn Bt11, 2546
Feed Troughs
Effect of restricted postweaning growth resulting from reduced floor and feeder-trough space on pig growth performance to slaughter weight in a wean-to-finish production system, 836
Fermentation
Diet and procedures used to detach particle-associated microbes from ruminal digesta influence chemical composition of microbes and estimation of microbial growth in Rusitec fermenters, 537
Dietary galactooligosaccharides affect ileal and total tract nutrient digestibility, ileal and fecal bacterial concentrations, and ileal fermentative characteristics of growing pigs, 2535
Influence of fibrolytic enzymes on the hydrolysis and fermentation of pure cellulose and xylan by mixed ruminal microorganisma in vitro, 1040
Influence of steam-peeled potato-processing waste inclusion level in beef finishing diets: Effects on digestion, feedlot performance, and meat quality, 2675
In vitro fermentation characteristics of selected oligosaccharides by swine fecal microflora, 2505
Fermented Foods
Fermented and nonfermented liquid feed to growing pigs—Effect on aspects of gastrointestinal ecology and growth performance, 2019
Fertility
Duration of Lactation, Endocrine and Metabolic State, and Fertility of Primiparous Sows, 2088
Fertility assessment through heterospermic insemination of flow-sorted sperm in cattle, 1814
Genetic relationships between scrotal circumference and female reproductive traits, 395
Influence of body condition at calving and postpartum nutrition on endocrine function and reproductive performance of primiparous beef cows, 3107
Resynchronization of estrus in cattle of unknown pregnancy status using estrogen, progesterone, or both, 1681
Fertilization
Effect of boar exposure at time of insemination on factors influencing fertility in gilts, 9
Effect of soil type and fertilization level on mineral concentration of pasture: Potential relationships to ruminant performance and health, 1603
Festuca
Domperidone can ameliorate deleterious reproductive effects and reduced weight gain associated with fescue toxicosis in heifers, 2568
Sleep time following anesthesia in mouse lines selected for resistance or susceptibility to fescue toxicosis, 2562

Festuca arundinacea
Characterization of season and sampling method effects on measurement of forage quality in fescue-based pastures, 1308
Effects of feeding ergovaline on lamb performance in a heat stress environment, 1538
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in sheep, 1316
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in stocker cattle, 2856
Fetal Development
Relationships between uterine and fetal traits in rabbits selected on uterine capacity, 1265
Fetus
Relationships between uterine and fetal traits in rabbits selected on uterine capacity, 1265
The effect of breed and intrauterine crowding on fetal erythropoiesis on day 35 of gestation in swine, 2352
Fiber Analysis
Challenges in measuring insoluble dietary fiber, 3233
Fiber
Challenges with nonfiber carbohydrate methods, 3226
Effects of Adding Fiber Sources to Reduced-Crude Protein, Amino Acid-Supplemented Diets on Nitrogen Excretion, Growth Performance, and Carcass Traits of Finishing Pigs, 492
Effects of dietary fiber on performance of multiparous lactating sows in a tropical climate, 717
Effects of roughage source and level on intake by feedlot cattle, 8
Performance of sows fed high levels of nonstarch polysaccharides during gestation and lactation over three parities, 2247
Screening of exogenous enzymes for ruminant diets: Relationship between biochemical characteristics and in vitro ruminal degradation, 2628
Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Finishing
Effectiveness of short-term feeding strategies for altering conjugated linoleic acid content of beef, 1862
Effect of feeding glyphosate-tolerant (Roundup-Ready events GA21 or nk603) corn compared with reference hybrids on feedlot steer performance and carcass characteristics, 2600
Effect of group size on performance of growing-finishing pigs, 874
Influence of steam-peeled potato-processing waste inclusion level in beef finishing diets: Effects on digestion, feedlot performance, and meat quality, 2675
Performance of finishing pigs in hoop structures and confinement during winter and summer, 1663
Wet corn gluten feed and alfalfa hay combinations in steam-flaked corn finishing cattle diets, 3121
Finishing Pigs
Evaluating processing temperature and feeding value of extruded-expelled soybean meal on nursery and finishing pig growth performance, 2032
Fish Meal
Effect of fish meal supplementation on plasma and endometrial fatty acid composition in nonlactating beef cows, 2840
Fish Oil
Effects of fish oil supplementation on the performance and the immunological, adrenal, and somatotropic responses of weaned pigs after an *Escherichia coli* lipopolysaccharide challenge, 2758
Flaking
Wet corn gluten feed and alfalfa hay combinations in steam-flaked corn finishing cattle diets, 3121
Flaxseed
Effects of flax supplementation and a combined trenbolone acetate and estradiol implant on circulating insulin-like growth factor-I and muscle insulin-like growth factor-I messenger RNA levels in beef cattle, 3028
Floor Space
Effect of restricted postweaning growth resulting from reduced floor and feeder-trough space on pig growth performance to slaughter weight in a wean-to-finish production system, 836
Impact of early postweaning growth rate as affected by diet complexity and space allocation on subsequent growth performance of pigs in a wean-to-finish production system, 353
The growth performance of the progeny of two swine sire lines reared under different floor space allowances, 1126
Folic Acid
Plasma reduced folates, reproductive performance, and conceptus development in sows in response to supplementation with oxidized and reduced sources of folic acid, 735
Follicles
Domperidone can ameliorate deleterious reproductive effects and reduced weight gain associated with fescue toxicosis in heifers, 2568
Insulin-like growth factor binding proteins in granulosa and thecal cells from bovine ovarian follicles at different stages of development, 2826
The effects of varying the interval from follicular wave emergence to progestin withdrawal on follicular dynamics and the synchrony of estrus in beef cattle, 1562
Follicle-Stimulating Hormone
Influence of estradiol, progesterone, and nutrition on concentrations of gonadotropins and GnRH receptors, and abundance of mRNA for GnRH receptors and gonadotropin subunits in pituitary glands of beef cows, 269
Plasma gonadotropins and ovarian hormones during the estrous cycle in high compared to low ovulation rate gilts, 249
Follicular Development
Insulin-like growth factor binding proteins in granulosa and thecal cells from bovine ovarian follicles at different stages of development, 2826
Follicular Fluid
Effect of capacitation of stallion sperm with polyvinylalcohol or bovine serum albumin on penetration of bovine zona-free or partially zona-removed equine oocytes, 2080
Foodborne Diseases
Preslaughter intervention strategies to reduce food-borne pathogens in food animals, 17
Food Preferences
Grazing of spotted locoweed (*Astragalus lentiginosus* by cattle and horses in Arizona, 2285
Forages
Effectiveness of short-term feeding strategies for altering conjugated linoleic acid content of beef, 1862
Effects of supplementary selenium source on the performance and blood measurements in beef cows and their calves, 856
Stock-piled forage or limit-fed corn as alternatives to hay for gestating and lactating beef cows, 1099
Tannins for suppression of internal parasites, 102
Technology to complement forage-based beef production systems in the West, 18
Foraging
Effects of supplemental energy and/or degradable intake protein on performance, grazing behavior, intake, digestibility, and fecal and blood indices by beef steers grazed on dormant native tallgrass prairie, 304
Fructans
A dose-response experiment evaluating the effects of oligofructose and inulin on nutrient digestibility, stool quality, and fecal protein catabolites in healthy adult dogs, 3057
Nutrient digestibilities, microbial populations, and protein catabolites as affected by fructan supplementation of dog diets, 2008
Fumaric Acid
Response of early weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, zinc oxide, fumaric acid, or antibiotic, 1790
Fursaric Acid
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on feed intake, serum chemistry, and hematology of horses, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2123
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on growth and immunological measurements of starter pigs, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2792
Fusarium
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on feed intake, serum chemistry, and hematology of horses, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2123
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on growth and immunological measure-

ments of starter pigs, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2792

G

Gain Efficiency
A dose-response study of melengestrol acetate on feedlot performance and carcass characteristics of beef steers, 2699
Gametes
Estimation of Variances for Gametic Effects on Litter Size in Yorkshire and Landrace Swine, 2171
Gas Chromatography
Fat analysis of feedstuffs challenges with fats and fatty acid methods, 3250
Gene Expression
A mixture model-based cluster analysis of DNA microarray gene expression data on Brahman and Brahman composite steers fed high-, medium-, and low-quality diets, 1900
Complementary DNA macroarray analyses of differential gene expression in porcine fetal and postnatal muscle, 2179
Effects of *DGAT1* variants on milk production traits in German cattle breeds, 1911
Expression of the uterine Mx protein in cyclic and pregnant cows, gilts, and mares, 1552
Recent Advances that Impact Skeletal Muscle Growth and Development Research, 1
Gene Mapping
Detection of quantitative trait loci for fat androstenone levels in pigs, 385
Effects of *DGAT1* variants on milk production traits in German cattle breeds, 1911
Genes
Association of single nucleotide polymorphisms in the growth hormone and growth hormone receptor genes with blood serum insulin-like growth factor I concentration and growth traits in Angus cattle, 641
Genetic Analysis
Genetic evaluation of growth in Nellore cattle by multiple-trait and random regression models, 927
Genetic Correlation
Estimates of genetic parameters and genetic change for reproduction, weight, and wool characteristics of Targhee sheep, 630
Reducing the cost of beef production through genetic improvement in residual feed intake: Opportunity and challenges to application, 9
Genetic Engineering
Consumer attitudes toward biotechnology: Lessons for animal-related applications, 196
Genetic-Environment Interaction
Models with nuclear, cytoplasmic, and environmental effects for production traits of Columbia sheep, 1926
Genetic Gain
Expected increases in genetic merit from using optimized contributions in two livestock populations of beef cattle and sheep, 2964
Genetic evaluation of an index of birth weight and yearling weight to improve efficiency of beef production, 2425
Genetic Improvement
Genomic and computing strategies in the optimization of the genetic component of specification beef, 24
Risk-adjusted expected return for selection decisions, 2984
Genetic Markers
Detection of quantitative trait loci for growth and carcass composition in cattle, 2976
Evaluation of *melatonin receptor la* as a candidate gene influencing reproduction in an autumn-lambing sheep flock, 912
Genetic Parameters
Analyses of growth curves of Nellore cattle by multiple-trait and random regression models, 918
Estimated genetic parameters for palatability traits of steaks from Brahman cattle, 54
Genetic Parameter Estimates for Serum Insulin-Like Growth Factor-I Concentration and Ultrasound Measurements of Backfat Thickness and Longissimus Muscle Area in Angus Beef Cattle, 2164
Genetic parameters and trends for litter traits in U.S. Yorkshire, Duroc, Hampshire, and Landrace pigs, 46
Genetic parameters for carcass traits and their live animal indicators in Simmental cattle, 1427
Results from nine generations of selection for increased litter size in swine, 624
The impact of data structure on genetic (co)variance components of early growth in sheep, estimated using an animal model with maternal effects, 101
Genetics
Bioeconomic evaluation of sow longevity and profitability, 2915
Genetic Selection
Technology to complement forage-based beef production systems in the West, 18
Genetic Trend
Genetic parameters and trends for litter traits in U.S. Yorkshire, Duroc, Hampshire, and Landrace pigs, 46
Results from nine generations of selection for increased litter size in swine, 624
Genetic Variance
Models with cytoplasmic effects for birth, weaning, and fleece weights, and litter size at birth for a population of Targhee sheep, 61
Genetic Variation
Design and standards for genetic evaluation of swine seedstock populations, 2409
Genetic parameters for within-litter variation in piglet birth weight and change in within-litter variation during suckling, 604
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Models with nuclear, cytoplasmic, and environmental effects for production traits of Columbia sheep, 1926
Mortality of Creole kids during infection with gastrointestinal strongyles: A survival analysis, 2401
Genome Analysis
Genomic and computing strategies in the optimization of the genetic component of specification beef, 24
The history of energetic efficiency research: Where have we been and where are we going?, 27
Genomes
Full pedigree quantitative trait locus analysis in commercial pigs using variance components, 2155
Quantitative trait locus detection in commercial broiler lines using candidate regions, 1158
Genotypes
Characterization of pig genotypes for growth modeling, 187
Fertility assessment through heterospermic insemination of flow-sorted sperm in cattle, 1814
Growth performance, dry matter and nitrogen digestibilities, serum profile, and carcass and meat quality of pigs with distinct g, 1142
Lipogenic enzyme activities in different adipose depots of Pirenaican and Holstein bulls and heifers taking into account adipocyte size, 432
Models with cytoplasmic effects for birth, weaning, and fleece weights, and litter size at birth for a population of Targhee sheep, 61
Rendement Napole gene effects and a comparison of glycolytic potential and DNA genotyping for classification of Rendement Napole status in Hampshire-sired pigs, 402
Gestation
Performance of sows fed high levels of nonstarch polysaccharides during gestation and lactation over three parities, 2247
Gilts
Effect of boar exposure at time of insemination on factors influencing fertility in gilts, 9
Progesterone increases susceptibility of gilts to uterine infections after intrauterine inoculation with infectious bacteria, 1242
Globalization
Internationalization of the Animal Science undergraduate curriculum: A survey of its current status, barriers to its implementation and its value, 1088
Glucocorticoids
Dexamethasone and colostrum feeding differently affect hepatic gluconeogenic enzymes in neonatal calves, 3095
Gluconeogenesis
Dexamethasone and colostrum feeding differently affect hepatic gluconeogenic enzymes in neonatal calves, 3095
Glucose
Ionophores have limited effects on jejunal glucose absorption and energy metabolism in mice, 2072

Obesity and diet affect glucose dynamics and insulin sensitivity in Thoroughbred geldings, 2333
Relationships between longissimus glycolytic potential and swine growth performance, carcass traits, and pork quality, 2206
Glucose Tolerance
Obesity and diet affect glucose dynamics and insulin sensitivity in Thoroughbred geldings, 2333
Glucose Tolerance Test
Glucose clearance in grazing mares is affected by diet, pregnancy, and lactation, 1764
Glutamates
Content of ileal EAAC1 and hepatic GLT-1 high-affinity glutamate transporters is increased in growing vs. nongrowing lambs, paralleling increased tissue D- L-glutamate, plasma glutamine, and alanine concentrations, 1030
Glutathione Peroxidase
Effects of supplementary selenium source on the performance and blood measurements in beef cows and their calves, 856
Glycogen
Dietary manipulation of pro- and macroglycogen in porcine skeletal muscle, 130
Relationships between longissimus glycolytic potential and swine growth performance, carcass traits, and pork quality, 2206
Glycolysis
Dietary manipulation of pro- and macroglycogen in porcine skeletal muscle, 130
Prerigor injection using glycolytic inhibitors in low-quality beef muscles, 997
GnRH
Aggressive behavior is reduced in bulls actively immunized against gonadotropin-releasing hormone, 411
Supplemental norgestomet, progesterone, or melengestrol acetate increases pregnancy rates in suckled beef cows after timed inseminations, 571
Goats
Changes in single unit activity in the lateral hypothalamic area of goats during feeding , 529
Effects of prolactin administered to a perfused area of the skin of Angora goats, 279
Endocrine, blood metabolite, and meat quality changes in goats as influenced by short-term, preslaughter stress, 1499
Mortality of Creole kids during infection with gastrointestinal strongyles: A survival analysis, 2401
Gonadotropin-Releasing Hormone
Effects of deslorelin acetate implants in horses: Single implants in stallions and steroid-treated geldings and multiple implants in mares, 1300
Synchronization of *Bos indicus* × *Bos taurus* cows for timed artificial insemination using gonadotropin-releasing hormone plus prostaglandin $F_{2\alpha}$ in combination with melengestrol acetate, 830
The effects of varying the interval from follicular wave emergence to progestin withdrawal on follicular dynamics and the synchrony of estrus in beef cattle, 1562
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Use of insulin-like growth factor-I during embryo culture and treatment of recipients with gonadotropin-releasing hormone to increase pregnancy rates following the transfer of in vitro-produced embryos to heat-stressed, lactating cows, 1590
Gonadotropins
A gonadotropin-releasing factor vaccine (Improvac) and porcine somatotropin have synergistic and additive effects on growth performance in group-housed boars and gilts, 1959
Effects of deslorelin acetate implants in horses: Single implants in stallions and steroid-treated geldings and multiple implants in mares, 1300
Grading
Beef customer satisfaction: Trained sensory panel ratings and Warner-Bratzler shear force values, 143
Grain
Effect of grain processing and silage on microbial protein synthesis and nutrient digestibility in beef cattle fed barley-based diets, 1057
Granulosa Cells
Insulin-like growth factor binding proteins in granulosa and thecal cells from bovine ovarian follicles at different stages of development, 2826
Grazing Behavior
Grazing of spotted locoweed (*Astragalus lentiginosus* by cattle and horses in Arizona, 2285
Grazing
Effect of soil type and fertilization level on mineral concentration of pasture: Potential relationships to ruminant performance and health, 1603
Undegradable intake protein supplementation of compensating spring-born steers and summer-born steers during summer grazing, 791
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in sheep, 1316
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in stocker cattle, 2856
Ground Beef
Effects of postexsanguination vascular infusion of carcasses with calcium chloride or a solution of saccharides, sodium chloride, and phosphates on beef display-color stability, 669
Group Size
Effect of group size on performance of growing-finishing pigs, 874
Growing-Finishing Pigs
Influence of dietary protein level, amino acid supplementation, and dietary energy levels on growing-finishing pig performance and carcass composition, 3075
Growth
Association of single nucleotide polymorphisms in the growth hormone and growth hormone receptor genes with blood serum insulin-like growth factor I concentration and growth traits in Angus cattle, 641
Characterization of pig genotypes for growth modeling, 187
Content of ileal EAAC1 and hepatic GLT-1 high-affinity glutamate transporters is increased in growing vs. nongrowing lambs, paralleling increased tissue D- L-glutamate, plasma glutamine, and alanine concentrations, 1030
Detection of quantitative trait loci for growth and beef carcass fatness traits in a cross between *Bos taurus* (Angus) and *Bos indicus* (Brahman) cattle, 1933
Development of a model to describe the compositional growth and dietary lysine requirements of pigs fed ractopamine, 1106
Direct and correlated responses to selection for yearling weight on reproductive performance of Nelore cows, 376
Effect of carbohydrate source on growth performance, carcass traits, and meat quality of growing-finishing pigs, 2488
Effect of feather meal on live animal performance and carcass quality and composition of growing-finishing swine, 172
Effect of group size on performance of growing-finishing pigs, 874
Effect of Irradiation of Individual Feed Ingredients and the Complete Diet on Nursery Pig Performance, 1799
Effect of mannan oligosaccharides on growth performance of weanling pigs, 2482
Effect of microbial phytase on energy availability, and lipid and protein deposition in growing swine, 2053
Effect of restricted postweaning growth resulting from reduced floor and feeder-trough space on pig growth performance to slaughter weight in a wean-to-finish production system, 836
Effect of spray-dried bovine serum on intake, health, and growth of broilers housed in different environments, 2776
Effects of increasing dietary L-carnitine on growth performance of weanling pigs, 2259
Effects of moisture, roller setting, and saponin-based surfactant on barley processing, ruminal degradation of barley, and growth performance by feedlot steers, 2145
Effects of organic forms of zinc on growth performance, tissue zinc distribution, and immune response of weanling pigs, 2063
Estimates of genetic parameters and selection strategies to improve the economic efficiency of postweaning growth in lambs, 2704
Fenceline contact of beef calves with their dams at weaning reduces the negative effects of separation on behavior and growth rate, 116
Fermented and nonfermented liquid feed to growing pigs—Effect on aspects of gastrointestinal ecology and growth performance, 2019
Growth performance, nutrient digestibility, and fecal microflora in weanling pigs fed live yeast, 1004
Impact of early postweaning growth rate as affected by diet complexity and space allocation on subsequent growth performance of pigs in a wean-to-finish production system, 353

Increased maternal nutrition of sows has no beneficial effects on muscle fiber number or postnatal growth and has no impact on the meat quality of the offspring, 3018
Influence of litter size and creep feeding on preweaning gain and influence of preweaning growth on growth to slaughter in barrows, 2434
Influences of dietary protein level, amino acid supplementation and environmental temperature on performance, body composition, organ weights and total heat production of growing pigs, 1998
Isoleucine requirement of growing (25 to 45 kg) pigs, 745
Maternal grandsire, granddam, and sire breed effects on growth and carcass traits of crossbred cattle, 904
Modeling homeorhetic and homeostatic controls of pig growth, 683
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Predicting the consequences of social stressors on pig food intake and performance, 2995
Quantitative trait loci analysis for growth and carcass traits in a Meishan × Duroc F2 resource population, 2938
Serum urea concentration as a predictor of dietary lysine requirement in selected lines of pigs, 91
Stereoselectivity of porcine β-adrenergic receptors for ractopamine stereoisomers, 122
The effect of pregnancy on visceral growth and energy use in beef heifers, 1853
The growth performance of the progeny of two swine sire lines reared under different floor space allowances, 1126
The impact of data structure on genetic (co)variance components of early growth in sheep, estimated using an animal model with maternal effects, 101
The ontogeny of the somatotropic axis in male and female Hereford calves from birth to one year of age, 2811
Growth Factors
Insulin-like growth factor binding proteins in granulosa and thecal cells from bovine ovarian follicles at different stages of development, 2826
Growth Implants
Effects of growth implants on consumer perceptions of meat tenderness in beef steers, 3052
Growth, Lambs
Synchrony of nutrient supply to the rumen and dietary energy source and their effects on the growth and metabolism of lambs, 1332
Growth Models
An evaluation of the NRC (1998) growth model in estimating lysine requirements of barrows with a lean growth rate of 348 g/d, 1772
Economic weights for feed intake in the growing pig derived from a growth model and an economic model, 895
Modeling chemical and physical body composition of the growing pig, 159
Growth Promoters
Effect of repeated administration of combination trenbolone acetate and estradiol implants on growth, carcass traits, and beef quality of long-fed Holstein steers, 2395
Effects of repetitive use of hormonal implants on beef carcass quality, tenderness, and consumer ratings of beef palatability, 984
Estradiol plus progesterone treatment modulates select elements of the proinflammatory cytokine cascade in steers: Attenuated nitric oxide and thromboxane B_2 production in endotoxemia, 1546
Growth factor messenger RNA levels in muscle and liver of steroid-implanted and nonimplanted steers, 965
Growth Rate
Evaluation of strategies for selection for lean growth rate in pigs, 1150
Growth performance, dry matter and nitrogen digestibilities, serum profile, and carcass and meat quality of pigs with distinct g, 1142

H

Hair
Evidence of a major gene influencing hair length and heat tolerance in *Bos taurus* cattle, 80
Hams
Effect of age at slaughter on carcass traits and meat quality of Italian heavy pigs, 2448
Effect of conjugated linoleic acid on meat quality, lipid metabolism, and sensory characteristics of dry-cured hams from heavy pigs, 2219
Handling
The effects of ractopamine on the behavior and physiology of finishing pigs, 416
Health
Effect of soil type and fertilization level on mineral concentration of pasture: Potential relationships to ruminant performance and health, 1603
Heart Rate
The effects of ractopamine on the behavior and physiology of finishing pigs, 416
Heat
A laser-based method to measure thermal nociception in dairy cows: Short-term repeatability and effects of power output and skin condition, 945
Heat Production
Effects of two different dietary fermentable carbohydrates on activity and heat production in group-housed pigs, 1210
Influences of dietary protein level, amino acid supplementation and environmental temperature on performance, body composition, organ weights and total heat production of growing pigs, 1998
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Relationship between aging and nutritionally controlled growth rate on heat production of heifers, 1847
Heat Stress
Early weaning to reduce tissue mobilization in lactating sows and milk supplementation to enhance pig weaning weight during extreme heat stress, 2041
Strategies to reduce feedlot cattle heat stress: Effects on tympanic temperature, 649
Use of insulin-like growth factor-I during embryo culture and treatment of recipients with gonadotropin-releasing hormone to increase pregnancy rates following the transfer of in vitro-produced embryos to heat-stressed, lactating cows, 1590
Heat Tolerance
Evidence of a major gene influencing hair length and heat tolerance in *Bos taurus* cattle, 80
Heifers
Effect of supplemental nutrient source on heifer growth and reproductive performance, and on utilization of corn silage-based diets by beef steers, 2367
Effects of growth hormone and feeding level on endocrine measurements, hormone receptors, muscle growth and performance of prepubertal heifers, 2189
Estimated copper requirement of Angus and Simmental heifers, 865
Nitrogen metabolism and recycling in Holstein heifers, 545
Relationship between aging and nutritionally controlled growth rate on heat production of heifers, 1847
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: II. Pregnancy and economics, 563
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: I. Performance, forage intake, and nutrient balance, 800
Height
Investigation of breeding strategies to increase the probability that German shepherd dog and Labrador retriever dog guides would attain optimum size, 2950
The effect of stimulus height on visual discrimination in horses, 1715
Hemicelluloses
Effects of urea infusion and ruminal degradable protein concentration on microbial growth, digestibility, and fermentation in continuous culture, 329
Hemoglobin
Erythropoiesis regulation during the development of ascites syndrome in broiler chickens: A possible role of corticosterone, 784
Herbage
Comparison of three techniques for estimating the forage intake of lactating dairy cows on pasture, 2357

Heritability
A comparison via simulation of least squares Lehmann-Scheffé estimators of two variances and heritability with those of restricted maximum likelihood, 1950
Discrete time survival analysis of lamb mortality in a terminal sire composite population, 1399
Estimates of genetic parameters and genetic change for reproduction, weight, and wool characteristics of Targhee sheep, 630
Estimation of genetic parameters for ultrasound-predicted percentage of intramuscular fat in Angus cattle using random regression models, 35
Genetic parameters for within-litter variation in piglet birth weight and change in within-litter variation during suckling, 604
Genetic relationships between scrotal circumference and female reproductive traits, 395
Length of docked tail and the incidence of rectal prolapse in lambs, 2725
Models with nuclear, cytoplasmic, and environmental effects for production traits of Columbia sheep, 1926
Reducing the cost of beef production through genetic improvement in residual feed intake: Opportunity and challenges to application, 9
Hind Limb
Ryegrass-based and barley supplementation: Partition of nitrogenous nutrients among splanchnic tissues and hind limb in finishing lambs, 3160
Histidine
Growth, carcass traits, and plasma amino acid concentrations of gilts fed low-protein diets supplemented with amino acids including histidine, isoleucine, and valine, 1529
Histology
Characterization and consumer acceptance of three muscles from Hampshire × Rambouillet cross sheep expressing the callipyge phenotype, 2213
Holstein
Effect of repeated administration of combination trenbolone acetate and estradiol implants on growth, carcass traits, and beef quality of long-fed Holstein steers, 2395
Homeostasis
Modeling homeorhetic and homeostatic controls of pig growth, 683
Hormones
Influence of substrate and/or neurohormonal mimic on in vitro pancreatic enzyme release from calves postruminally infused with partially hydrolyzed starch and/or casein, 1323
Horses
Circadian variation in biochemical markers of bone cell activity and insulin-like growth factor-I in two-year-old horses, 2804
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on feed intake, serum chemistry, and hematology of horses, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2123
Endocrine responses in mares and geldings with high body condition scores grouped by high vs. low resting leptin concentrations, 2311
Expression of the uterine Mx protein in cyclic and pregnant cows, gilts, and mares, 1552
Obesity and diet affect glucose dynamics and insulin sensitivity in Thoroughbred geldings, 2333
The Effect of Dietary Energy Source on Serum Concentration of Insulin-like Growth Factor-I, Growth Hormone, Insulin, Glucose, and Fat Metabolites in Weanling Horses, 1581
The effect of stimulus height on visual discrimination in horses, 1715
Thyrotropin releasing hormone interactions with growth hormone secretion in horses, 2343
Hydrocortisone
Dehydration in stressed ruminants may be the result of a cortisol-induced diuresis, 512
Hydrogenated Fats
Hydrogenated dietary fat improves pork quality of pigs from two lean genotypes, 1989
Hydrogenation
Biohydrogenation of unsaturated fatty acids in continuous culture fermenters during digestion of orchardgrass or red clover with three levels of ground corn supplementation, 1611
Effectiveness of short-term feeding strategies for altering conjugated linoleic acid content of beef, 1862
Hydrogen Ions
A comparison of hydrogen ion concentration and pH genetic predictions and fixed effect estimations when assessing pork quality, 611
Hypothalamus
Changes in single unit activity in the lateral hypothalamic area of goats during feeding , 529

I

Ileum
Effect of soybean meal particle size on amino acid and energy digestibility in grower-finisher swine, 697
Use of carbohydrases in corn–soybean meal-based nursery diets, 2496
Image Analysis
An evaluation of the lamb vision system as a predictor of lamb carcass red meat yield percentage, 1488
Real-time augmentation of USDA yield grade application to beef carcasses using video image analysis, 2239
Image Processing
Comparison of different methods to assess the composition of pig bellies in progeny testing, 1177
Immune Response
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on growth and immunological measurements of starter pigs, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2792
Effects of organic forms of zinc on growth performance, tissue zinc distribution, and immune response of weanling pigs, 2063
Immunity
The effect of abrupt weaning of suckler calves on the plasma concentrations of cortisol, catecholamines, leukocytes, acute-phase proteins and in vitro interferon-gamma production, 2847
Immunization
Aggressive behavior is reduced in bulls actively immunized against gonadotropin-releasing hormone, 411
Immunosuppression
Role of ovarian progesterone and potential role of prostaglandin $F_{2\alpha}$ and prostaglandin E_2 in modulating the uterine response to infectious bacteria in postpartum ewes, 285
Implant
Effects of implant regimens (trenbolone acetate-estradiol administered alone or in combination with zeranol) and vitamin D_3 on fresh beef color and quality, 135
Time course of changes in growth factor mRNA levels in muscle of steroid-implanted and nonimplanted steers, 2733
Imprinting
Estimation of Variances for Gametic Effects on Litter Size in Yorkshire and Landrace Swine, 2171
Inbreeding
Expected increases in genetic merit from using optimized contributions in two livestock populations of beef cattle and sheep, 2964
Infections
Progesterone increases susceptibility of gilts to uterine infections after intrauterine inoculation with infectious bacteria, 1242
Role of ovarian progesterone and potential role of prostaglandin $F_{2\alpha}$ and prostaglandin E_2 in modulating the uterine response to infectious bacteria in postpartum ewes, 285
Inflammation
Effect of boron supplementation of pig diets on the production of tumor necrosis factor-α and interferon-γ, 2552
Infusion
Effects of postexsanguination vascular infusion of carcasses with calcium chloride or a solution of saccharides, sodium chloride, and phosphates on beef display-color stability, 669
Effects of postexsanguination vascular infusion of cattle with a solution of saccharides, sodium chloride, and phosphates or with calcium chloride on quality and sensory traits of steaks and ground beef, 156
Effects of volatile fatty acid supply on their absorption and on water kinetics in the rumen of sheep sustained by intragastric infusions, 2609
Ingredients
Effect of Irradiation of Individual Feed Ingredients and the Complete Diet on Nursery Pig Performance, 1799

Inhibin
Plasma gonadotropins and ovarian hormones during the estrous cycle in high compared to low ovulation rate gilts, 249
Inhibitors
Prerigor injection using glycolytic inhibitors in low-quality beef muscles, 997
Insemination
Fertility assessment through heterospermic insemination of flow-sorted sperm in cattle, 1814
Instrumentation
Accuracy and repeatability of beef carcass longissimus muscle area measurements, 1980
Evaluation of the E+V video image analysis system as a predictor of pork carcass meat yield, 1193
On-line prediction of yield grade, longissimus muscle area, preliminary yield grade, adjusted preliminary yield grade, and marbling score using the MARC beef carcass image analysis system, 150
Insulation
Fender design and insulation of farrowing huts: effects on performance of outdoor sows and piglets, 955
Insulin
Effect of source of energy and rate of growth on performance, carcass characteristics, ruminal fermentation, and serum glucose and insulin of early-weaned steers, 843
Endocrine responses in mares and geldings with high body condition scores grouped by high vs. low resting leptin concentrations, 2311
Obesity and diet affect glucose dynamics and insulin sensitivity in Thoroughbred geldings, 2333
Insulin-Like Growth Factor
Abundance of message for insulin-like growth factors-I and -II and for receptors for growth hormone, insulin-like growth factors-I and -II, and insulin in the intestine and liver of pre- and full-term calves, 2294
Association of single nucleotide polymorphisms in the growth hormone and growth hormone receptor genes with blood serum insulin-like growth factor I concentration and growth traits in Angus cattle, 641
Circadian variation in biochemical markers of bone cell activity and insulin-like growth factor-I in two-year-old horses, 2804
Effect of photoperiod on hepatic growth hormone receptor 1A expression in steer calves, 1440
Effects of antimicrobials and weaning on porcine serum insulin-like growth factor binding protein levels, 1456
Effects of growth hormone and feeding level on endocrine measurements, hormone receptors, muscle growth and performance of prepubertal heifers, 2189
Effects of lasalocid on circulating concentrations of leptin and insulin-like growth factor-I and reproductive performance of postpartum Brahman cows, 1363
Effects of plasmid-mediated growth hormone releasing hormone supplementation in young, healthy Beagle dogs, 2301
Effects of protein deprivation on subsequent growth performance, gain of body components, and protein requirements in growing pigs, 705
Genetic Parameter Estimates for Serum Insulin-Like Growth Factor-I Concentration and Ultrasound Measurements of Backfat Thickness and Longissimus Muscle Area in Angus Beef Cattle, 2164
Growth factor messenger RNA levels in muscle and liver of steroid-implanted and nonimplanted steers, 965
Influence of body condition at calving and postpartum nutrition on endocrine function and reproductive performance of primiparous beef cows, 3107
Nutritional- and suckling-mediated anovulation in beef cows, 48
The Effect of Dietary Energy Source on Serum Concentration of Insulin-like Growth Factor-I, Growth Hormone, Insulin, Glucose, and Fat Metabolites in Weanling Horses, 1581
Use of insulin-like growth factor-I during embryo culture and treatment of recipients with gonadotropin-releasing hormone to increase pregnancy rates following the transfer of in vitro-produced embryos to heat-stressed, lactating cows, 1590
Insulin-Like Growth Factor Binding Protein-2
The ontogeny of the somatotropic axis in male and female Hereford calves from birth to one year of age, 2811
Insulin-Like Growth Factor Binding Protein-3
The ontogeny of the somatotropic axis in male and female Hereford calves from birth to one year of age, 2811
Insulin-Like Growth Factor-I
Effects of flax supplementation and a combined trenbolone acetate and estradiol implant on circulating insulin-like growth factor-I and muscle insulin-like growth factor-I messenger RNA levels in beef cattle, 3028
The ontogeny of the somatotropic axis in male and female Hereford calves from birth to one year of age, 2811
Time course of changes in growth factor mRNA levels in muscle of steroid-implanted and nonimplanted steers, 2733
Intake
Effects of roughage source and level on intake by feedlot cattle, 8
Influence of milk production potential on forage dry matter intake by multiparous and primiparous Brangus females, 1837
Predicting the consequences of social stressors on pig food intake and performance, 2995
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: I. Performance, forage intake, and nutrient balance, 800
Intensification
Livestock, ethics, and quality of life, 2887
Interferon
Expression of the uterine Mx protein in cyclic and pregnant cows, gilts, and mares, 1552
Interferon-γ
Effect of ketoprofen, lidocaine local anesthesia, and combined xylazine and lidocaine caudal epidural anesthesia during castration of beef cattle on stress responses, immunity, growth, and behavior, 1281
Effect of repeated ketoprofen administration during surgical castration of bulls on cortisol, immunological function, feed intake, growth, and behavior, 1253
Intervention
Preslaughter intervention strategies to reduce food-borne pathogens in food animals, 17
Intestinal Microorganisms
Nutrient digestibilities, microbial populations, and protein catabolites as affected by fructan supplementation of dog diets, 2008
Intestinal Mucosa
Effects of live cultures of *Lactobacillus acidophilus* (strains NP45 and NP51) and *Propionibacterium freudenreichii* on performance, carcass, and intestinal characteristics, and *Escherichia coli* strain O157 shedding of finishing beef steers, 2686
Intestines
Abundance of message for insulin-like growth factors-I and -II and for receptors for growth hormone, insulin-like growth factors-I and -II, and insulin in the intestine and liver of pre- and full-term calves, 2294
Effect of fishmeal replacement with spray-dried animal plasma and colistin on intestinal structure, intestinal microbiology, and performance of weanling pigs challenged with *Escherichia coli* K99, 1220
Ionophores have limited effects on jejunal glucose absorption and energy metabolism in mice, 2072
Molecular ecological analysis of porcine ileal microbiota responses to antimicrobial growth promoters, 3035
Intramuscular Injection
The effect of vitamin E supplementation on discoloration of injection-site lesions in retail cuts and the greening reaction observed in injection-site lesions in muscles of the chuck, 1885
Inulin
A dose-response experiment evaluating the effects of oligofructose and inulin on nutrient digestibility, stool quality, and fecal protein catabolites in healthy adult dogs, 3057
In Vitro
Influence of substrate and/or neurohormonal mimic on in vitro pancreatic enzyme release from calves postruminally infused with partially hydrolyzed starch and/or casein, 1323
In vitro fermentation characteristics of selected oligosaccharides by swine fecal microflora, 2505
Involution
Quantification of mammary gland tissue size and composition changes after weaning in sows, 2583
Ionophores
Effect of feeding the ionophores monensin and laidlomycin propionate and the antimicrobial bambermycin to sheep experimentally infected with *E. coli* O157:H7 and *Salmonella typhimurium*, 553
Ionophores have limited effects on jejunal glucose absorption and energy metabolism in mice, 2072

Iron
Effects of breed (Angus vs Simmental) and copper and zinc source on mineral status of steers fed high dietary iron, 318
Relationships of testicular iron and ferritin concentrations with testicular weight and sperm production in boars, 503
Irradiation
Effect of Irradiation of Individual Feed Ingredients and the Complete Diet on Nursery Pig Performance, 1799
Effects of blood meal pH and irradiation on nursery pig performance, 1013
Isoleucine
Growth, carcass traits, and plasma amino acid concentrations of gilts fed low-protein diets supplemented with amino acids including histidine, isoleucine, and valine, 1529
Isoleucine requirement of growing (25 to 45 kg) pigs, 745

K

Ketoprofen
Effect of ketoprofen, lidocaine local anesthesia, and combined xylazine and lidocaine caudal epidural anesthesia during castration of beef cattle on stress responses, immunity, growth, and behavior, 1281
Effect of repeated ketoprofen administration during surgical castration of bulls on cortisol, immunological function, feed intake, growth, and behavior, 1253
Ketosis
The role of acidogenic diets and β-hydroxybutyate on lymphocyte proliferation and serum antibody response against bovine respiratory viruses in Holstein steers, 3088
Kinetics
Composition and digestive tract retention time of ruminal particles with functional specific gravity greater or less than 1.02, 2639
Nitrogen metabolism and recycling in Holstein heifers, 545
The tocicity and kinetics of larkspur alkaloid, methyllycaconitine, in mice, 1237
Knowledge
A Long-term Study of Knowledge, Risk and Ethics for Students Enrolled in an Introductory Biotechnology Course, 1348

L

Lactation
Duration of Lactation, Endocrine and Metabolic State, and Fertility of Primiparous Sows, 2088
Early weaning to reduce tissue mobilization in lactating sows and milk supplementation to enhance pig weaning weight during extreme heat stress, 2041
Effects of dietary electrolyte balance on the chemistry of blood and urine in lactating sows and sow litter performance, 3067
Effects of dietary fiber on performance of multiparous lactating sows in a tropical climate, 717
Efficacy of sucrose and milk chocolate product or dried porcine solubles to increase feed intake and improve performance of lactating sows, 2475
Glucose clearance in grazing mares is affected by diet, pregnancy, and lactation, 1764
Parturition body size and body protein loss during lactation influence performance during lactation and ovarian function at weaning in first-parity sows, 1517
Performance of sows fed high levels of nonstarch polysaccharides during gestation and lactation over three parities, 2247
Quantification of mammary gland tissue size and composition changes after weaning in sows, 2583
Reallocation of body resources in lactating mice highly selected for litter size, 939
Selective protein loss in lactating sows is associated with reduced litter growth and ovarian function, 753
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: I. Performance, forage intake, and nutrient balance, 800
Lactobacillus acidophilus
Effects of live cultures of Lactobacillus acidophilus (strains NP45 and NP51) and *Propionibacterium freudenreichii* on performance, carcass, and intestinal characteristics, and *Escherichia coli* strain O157 shedding of finishing beef steers, 2686
Lambs
An evaluation of the lamb vision system as a predictor of lamb carcass red meat yield percentage, 1488
Characterization and consumer acceptance of three muscles from Hampshire × Rambouillet cross sheep expressing the callipyge phenotype, 2213
Effects of feeding ergovaline on lamb performance in a heat stress environment, 1538
Effects of small ruminal boluses used for electronic identification of lambs on the growth and development of the reticulorumen, 879
Length of docked tail and the incidence of rectal prolapse in lambs, 2725
The impact of data structure on genetic (co)variance components of early growth in sheep, estimated using an animal model with maternal effects, 101
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in sheep, 1316
Laser Radiation
A laser-based method to measure thermal nociception in dairy cows: Short-term repeatability and effects of power output and skin condition, 945
L-Carnitine
Effects of increasing dietary L-carnitine on growth performance of weanling pigs, 2259
Lean
Evaluation of strategies for selection for lean growth rate in pigs, 1150
Evaluation of the E+V video image analysis system as a predictor of pork carcass meat yield, 1193
Serum urea concentration as a predictor of dietary lysine requirement in selected lines of pigs, 91
Learning
Experiential learning in the animal sciences: Development of a multispecies large animal management and production practicum, 3202
The effect of stimulus height on visual discrimination in orses, 1715
Least Squares
A comparison via simulation of least squares Lehmann-Scheffé estimators of two variances and heritability with those of restricted maximum likelihood, 1950
Full pedigree quantitative trait locus analysis in commercial pigs using variance components, 2155
Leptin
Age at puberty, total fat and conjugated linoleic acid content of carcass, and circulating metabolic hormones in beef heifers fed a diet high in linoleic acid beginning at four months of age, 261
Effects of lasalocid on circulating concentrations of leptin and insulin-like growth factor-I and reproductive performance of postpartum Brahman cows, 1363
Endocrine responses in mares and geldings with high body condition scores grouped by high vs. low resting leptin concentrations, 2311
Influence of body condition at calving and postpartum nutrition on endocrine function and reproductive performance of primiparous beef cows, 3107
Leptin as a predictor of carcass composition in beef cattle, 1
Leptin, Tumor Necrosis Factor-α (TNF), and CD14 in Ovine Adipose Tissue and Changes in Circulating TNF in Lean and Fat Sheep, 2590
Porcine leptin inhibits lipogenesis in porcine adipocytes, 3008
Porcine leptin inhibits protein breakdown and stimulates fatty acid oxidation in C_2C_{12} myotubes, 3046
Serum concentrations of leptin in six genetic lines of swine and relationship with growth and carcass characteristics, 167
Lethal Dose
Evaluation of vaccination against methyllycaconitine toxicity in mice, 232
Leydig Cells
Relationships of testicular iron and ferritin concentrations with testicular weight and sperm production in boars, 503
Libido
Use of naloxone challenge to predict sexual performance of young rams, 2111
Linear Models
A comparison via simulation of least squares Lehmann-Scheffé estimators of two variances and heritability with those of restricted maximum likelihood, 1950

Evaluation models and genetic parameters for calving difficulty in beef cattle, 933
Linkage Analysis
Quantitative trait loci analysis for growth and carcass traits in a Meishan × Duroc F2 resource population, 2938
Linkage Disequilibrium
Estimation of linkage disequilibrium in a sample of the United Kingdom dairy cattle population using unphased genotypes, 617
Linoleic Acid
Effectiveness of short-term feeding strategies for altering conjugated linoleic acid content of beef, 1862
Linseed
Effect of a high-linolenic acid diet on lipogenic enzyme activities, fatty acid composition, and meat quality in the growing pig, 1967
Lipids
Leptin as a predictor of carcass composition in beef cattle, 1
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Lipogenesis
Effect of a high-linolenic acid diet on lipogenic enzyme activities, fatty acid composition, and meat quality in the growing pig, 1967
Lipogenic enzyme activities in different adipose depots of Pirenaican and Holstein bulls and heifers taking into account adipocyte size, 432
Porcine leptin inhibits lipogenesis in porcine adipocytes, 3008
Lipoic Acid
Creatine monohydrate supplemented in swine finishing diets and fresh pork quality: III. Evaluating the cumulative effect of creatine monohydrate and alpha-lipoic acid, 2469
Lipolysis
β-Adrenergic receptor subtypes that mediate ractopamine stimulation of lipolysis, 662
Lipopolysaccharides
Central and peripheral concentrations of tumor necrosis factor-α in Chinese Meishan pigs stimulated with lipopolysaccharide, 1274
Effects of fish oil supplementation on the performance and the immunological, adrenal, and somatotropic responses of weaned pigs after an *Escherichia coli* lipopolysaccharide challenge, 2758
Leptin, Tumor Necrosis Factor-α (TNF), and CD14 in Ovine Adipose Tissue and Changes in Circulating TNF in Lean and Fat Sheep, 2590
The effect of thermal environment and spray-dried plasma on the acute-phase response of pigs challenged with lipopolysaccharide, 1166
Liquid Diets
Fermented and nonfermented liquid feed to growing pigs—Effect on aspects of gastrointestinal ecology and growth performance, 2019
Litter Performance
Parturition body size and body protein loss during lactation influence performance during lactation and ovarian function at weaning in first-parity sows, 1517
Selective protein loss in lactating sows is associated with reduced litter growth and ovarian function, 753
Litter Size
Correlated Response in Placental Efficiency in Swine Selected for an Index of Components of Litter Size, 74
Estimates of genetic parameters and genetic change for reproduction, weight, and wool characteristics of Targhee sheep, 630
Estimation of Variances for Gametic Effects on Litter Size in Yorkshire and Landrace Swine, 2171
Fine mapping a quantitative trait locus affecting ovulation rate in swine on chromosome 8, 1706
Results from nine generations of selection for increased litter size in swine, 624
The importance of a high feed intake during lactation of primiparous sows nursing large litters, 594
Litter Traits
Genetic parameters and trends for litter traits in U.S. Yorkshire, Duroc, Hampshire, and Landrace pigs, 46
Genetic parameters for within-litter variation in piglet birth weight and change in within-litter variation during suckling, 604
Liver
Abundance of message for insulin-like growth factors-I and -II and for receptors for growth hormone, insulin-like growth factors-I and -II, and insulin in the intestine and liver of pre- and full-term calves, 2294
Ryegrass-based and barley supplementation: Partition of nitrogenous nutrients among splanchnic tissues and hind limb in finishing lambs, 3160
Ryegrass-based diet and barley supplementation: Partition of energy-yielding nutrients among splanchnic tissues and hind limbs in finishing lambs, 1068
Livestock
Livestock, ethics, and quality of life, 2887
Live Weight Gain
A dose-response study of melengestrol acetate on feedlot performance and carcass characteristics of beef steers, 2699
Lolium
Ryegrass-based and barley supplementation: Partition of nitrogenous nutrients among splanchnic tissues and hind limb in finishing lambs, 3160
Ryegrass-based diet and barley supplementation: Partition of energy-yielding nutrients among splanchnic tissues and hind limbs in finishing lambs, 1068
Lolium perenne
Effect of early weaning on the performance of three-year-old, first-calf beef heifers and calves reared in the subtropics, 1136
Longissimus dorsi
Accuracy and repeatability of beef carcass longissimus muscle area measurements, 1980
Heritability of body length and measures of body density and their relationship to backfat thickness and loin muscle area in swine, 1943
Mechanical measures of uncooked beef longissimus muscle can predict sensory panel tenderness and Warner-Bratzler shear force of cooked steaks, 1721
Losses
Determination of True Digestive Utilization of Phosphorus and the Endogenous Phosphorus Outputs Associated with Soybean Meal for Growing Pigs, 2766
Luteinizing Hormone
Influence of estradiol, progesterone, and nutrition on concentrations of gonadotropins and GnRH receptors, and abundance of mRNA for GnRH receptors and gonadotropin subunits in pituitary glands of beef cows, 269
Plasma gonadotropins and ovarian hormones during the estrous cycle in high compared to low ovulation rate gilts, 249
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Use of naloxone challenge to predict sexual performance of young rams, 2111
Lymphocytes
Effects of dexamethasone on lymphoid tissue in the gut and thymus of neonatal calves fed with colostrum or milk replacer, 2322
The role of acidogenic diets and β-hydroxybutyate on lymphocyte proliferation and serum antibody response against bovine respiratory viruses in Holstein steers, 3088
Lysine
An evaluation of the NRC (1998) growth model in estimating lysine requirements of barrows with a lean growth rate of 348 g/d, 1772
Comparison of the enzyme-hydrolyzed casein, guanidination, and isotope dilution methods for determining ileal endogenous protein flow in the growing rat and pig, 2525
Effect of dietary energy concentration and apparent ileal digestible lysine:metabolizable energy ratio on nitrogen balance and growth performance of young pigs, 1227
Serum urea concentration as a predictor of dietary lysine requirement in selected lines of pigs, 91
Lysozyme
Nutritional evaluation of egg byproducts in diets for early-weaned pigs, 2270

M

Macrophage Activation
Effects of organic forms of zinc on growth performance, tissue zinc distribution, and immune response of weanling pigs, 2063

Magnetic Resonance Imaging
Comparison of different methods to assess the composition of pig bellies in progeny testing, 1177
Maintenance
The history of energetic efficiency research: Where have we been and where are we going?, 27
Maize
Detection of corn intrinsic and recombinant DNA fragments and Cry1Ab protein in the gastrointestinal contents of pigs fed genetically modified corn Bt11, 2546
Effect of feeding glyphosate-tolerant (Roundup-Ready events GA21 or nk603) corn compared with reference hybrids on feedlot steer performance and carcass characteristics, 2600
Wet corn gluten feed and alfalfa hay combinations in steam-flaked corn finishing cattle diets, 3121
Maize Byproducts
Corn processing method in finishing diets containing wet corn gluten feed, 3182
Maize Gluten
Combinations of alfalfa hay and wet corn gluten feed in limit-fed growing diets for beef cattle, 1671
Corn processing method in finishing diets containing wet corn gluten feed, 3182
Wet corn gluten feed and alfalfa hay combinations in steam-flaked corn finishing cattle diets, 3121
Maize Starch
Corn processing method in finishing diets containing wet corn gluten feed, 3182
Major Genes
Evidence of a major gene influencing hair length and heat tolerance in *Bos taurus* cattle, 80
Male Animals
Season of the year influences testosterone secretion in bulls administered luteinizing hormone, 1023
Males
The male effect, mounting behavior, and the onset of estrus in farmed muskoxen, 2669
Mammary Development
Specific window of prolactin inhibition in late gestation decreases mammary parenchymal tissue development in gilts, 1823
Mammary Glands
Effect of ambient temperature on mammary gland metabolism in lactating sows, 217
Quantification of mammary gland tissue size and composition changes after weaning in sows, 2583
Specific window of prolactin inhibition in late gestation decreases mammary parenchymal tissue development in gilts, 1823
Management
Controlling variation in feed intake through bunk management, 133
Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
Strategies to reduce feedlot cattle heat stress: Effects on tympanic temperature, 649
Management Alternatives
Environmental stress in confined beef cattle, 110
Mannans
Effect of mannan oligosaccharides on growth performance of weanling pigs, 2482
Manures
Ammonia, volatile fatty acids, phenolics, and odor offensiveness in manure from growing pigs fed diets reduced in protein concentration, 1754
Diet and evaluators affect perception of swine waste odor: An educational demonstration, 3211
Swine manure composition affects the biochemical origins, composition, and accumulation of odorous compounds, 2131
Mapping
Detection of quantitative trait loci for growth and beef carcass fatness traits in a cross between *Bos taurus* (Angus) and *Bos indicus* (Brahman) cattle, 1933
Estimation of linkage disequilibrium in a sample of the United Kingdom dairy cattle population using unphased genotypes, 617
Quantitative trait locus detection in commercial broiler lines using candidate regions, 1158
Mares
Effects of deslorelin acetate implants in horses: Single implants in stallions and steroid-treated geldings and multiple implants in mares, 1300
Glucose clearance in grazing mares is affected by diet, pregnancy, and lactation, 1764
Marker Genes
Fine mapping of quantitative trait loci and assessment of positional candidate genes for backfat on bovine chromosome 14 in a commercial line of *Bos taurus*, 1919
Markers
Comparison of three techniques for estimating the forage intake of lactating dairy cows on pasture, 2357
Estimation of linkage disequilibrium in a sample of the United Kingdom dairy cattle population using unphased genotypes, 617
Marketing
Relationships of consumer sensory ratings, marbling score, and shear force value to consumer acceptance of beef strip loin steaks, 2741
Market Research
Beef customer satisfaction: Trained sensory panel ratings and Warner-Bratzler shear force values, 143
Markov Processes
Bayesian inference about parameters of a longitudinal trajectory when selection operates on a correlated trait, 2714
Maternal Effects
The impact of data structure on genetic (co)variance components of early growth in sheep, estimated using an animal model with maternal effects, 101
Maternal Nutrition
Increased maternal nutrition of sows has no beneficial effects on muscle fiber number or postnatal growth and has no impact on the meat quality of the offspring, 3018
Mathematical Model
Simplified in situ method for estimating ruminal dry matter and protein degradability of concentrates, 520
Maximum Likelihood
A mixture model-based cluster analysis of DNA microarray gene expression data on Brahman and Brahman composite steers fed high-, medium-, and low-quality diets, 1900
Analyses of growth curves of Nellore cattle by multiple-trait and random regression models, 918
Meat Byproducts
Efficacy of sucrose and milk chocolate product or dried porcine solubles to increase feed intake and improve performance of lactating sows, 2475
Meat Quality
Accelerated chilling of carcasses to improve pork quality, 1464
Color stability of semitendinosus, semimembranosus, and biceps femoris steaks packaged in a high-oxygen modified atmosphere, 2230
Creatine monohydrate supplemented in swine finishing diets and fresh pork quality: III. Evaluating the cumulative effect of creatine monohydrate and alpha-lipoic acid, 2469
Dietary manipulation of pro- and macroglycogen in porcine skeletal muscle, 130
Effect of a high-linolenic acid diet on lipogenic enzyme activities, fatty acid composition, and meat quality in the growing pig, 1967
Effect of chromium propionate on growth, carcass traits, pork quality, and plasma metabolites in growing-finishing pigs, 2515
Effect of conjugated linoleic acid on meat quality, lipid metabolism, and sensory characteristics of dry-cured hams from heavy pigs, 2219
Endocrine, blood metabolite, and meat quality changes in goats as influenced by short-term, preslaughter stress, 1499
Evaluation of Duroc- vs. Pietrain-sired pigs for carcass and meat quality measures, 1895
Growth performance, dry matter and nitrogen digestibilities, serum profile, and carcass and meat quality of pigs with distinct g, 1142
Hydrogenated dietary fat improves pork quality of pigs from two lean genotypes, 1989
Increased maternal nutrition of sows has no beneficial effects on muscle fiber number or postnatal growth and has no impact on the meat quality of the offspring, 3018
Mechanical measures of uncooked beef longissimus muscle can predict sensory panel tenderness and Warner-Bratzler shear force of cooked steaks, 1721
Pork Serum concentrations of leptin in six genetic lines of swine and relationship with growth and carcass characteristics, 167

Quantitative trait loci analysis for growth and carcass traits in a Meishan × Duroc F2 resource population, 2938
Relationships between longissimus glycolytic potential and swine growth performance, carcass traits, and pork quality, 2206
Rendement Napole gene effects and a comparison of glycolytic potential and DNA genotyping for classification of Rendement Napole status in Hampshire-sired pigs, 402
Slow fiber cluster pattern in pig longissimus thoracis muscle: Implications for myogenesis, 973
Meat Yield
Accuracy of predicting weight and percentage of beef carcass retail product using ultrasound and live animal measures, 466
Prediction of retail product weight and percentage using ultrasound and carcass measurements in beef cattle, 1736
Meishan
Central and peripheral concentrations of tumor necrosis factor-α in Chinese Meishan pigs stimulated with lipopolysaccharide, 1274
Melatonin
Evaluation of *melatonin receptor la* as a candidate gene influencing reproduction in an autumn-lambing sheep flock, 912
Melengestrol Acetate
A dose-response study of melengestrol acetate on feedlot performance and carcass characteristics of beef steers, 2699
Messenger Ribonucleic Acid
Abundance of message for insulin-like growth factors-I and -II and for receptors for growth hormone, insulin-like growth factors-I and -II, and insulin in the intestine and liver of pre- and full-term calves, 2294
Dietary fat has minimal effects on fatty acid metabolism transcript concentrations in pigs, 423
Metabolism
Duration of Lactation, Endocrine and Metabolic State, and Fertility of Primiparous Sows, 2088
Porcine leptin inhibits lipogenesis in porcine adipocytes, 3008
Metabolizable Energy
Effect of chromium propionate and metabolizable energy on growth, carcass traits, and pork quality of growing-finishing pigs, 191
Effect of dietary energy concentration and apparent ileal digestible lysine:metabolizable energy ratio on nitrogen balance and growth performance of young pigs, 1227
Effects of dietary fermentable carbohydrates on behavior and heat production in group-housed sows, 182
Methane
Alternative approaches to predicting methane emissions from dairy cows, 3141
Methane Inhibitors
Effects of 9,10 anthraquinone on ruminal fermentation, total-tract digestion, and blood metabolite concentrations in sheep, 323
Mice
Evaluation of vaccination against methyllycaconitine toxicity in mice, 232
Ionophores have limited effects on jejunal glucose absorption and energy metabolism in mice, 2072
Reallocation of body resources in lactating mice highly selected for litter size, 939
Sleep time following anesthesia in mouse lines selected for resistance or susceptibility to fescue toxicosis, 2562
Microbial Ecology
Technical note: Specific PCR amplification of protozoal 18S rDNA sequences from DNA extracted from ruminal samples of cows, 812
Microbial Flora
Effects of bacterial direct-fed microbials and yeast on site and extent of digestion, blood chemistry, and subclinical ruminal acidosis in feedlot cattle, 1628
Fermented and nonfermented liquid feed to growing pigs—Effect on aspects of gastrointestinal ecology and growth performance, 2019
Microbial Proteins
Diet and procedures used to detach particle-associated microbes from ruminal digesta influence chemical composition of microbes and estimation of microbial growth in Rusitec fermenters, 537
Effect of grain processing and silage on microbial protein synthesis and nutrient digestibility in beef cattle fed barley-based diets, 1057
Synchrony of nutrient supply to the rumen and dietary energy source and their effects on the growth and metabolism of lambs, 1332
Microbial Protein Synthesis
Effects of urea infusion and ruminal degradable protein concentration on microbial growth, digestibility, and fermentation in continuous culture, 329
Microbial Yield
Biohydrogenation of unsaturated fatty acids in continuous culture fermenters during digestion of orchardgrass or red clover with three levels of ground corn supplementation, 1611
Microbiota
Molecular ecological analysis of porcine ileal microbiota responses to antimicrobial growth promoters, 3035
Milk Chocolate
Efficacy of sucrose and milk chocolate product or dried porcine solubles to increase feed intake and improve performance of lactating sows, 2475
Milk Composition
Early weaning to reduce tissue mobilization in lactating sows and milk supplementation to enhance pig weaning weight during extreme heat stress, 2041
Effect of ambient temperature on mammary gland metabolism in lactating sows, 217
Milk Production
Influence of milk production potential on forage dry matter intake by multiparous and primiparous Brangus females, 1837
Milk Production Characteristics
Effects of *DGAT1* variants on milk production traits in German cattle breeds, 1911
Milk Yield
Evaluation of age of dam effects on maternal performance of multilactation daughters from high- and low-milk EPD sires at three locations in the Southern United States, 1693
Evaluation of maternal performance of daughters from high and low milk EPD sires, 1406
Minerals
A survey of methods of analysis for minerals in feedstuffs, 3218
Effect of soil type and fertilization level on mineral concentration of pasture: Potential relationships to ruminant performance and health, 1603
Mitochondrial DNA
Identification of mitochondrial DNA substitutions related to meat quality in Japanese Black cattle, 68
Mixing
Effect of transportation and commingling on the acute-phase protein response, growth, and feed intake of newly weaned beef calves, 1120
Modeling
Alternative approaches to predicting methane emissions from dairy cows, 3141
Models
A dynamic model of metabolizable energy utilization in growing and mature cattle. I. Metabolizable energy utilization for maintenance and support metabolism, 1371
A dynamic model of metabolizable energy utilization in growing and mature cattle. II. Metabolizable energy utilization for gain, 1382
A dynamic model of metabolizable energy utilization in growing and mature cattle. III. Model evaluation, 1390
Characterization of pig genotypes for growth modeling, 187
Development of a model to describe the compositional growth and dietary lysine requirements of pigs fed ractopamine, 1106
Modeling homeorhetic and homeostatic controls of pig growth, 683
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Simulating the partitioning of dietary amino acids: New directions, 60
Mohair
Effects of prolactin administered to a perfused area of the skin of Angora goats, 279
Moisture Content
Challenges in measuring moisture content of feeds, 3255
Molasses
Effect of copper source and level on performance and copper status of cattle consuming molasses-based supplements, 1357
Monensin
Interaction between bunk management and monensin concentration on finishing performance, feeding behavior, and ruminal

metabolism during an acidosis challenge with feedlot cattle, 2869
Monte Carlo Method
Bayesian inference about parameters of a longitudinal trajectory when selection operates on a correlated trait, 2714
Mortality
Discrete time survival analysis of lamb mortality in a terminal sire composite population, 1399
Genetic parameters for within-litter variation in piglet birth weight and change in within-litter variation during suckling, 604
Mortality of Creole kids during infection with gastrointestinal strongyles: A survival analysis, 2401
Muscle
Heterogeneity of Protein Expression within Muscle Fibers, 94
Time course of changes in growth factor mRNA levels in muscle of steroid-implanted and nonimplanted steers, 2733
Muscle Cells
Protein turnover and sensory traits of longiss‘mus muscle from implanted and nonimplanted heifers, 1728
Muscle Fibers
Increased maternal nutrition of sows has no beneficial effects on muscle fiber number or postnatal growth and has no impact on the meat quality of the offspring, 3018
Heterogeneity of Protein Expression within Muscle Fibers, 94
Slow fiber cluster pattern in pig longissimus thoracis muscle: Implications for myogenesis, 973
Muscles
Growth factor messenger RNA levels in muscle and liver of steroid-implanted and nonimplanted steers, 965
Rendement Napole gene effects and a comparison of glycolytic potential and DNA genotyping for classification of Rendement Napole status in Hampshire-sired pigs, 402
Muscle Tissue
The effect of vitamin E supplementation on discoloration of injection-site lesions in retail cuts and the greening reaction observed in injection-site lesions in muscles of the chuck, 1885
Mycotoxins
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on growth and immunological measurements of starter pigs, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2792
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on feed intake, serum chemistry, and hematology of horses, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2123
Myosins
Heterogeneity of Protein Expression within Muscle Fibers, 94

N

Naloxone
Use of naloxone challenge to predict sexual performance of young rams, 2111
Nellore
Production and economic potentials of cattle in pasture-based systems of the western Amazon region of Brazil, 2923
Net Energy
Effects of two different dietary fermentable carbohydrates on activity and heat production in group-housed pigs, 1210
Influence of dietary protein level, amino acid supplementation, and dietary energy levels on growing-finishing pig performance and carcass composition, 3075
Nitric Oxide
Nitric oxide and the ovary, 1
Nitrogen
Comparison of the enzyme-hydrolyzed casein, guanidination, and isotope dilution methods for determining ileal endogenous protein flow in the growing rat and pig, 2525
Diet and procedures used to detach particle-associated microbes from ruminal digesta influence chemical composition of microbes and estimation of microbial growth in Rusitec fermenters, 537
Influence of oscillating dietary crude protein concentration on performance, acid-base balance, and nitrogen excretion of steers, 2660
Nitrogen Balance
Growth, nutrient utilization, and body composition of dairy calves fed milk replacers containing different amounts of protein, 1641
Nitrogen Metabolism
Nitrogen metabolism and recycling in Holstein heifers, 545
Nitrogen Retention
Effect of dietary energy concentration and apparent ileal digestible lysine:metabolizable energy ratio on nitrogen balance and growth performance of young pigs, 1227
Nucleotide Sequence
Identification of mitochondrial DNA substitutions related to meat quality in Japanese Black cattle, 68
Nurseries
Effects of blood meal pH and irradiation on nursery pig performance, 1013
Nutrient Content
Characterization of season and sampling method effects on measurement of forage quality in fescue-based pastures, 1308
Nutrient Digestibility
A dose-response experiment evaluating the effects of oligofructose and inulin on nutrient digestibility, stool quality, and fecal protein catabolites in healthy adult dogs, 3057
Nutrient Requirements
An evaluation of the NRC (1998) growth model in estimating lysine requirements of barrows with a lean growth rate of 348 g/d, 1772
Isoleucine requirement of growing (25 to 45 kg) pigs, 745
Nutrients
Ryegrass-based diet and barley supplementation: Partition of energy-yielding nutrients among splanchnic tissues and hind limbs in finishing lambs, 1068
The effect of supplementing microbial phytase and organic acids to a corn–soybean based diet fed to early-weaned pigs, 1806
Nutrient Uptake
Effect of ambient temperature on mammary gland metabolism in lactating sows, 217
Effects of volatile fatty acid supply on their absorption and on water kinetics in the rumen of sheep sustained by intragastric infusions, 2609
Nutrition
Dietary Betaine Supplementation Affects Energy Metabolism of Pigs, 1202
Effect of conjugated linoleic acid on meat quality, lipid metabolism, and sensory characteristics of dry-cured hams from heavy pigs, 2219
Effects of feeding supplemental fat to beef cows on cold tolerance in newborn calves, 885
Influence of body condition at calving and postpartum nutrition on endocrine function and reproductive performance of primiparous beef cows, 3107
Relationship between aging and nutritionally controlled growth rate on heat production of heifers, 1847
Tannins for suppression of internal parasites, 102

O

Oats
Growth performance, carcass and pork quality of finisher pigs fed oat-based diets containing different levels of β-glucans, 449
Obesity
Obesity and diet affect glucose dynamics and insulin sensitivity in Thoroughbred geldings, 2333
Odors
Ammonia, volatile fatty acids, phenolics, and odor offensiveness in manure from growing pigs fed diets reduced in protein concentration, 1754
Diet and evaluators affect perception of swine waste odor: An educational demonstration, 3211
Nutrient digestibilities, microbial populations, and protein catabolites as affected by fructan supplementation of dog diets, 2008
Swine manure composition affects the biochemical origins, composition, and accumulation of odorous compounds, 2131
Oilseeds
Effect of supplemental nutrient source on heifer growth and reproductive performance, and on utilization of corn silage-based diets by beef steers, 2367

Oligofructose
A dose-response experiment evaluating the effects of oligofructose and inulin on nutrient digestibility, stool quality, and fecal protein catabolites in healthy adult dogs, 3057
Oligosaccharides
Dietary galactooligosaccharides affect ileal and total tract nutrient digestibility, ileal and fecal bacterial concentrations, and ileal fermentative characteristics of growing pigs, 2535
Effect of mannan oligosaccharides on growth performance of weanling pigs, 2482
In vitro fermentation characteristics of selected oligosaccharides by swine fecal microflora, 2505
Oocytes
Effect of capacitation of stallion sperm with polyvinylalcohol or bovine serum albumin on penetration of bovine zona-free or partially zona-removed equine oocytes, 2080
Optimization
Expected increases in genetic merit from using optimized contributions in two livestock populations of beef cattle and sheep, 2964
Organic Acids
The effect of supplementing microbial phytase and organic acids to a corn–soybean based diet fed to early-weaned pigs, 1806
Osmotic Pressure
Effects of volatile fatty acid supply on their absorption and on water kinetics in the rumen of sheep sustained by intragastric infusions, 2609
Osteocalcin
Circadian variation in biochemical markers of bone cell activity and insulin-like growth factor-I in two-year-old horses, 2804
Ovarian Follicles
Nitric oxide and the ovary, 1
Ovaries
Nitric oxide and the ovary, 1
Ovens
Challenges in measuring moisture content of feeds, 3255
Ovibos moschatus
The male effect, mounting behavior, and the onset of estrus in farmed muskoxen, 2669
Ovulation
Nitric oxide and the ovary, 1
Nutritional- and suckling-mediated anovulation in beef cows, 48
Ovulation Rate
Fine mapping a quantitative trait locus affecting ovulation rate in swine on chromosome 8, 1706
Plasma gonadotropins and ovarian hormones during the estrous cycle in high compared to low ovulation rate gilts, 249
Oxygen Consumption
The effect of pregnancy on visceral growth and energy use in beef heifers, 1853
Oxytocin
Influence of hormone supplementation to extended semen on artificial insemination, uterine contractions, establishment of a sperm reservoir, and fertility in swine, 821

P

Packaging
Color stability of semitendinosus, semimembranosus, and biceps femoris steaks packaged in a high-oxygen modified atmosphere, 2230
Pain
A laser-based method to measure thermal nociception in dairy cows: Short-term repeatability and effects of power output and skin condition, 945
Palatability
Effectiveness of the SmartMV Prototype BeefCam System to Sort Beef Carcasses into Expected Palatability Groups, 441
Effect of sire on μ- and m-calpain activity and rate of tenderization as indicated by myofibril fragmentation indices of steaks from Brahman cattle, 2440
Effects of growth implants on consumer perceptions of meat tenderness in beef steers, 3052
Effects of postexsanguination vascular infusion of cattle with a solution of saccharides, sodium chloride, and phosphates or with calcium chloride on quality and sensory traits of steaks and ground beef, 156
Effects of repetitive use of hormonal implants on beef carcass quality, tenderness, and consumer ratings of beef palatability, 984
Estimated genetic parameters for palatability traits of steaks from Brahman cattle, 54
Online prediction of beef tenderness using a computer vision system equipped with a BeefCam module, 457
Relationships of consumer sensory ratings, marbling score, and shear force value to consumer acceptance of beef strip loin steaks, 2741
The effect of feeding ractopamine (Paylean) on muscle quality and sensory characteristics in three diverse genetic lines of swine, 1508
Pancreas
Influence of substrate and/or neurohormonal mimic on in vitro pancreatic enzyme release from calves postruminally infused with partially hydrolyzed starch and/or casein, 1323
Pancreatic exocrine secretion in steers infused postruminally with casein and cornstarch, 1051
Parasites
Tannins for suppression of internal parasites, 102
Parity
Influence of milk production potential on forage dry matter intake by multiparous and primiparous Brangus females, 1837
Particle Size
Effect of soybean meal particle size on amino acid and energy digestibility in grower-finisher swine, 697
Effects of soybean meal particle size on growth performance of nursery pigs, 2118
Pasture
Effect of soil type and fertilization level on mineral concentration of pasture: Potential relationships to ruminant performance and health, 1603
Pathogens
Preslaughter intervention strategies to reduce food-borne pathogens in food animals, 17
Performance
Comparison of three techniques for estimating the forage intake of lactating dairy cows on pasture, 2357
Effect of dietary energy concentration and apparent ileal digestible lysine:metabolizable energy ratio on nitrogen balance and growth performance of young pigs, 1227
Effect of group size on performance of growing-finishing pigs, 874
Fender design and insulation of farrowing huts: effects on performance of outdoor sows and piglets, 955
Influence of dietary urea level on digestive function and growth performance of cattle fed steam-flaked barley-based finishing diets, 2383
Nutritional evaluation of egg byproducts in diets for early-weaned pigs, 2270
Performance Testing
Comparison of different methods to assess the composition of pig bellies in progeny testing, 1177
Peyer Patches
Effects of dexamethasone on lymphoid tissue in the gut and thymus of neonatal calves fed with colostrum or milk replacer, 2322
pH
A comparison of hydrogen ion concentration and pH genetic predictions and fixed effect estimations when assessing pork quality, 611
Effects of blood meal pH and irradiation on nursery pig performance, 1013
Effects of enzyme supplementation of a total mixed ration on microbial fermentation in continuous culture, maintained at high and low pH, 2617
Effects of postexsanguination vascular infusion of carcasses with calcium chloride or a solution of saccharides, sodium chloride, and phosphates on beef display-color stability, 669
Pre-harvest factors influencing the acid resistance of *Escherichia coli* and *E. coli* O157:H7, 1080
Phenolic Compounds
Ammonia, volatile fatty acids, phenolics, and odor offensiveness in manure from growing pigs fed diets reduced in protein concentration, 1754
Phosphates
Chronic metabolic acid load induced by changes in dietary electrolyte balance increased chloride retention but did not compromise bone in growing swine, 197

Phosphoenolpyruvate Carboxykinase
Dexamethasone and colostrum feeding differently affect hepatic gluconeogenic enzymes in neonatal calves, 3095
Phosphorus
Determination of True Digestive Utilization of Phosphorus and the Endogenous Phosphorus Outputs Associated with Soybean Meal for Growing Pigs, 2766
Effectiveness of an experimental consensus phytase in improving dietary phytate-phosphorus utilization by weanling pigs, 2751
The effect of supplementing microbial phytase and organic acids to a corn–soybean based diet fed to early-weaned pigs, 1806
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Photoperiod
Effect of photoperiod on hepatic growth hormone receptor 1A expression in steer calves, 1440
Physical Activity
Effects of dietary fermentable carbohydrates on behavior and heat production in group-housed sows, 182
Effects of two different dietary fermentable carbohydrates on activity and heat production in group-housed pigs, 1210
Physical Properties
Modeling chemical and physical body composition of the growing pig, 159
Physiology
The multifactorial nature of food intake control, 139
Phytase
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Effect of microbial phytase on energy availability, and lipid and protein deposition in growing swine, 2053
Efficacy of an *E. coli* phytase expressed in yeast for releasing phytate-bound phosphorus in young chicks and pigs, 474
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Phytin
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Pigs
β-Adrenergic receptor subtypes that mediate ractopamine stimulation of lipolysis, 662
Accelerated chilling of carcasses to improve pork quality, 1464
A gonadotropin-releasing factor vaccine (Improvac) and porcine somatotropin have synergistic and additive effects on growth performance in group-housed boars and gilts, 1959
Ammonia, volatile fatty acids, phenolics, and odor offensiveness in manure from growing pigs fed diets reduced in protein concentration, 1754
An evaluation of the NRC (1998) growth model in estimating lysine requirements of barrows with a lean growth rate of 348 g/d, 1772
Central and peripheral concentrations of tumor necrosis factor-α in Chinese Meishan pigs stimulated with lipopolysaccharide, 1274
Chronic metabolic acid load induced by changes in dietary electrolyte balance increased chloride retention but did not compromise bone in growing swine, 197
Characterization of pig genotypes for growth modeling, 187
Comparison of different methods to assess the composition of pig bellies in progeny testing, 1177
Comparison of the enzyme-hydrolyzed casein, guanidination, and isotope dilution methods for determining ileal endogenous protein flow in the growing rat and pig, 2525
Complementary DNA macroarray analyses of differential gene expression in porcine fetal and postnatal muscle, 2179
Correlated Response in Placental Efficiency in Swine Selected for an Index of Components of Litter Size, 74
Detection of corn intrinsic and recombinant DNA fragments and Cry1Ab protein in the gastrointestinal contents of pigs fed genetically modified corn Bt11, 2546
Detection of quantitative trait loci for fat androstenone levels in pigs, 385
Determination of True Digestive Utilization of Phosphorus and the Endogenous Phosphorus Outputs Associated with Soybean Meal for Growing Pigs, 2766
Determining whether transgenic and endogenous plant DNA and transgenic protein are detectable in muscle from swine fed Roundup Ready soybean meal, 1447
Development of a model to describe the compositional growth and dietary lysine requirements of pigs fed ractopamine, 1106
Dietary Betaine Supplementation Affects Energy Metabolism of Pigs, 1202
Diet and evaluators affect perception of swine waste odor: An educational demonstration, 3211
Dietary galactooligosaccharides affect ileal and total tract nutrient digestibility, ileal and fecal bacterial concentrations, and ileal fermentative characteristics of growing pigs, 2535
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Economic weights for feed intake in the growing pig derived from a growth model and an economic model, 895
Effectiveness of an experimental consensus phytase in improving dietary phytate-phosphorus utilization by weanling pigs, 2751
Effect of age at slaughter on carcass traits and meat quality of Italian heavy pigs, 2448
Effect of a high-linolenic acid diet on lipogenic enzyme activities, fatty acid composition, and meat quality in the growing pig, 1967
Effect of boar exposure at time of insemination on factors influencing fertility in gilts, 9
Effect of boron supplementation of pig diets on the production of tumor necrosis factor-α and interferon-γ, 2552
Effect of carbohydrate source on growth performance, carcass traits, and meat quality of growing-finishing pigs, 2488
Effect of chromium propionate and metabolizable energy on growth, carcass traits, and pork quality of growing-finishing pigs, 191
Effect of chromium propionate on growth, carcass traits, pork quality, and plasma metabolites in growing-finishing pigs, 2515
Effect of conjugated linoleic acid on meat quality, lipid metabolism, and sensory characteristics of dry-cured hams from heavy pigs, 2219
Effect of dietary energy concentration and apparent ileal digestible lysine:metabolizable energy ratio on nitrogen balance and growth performance of young pigs, 1227
Effect of dietary fat sources on systemic and intrauterine synthesis of prostaglandins during early pregnancy in gilts, 726
Effect of Dietary Protein Fluctuations and Space Allocation on Performance and Carcass Quality of Growing-Finishing Pigs, 2783
Effect of feather meal on live animal performance and carcass quality and composition of growing-finishing swine, 172
Effect of group size on performance of growing-finishing pigs, 874
Effect of Irradiation of Individual Feed Ingredients and the Complete Diet on Nursery Pig Performance, 1799
Effect of mannan oligosaccharides on growth performance of weanling pigs, 2482
Effect of microbial phytase on energy availability, and lipid and protein deposition in growing swine, 2053
Effect of restricted postweaning growth resulting from reduced floor and feeder-trough space on pig growth performance to slaughter weight in a wean-to-finish production system, 836
Effect of soybean meal particle size on amino acid and energy digestibility in grower-finisher swine, 697
Effects of Adding Fiber Sources to Reduced-Crude Protein, Amino Acid-Supplemented Diets on Nitrogen Excretion, Growth Performance, and Carcass Traits of Finishing Pigs, 492
Effects of antimicrobials and weaning on porcine serum insulin-like growth factor binding protein levels, 1456
Effects of blood meal pH and irradiation on nursery pig performance, 1013
Effects of butyrate on apoptosis in the pig colon and its consequences for skatole formation and tissue accumulation, 239
Effects of dietary electrolyte balance on the chemistry of blood and urine in lactating sows and sow litter performance, 3067
Effects of dietary fermentable carbohydrates on behavior and heat production in group-housed sows, 182
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on growth and immunological measurements of starter pigs, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2792
Effects of fish oil supplementation on the performance and the immunological, adrenal, and somatotropic responses of weaned

pigs after an *Escherichia coli* lipopolysaccharide challenge, 2758
Effects of organic forms of zinc on growth performance, tissue zinc distribution, and immune response of weanling pigs, 2063
Effects of protein deprivation on subsequent growth performance, gain of body components, and protein requirements in growing pigs, 705
Effects of soybean meal particle size on growth performance of nursery pigs, 2118
Effects of two different dietary fermentable carbohydrates on activity and heat production in group-housed pigs, 1210
Efficacy of an *E. coli* phytase expressed in yeast for releasing phytate-bound phosphorus in young chicks and pigs, 474
Estimation of Variances for Gametic Effects on Litter Size in Yorkshire and Landrace Swine, 2171
Evaluation of Duroc- vs. Pietrain-sired pigs for carcass and meat quality measures, 1895
Evaluation of strategies for selection for lean growth rate in pigs, 1150
Evaluation of the uterine environment and embryos of prepubertal gilts, 2575
Expression of the uterine Mx protein in cyclic and pregnant cows, gilts, and mares, 1552
Fine mapping a quantitative trait locus affecting ovulation rate in swine on chromosome 8, 1706
Full pedigree quantitative trait locus analysis in commercial pigs using variance components, 2155
Genetic parameters and trends for litter traits in U.S. Yorkshire, Duroc, Hampshire, and Landrace pigs, 46
Genetic parameters for within-litter variation in piglet birth weight and change in within-litter variation during suckling, 604
Growth, carcass traits, and plasma amino acid concentrations of gilts fed low-protein diets supplemented with amino acids including histidine, isoleucine, and valine, 1529
Growth performance, carcass and pork quality of finisher pigs fed oat-based diets containing different levels of β-glucans, 449
Growth performance, dry matter and nitrogen digestibilities, serum profile, and carcass and meat quality of pigs with distinct g, 1142
Growth performance, nutrient digestibility, and fecal microflora in weanling pigs fed live yeast, 1004
Heritability of body length and measures of body density and their relationship to backfat thickness and loin muscle area in swine, 1943
Impact of early postweaning growth rate as affected by diet complexity and space allocation on subsequent growth performance of pigs in a wean-to-finish production system, 353
Increased maternal nutrition of sows has no beneficial effects on muscle fiber number or postnatal growth and has no impact on the meat quality of the offspring, 3018
Influence of hormone supplementation to extended semen on artificial insemination, uterine contractions, establishment of a sperm reservoir, and fertility in swine, 821
Influence of litter size and creep feeding on preweaning gain and influence of preweaning growth on growth to slaughter in barrows, 2434
Influences of dietary protein level, amino acid supplementation and environmental temperature on performance, body composition, organ weights and total heat production of growing pigs, 1998
Isoleucine requirement of growing (25 to 45 kg) pigs, 745
In vitro fermentation characteristics of selected oligosaccharides by swine fecal microflora, 2505
Modeling chemical and physical body composition of the growing pig, 159
Modeling homeorhetic and homeostatic controls of pig growth, 683
Molecular ecological analysis of porcine ileal microbiota responses to antimicrobial growth promoters, 3035
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Performance of finishing pigs in hoop structures and confinement during winter and summer, 1663
Plasma gonadotropins and ovarian hormones during the estrous cycle in high compared to low ovulation rate gilts, 249
Predicting the consequences of social stressors on pig food intake and performance, 2995
Quantitative trait loci analysis for growth and carcass traits in a Meishan × Duroc F2 resource population, 2938
Rendement Napole gene effects and a comparison of glycolytic potential and DNA genotyping for classification of Rendement Napole status in Hampshire-sired pigs, 402
Response of early-weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, 1781
Response of early weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, zinc oxide, fumaric acid, or antibiotic, 1790
Results from nine generations of selection for increased litter size in swine, 624
Serum concentrations of leptin in six genetic lines of swine and relationship with growth and carcass characteristics, 167
Serum urea concentration as a predictor of dietary lysine requirement in selected lines of pigs, 91
Simulating the partitioning of dietary amino acids: New directions, 60
Some recollections of early swine research with selenium and vitamin E, 145
Stereoselectivity of porcine β-adrenergic receptors for ractopamine stereoisomers, 122
Stillbirth in the pig in relation to genetic merit for farrowing survival, 2419
The effect of breed and intrauterine crowding on fetal erythropoiesis on day 35 of gestation in swine, 2352
The effect of feeding ractopamine (Paylean) on muscle quality and sensory characteristics in three diverse genetic lines of swine, 1508
The effect of supplementing microbial phytase and organic acids to a corn–soybean based diet fed to early-weaned pigs, 1806
The effect of thermal environment and spray-dried plasma on the acute-phase response of pigs challenged with lipopolysaccharide, 1166
The effects of ractopamine on the behavior and physiology of finishing pigs, 416
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
The growth performance of the progeny of two swine sire lines reared under different floor space allowances, 1126
Use of carbohydrases in corn–soybean meal-based nursery diets, 2496
Uterine immune reaction and reproductive performance of sows inseminated with extended semen and infused with pooled whole dead semen, 2818

Piglet Feeding
Early weaning to reduce tissue mobilization in lactating sows and milk supplementation to enhance pig weaning weight during extreme heat stress, 2041

Piglets
Effect of dietary *Echinacea purpurea* on viremia and performance in porcine reproductive and respiratory syndrome virus-infected nursery pigs, 2139
Effect of fishmeal replacement with spray-dried animal plasma and colistin on intestinal structure, intestinal microbiology, and performance of weanling pigs challenged with *Escherichia coli* K99, 1220
Effects of increasing dietary L-carnitine on growth performance of weanling pigs, 2259
Evaluating processing temperature and feeding value of extruded-expelled soybean meal on nursery and finishing pig growth performance, 2032
Fender design and insulation of farrowing huts: effects on performance of outdoor sows and piglets, 955
Nutritional evaluation of egg byproducts in diets for early-weaned pigs, 2270

Pig Slurry
Effects of Adding Fiber Sources to Reduced-Crude Protein, Amino Acid-Supplemented Diets on Nitrogen Excretion, Growth Performance, and Carcass Traits of Finishing Pigs, 492

Pituitary
Central and peripheral concentrations of tumor necrosis factor-α in Chinese Meishan pigs stimulated with lipopolysaccharide, 1274

Placenta
Correlated Response in Placental Efficiency in Swine Selected for an Index of Components of Litter Size, 74

Relationships between uterine and fetal traits in rabbits selected on uterine capacity, 1265
Plane of Nutrition
Effects of growth hormone and feeding level on endocrine measurements, hormone receptors, muscle growth and performance of prepubertal heifers, 2189
Plasma
Response of early-weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, 1781
Plasmids
Effects of plasmid-mediated growth hormone releasing hormone supplementation in young, healthy Beagle dogs, 2301
Poisonous Plants
Grazing of spotted locoweed (*Astragalus lentiginosus* by cattle and horses in Arizona, 2285
Politics
Postmodernism for animal scientists, 2989
Polymerase Chain Reaction
Determining whether transgenic and endogenous plant DNA and transgenic protein are detectable in muscle from swine fed Roundup Ready soybean meal, 1447
Polysaccharides
Effects of dietary fermentable carbohydrates on behavior and heat production in group-housed sows, 182
Performance of sows fed high levels of nonstarch polysaccharides during gestation and lactation over three parities, 2247
Porcine Reproductive and Respiratory Syndrome
Effect of dietary *Echinacea purpurea* on viremia and performance in porcine reproductive and respiratory syndrome virus-infected nursery pigs, 2139
Pork
Accelerated chilling of carcasses to improve pork quality, 1464
Creatine monohydrate supplemented in swine finishing diets and fresh pork quality: III. Evaluating the cumulative effect of creatine monohydrate and alpha-lipoic acid, 2469
Effect of chromium propionate and metabolizable energy on growth, carcass traits, and pork quality of growing-finishing pigs, 191
Effect of feather meal on live animal performance and carcass quality and composition of growing-finishing swine, 172
Evaluation of the E+V video image analysis system as a predictor of pork carcass meat yield, 1193
Growth performance, carcass and pork quality of finisher pigs fed oat-based diets containing different levels of β-glucans, 449
Ractopamine treatment biases in the prediction of pork carcass composition, 16
Relationships between longissimus glycolytic potential and swine growth performance, carcass traits, and pork quality, 2206
The effect of feeding ractopamine (Paylean) on muscle quality and sensory characteristics in three diverse genetic lines of swine, 1508
Pork, Pigs
Hydrogenated dietary fat improves pork quality of pigs from two lean genotypes, 1989
Portal Vein
Ryegrass-based and barley supplementation: Partition of nitrogenous nutrients among splanchnic tissues and hind limb in finishing lambs, 3160
Portal Vein
Ryegrass-based diet and barley supplementation: Partition of energy-yielding nutrients among splanchnic tissues and hind limbs in finishing lambs, 1068
Postpartum
Influence of body condition at calving and postpartum nutrition on endocrine function and reproductive performance of primiparous beef cows, 3107
Postmortem Changes
Effect of sire on μ- and m-calpain activity and rate of tenderization as indicated by myofibril fragmentation indices of steaks from Brahman cattle, 2440
Postpartum Period
Nutritional- and suckling-mediated anovulation in beef cows, 48
Oxytocin-induced secretion of prostaglandin $F_{2\alpha}$ in postpartum beef cows: Effects of progesterone and estradiol-17β treatment, 1830
Postweaning Interval
Impact of energy intake and pregnancy status on rate and efficiency of gain and backfat changes of sows postweaning, 209
Potatoes
Influence of steam-peeled potato-processing waste inclusion level in beef finishing diets: Effects on digestion, feedlot performance, and meat quality, 2675
Potato Starch
Effects of butyrate on apoptosis in the pig colon and its consequences for skatole formation and tissue accumulation, 239
Poultry
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Quantitative trait locus detection in commercial broiler lines using candidate regions, 1158
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Predicted Difference
Evaluation of age of dam effects on maternal performance of multilactation daughters from high- and low-milk EPD sires at three locations in the Southern United States, 1693
Evaluation of maternal performance of daughters from high and low milk EPD sires, 1406
Prediction
Accuracy of predicting weight and percentage of beef carcass retail product using ultrasound and live animal measures, 466
Prediction of retail product weight and percentage using ultrasound and carcass measurements in beef cattle, 1736
Ractopamine treatment biases in the prediction of pork carcass composition, 16
Relationships of consumer sensory ratings, marbling score, and shear force value to consumer acceptance of beef strip loin steaks, 2741
Risk-adjusted expected return for selection decisions, 2984
The multifactorial nature of food intake control, 139
Pregnancy
Effect of dietary fat sources on systemic and intrauterine synthesis of prostaglandins during early pregnancy in gilts, 726
Effect of early weaning on the performance of three-year-old, first-calf beef heifers and calves reared in the subtropics, 1136
Evaluation of the uterine environment and embryos of prepubertal gilts, 2575
Glucose clearance in grazing mares is affected by diet, pregnancy, and lactation, 1764
Impact of energy intake and pregnancy status on rate and efficiency of gain and backfat changes of sows postweaning, 209
Parturition body size and body protein loss during lactation influence performance during lactation and ovarian function at weaning in first-parity sows, 1517
Specific window of prolactin inhibition in late gestation decreases mammary parenchymal tissue development in gilts, 1823
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: II. Pregnancy and economics, 563
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: I. Performance, forage intake, and nutrient balance, 800
The effect of breed and intrauterine crowding on fetal erythropoiesis on day 35 of gestation in swine, 2352
The effect of pregnancy on visceral growth and energy use in beef heifers, 1853
Prepartum Period
Effects of feeding supplemental fat to beef cows on cold tolerance in newborn calves, 885
Prepubertal Females
Evaluation of the uterine environment and embryos of prepubertal gilts, 2575
Probiotics
Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Effects of bacterial direct-fed microbials and yeast on site and extent of digestion, blood chemistry, and subclinical ruminal acidosis in feedlot cattle, 1628
Problem Analysis
Critical perspectives of animal agriculture: Introduction, 2880
Processing
Effects of moisture, roller setting, and saponin-based surfactant on barley processing, ruminal degradation of barley, and growth performance by feedlot steers, 2145
Evaluating processing temperature and feeding value of extruded-expelled soybean meal on nursery and finishing pig growth performance, 2032

On-line prediction of yield grade, longissimus muscle area, preliminary yield grade, adjusted preliminary yield grade, and marbling score using the MARC beef carcass image analysis system, 150
Profitability
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: II. Pregnancy and economics, 563
Progeny
Evaluation of maternal performance of daughters from high and low milk EPD sires, 1406
Progeny Testing
Evaluation of age of dam effects on maternal performance of multilactation daughters from high- and low-milk EPD sires at three locations in the Southern United States, 1693
Progesterone
Domperidone can ameliorate deleterious reproductive effects and reduced weight gain associated with fescue toxicosis in heifers, 2568
Influence of estradiol, progesterone, and nutrition on concentrations of gonadotropins and GnRH receptors, and abundance of mRNA for GnRH receptors and gonadotropin subunits in pituitary glands of beef cows, 269
Plasma gonadotropins and ovarian hormones during the estrous cycle in high compared to low ovulation rate gilts, 249
Progesterone increases susceptibility of gilts to uterine infections after intrauterine inoculation with infectious bacteria, 1242
Role of ovarian progesterone and potential role of prostaglandin $F_{2\alpha}$ and prostaglandin E_2 in modulating the uterine response to infectious bacteria in postpartum ewes, 285
Progestogens
Resynchronization of estrus in cattle of unknown pregnancy status using estrogen, progesterone, or both, 1681
Supplemental norgestomet, progesterone, or melengestrol acetate increases pregnancy rates in suckled beef cows after timed inseminations, 571
The effects of varying the interval from follicular wave emergence to progestin withdrawal on follicular dynamics and the synchrony of estrus in beef cattle, 1562
Prolactin
Effects of prolactin administered to a perfused area of the skin of Angora goats, 279
Specific window of prolactin inhibition in late gestation decreases mammary parenchymal tissue development in gilts, 1823
Thyrotropin releasing hormone interactions with growth hormone secretion in horses, 2343
Prolificacy
Estimates of genetic parameters and genetic change for reproduction, weight, and wool characteristics of Targhee sheep, 630
Propionibacterium freudenreichii
Effects of live cultures of *Lactobacillus acidophilus* (strains NP45 and NP51) and *Propionibacterium freudenreichii* on performance, carcass, and intestinal characteristics, and *Escherichia coli* strain O157 shedding of finishing beef steers, 2686
Propionic Acid
Effect of chromium propionate and metabolizable energy on growth, carcass traits, and pork quality of growing-finishing pigs, 191
Propylthiouracil
Ovarian cyclicity in thyroid-suppressed ewes treated with propylthiouracil immediately before onset of seasonal anestrus, 29
Prostacyclin
Estradiol plus progesterone treatment modulates select elements of the proinflammatory cytokine cascade in steers: Attenuated nitric oxide and thromboxane B_2 production in endotoxemia, 1546
Prostaglandins
Effect of dietary fat sources on systemic and intrauterine synthesis of prostaglandins during early pregnancy in gilts, 726
Influence of hormone supplementation to extended semen on artificial insemination, uterine contractions, establishment of a sperm reservoir, and fertility in swine, 821
Oxytocin-induced secretion of prostaglandin $F_{2\alpha}$ in postpartum beef cows: Effects of progesterone and estradiol-17β treatment, 1830
Role of ovarian progesterone and potential role of prostaglandin $F_{2\alpha}$ and prostaglandin E_2 in modulating the uterine response to infectious bacteria in postpartum ewes, 285
Supplemental norgestomet, progesterone, or melengestrol acetate increases pregnancy rates in suckled beef cows after timed inseminations, 571
Protected Fat
Carcass, sensory, and adipose tissue traits of Brangus steers fed casein-formaldehyde-protected starch and/or canola lipid, 2457
Proteinases
Effect of dietary protein on calpastatin in canine skeletal muscle, 2199
Protein
Effect of microbial phytase on energy availability, and lipid and protein deposition in growing swine, 2053
Growth, nutrient utilization, and body composition of dairy calves fed milk replacers containing different amounts of protein, 1641
Influence of oscillating dietary crude protein concentration on performance, acid-base balance, and nitrogen excretion of steers, 2660
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Simplified in situ method for estimating ruminal dry matter and protein degradability of concentrates, 520
Simulating the partitioning of dietary amino acids: New directions, 60
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: II. Pregnancy and economics, 563
Supplementation to meet metabolizable protein requirements of primiparous beef heifers: I. Performance, forage intake, and nutrient balance, 800
Protein Degradation
Characterization of season and sampling method effects on measurement of forage quality in fescue-based pastures, 1308
Effects of urea infusion and ruminal degradable protein concentration on microbial growth, digestibility, and fermentation in continuous culture, 329
Undegradable intake protein supplementation of compensating spring-born steers and summer-born steers during summer grazing, 791
Protein Breakdown
Porcine leptin inhibits protein breakdown and stimulates fatty acid oxidation in C_2C_{12} myotubes, 3046
Protein Catabolites
A dose-response experiment evaluating the effects of oligofructose and inulin on nutrient digestibility, stool quality, and fecal protein catabolites in healthy adult dogs, 3057
Protein Digestion
Pancreatic exocrine secretion in steers infused postruminally with casein and cornstarch, 1051
Protein Intake
Parturition body size and body protein loss during lactation influence performance during lactation and ovarian function at weaning in first-parity sows, 1517
Selective protein loss in lactating sows is associated with reduced litter growth and ovarian function, 753
Undegradable intake protein supplementation of compensating spring-born steers and summer-born steers during summer grazing, 791
Protein Loss
Selective protein loss in lactating sows is associated with reduced litter growth and ovarian function, 753
Protein Sources
Effect of Irradiation of Individual Feed Ingredients and the Complete Diet on Nursery Pig Performance, 1799
Protein Synthesis
Porcine leptin inhibits protein breakdown and stimulates fatty acid oxidation in C_2C_{12} myotubes, 3046
Protein Turnover
Protein turnover and sensory traits of longissimus muscle from implanted and nonimplanted heifers, 1728
Proteolysis
Chilling and cooking rate effects on some myofibrillar determinants of tenderness of beef, 1473
Effect of age at slaughter on carcass traits and meat quality of Italian heavy pigs, 2448
Effect of sire on μ- and m-calpain activity and rate of tenderization as indicated by myofibril fragmentation indices of steaks from Brahman cattle, 2440

Puberty
Age at puberty, total fat and conjugated linoleic acid content of carcass, and circulating metabolic hormones in beef heifers fed a diet high in linoleic acid beginning at four months of age, 261
Growth and pubertal development in Brahman-, Boran-, Tuli-, Belgian Blue-, Hereford- and Angus-sired F1 bulls, 1414
Purines
Diet and procedures used to detach particle-associated microbes from ruminal digesta influence chemical composition of microbes and estimation of microbial growth in Rusitec fermenters, 537
Pyruvate Carboxylase
Dexamethasone and colostrum feeding differently affect hepatic gluconeogenic enzymes in neonatal calves, 3095

Q

Quality
Effect of chromium propionate and metabolizable energy on growth, carcass traits, and pork quality of growing-finishing pigs, 191
Effect of feather meal on live animal performance and carcass quality and composition of growing-finishing swine, 172
Effects of implant regimens (trenbolone acetate-estradiol administered alone or in combination with zeranol) and vitamin D_3 on fresh beef color and quality, 135
Growth performance, carcass and pork quality of finisher pigs fed oat-based diets containing different levels of β-glucans, 449
Quality Controls
Effects of blood meal pH and irradiation on nursery pig performance, 1013
Quantitative Polymerase Chain Reaction
Molecular ecological analysis of porcine ileal microbiota responses to antimicrobial growth promoters, 3035
Quantitative Trait Loci
Detection of quantitative trait loci for fat androstenone levels in pigs, 385
Detection of quantitative trait loci for growth and carcass composition in cattle, 2976
Detection of quantitative trait loci for growth and beef carcass fatness traits in a cross between *Bos taurus* (Angus) and *Bos indicus* (Brahman) cattle, 1933
Fine mapping a quantitative trait locus affecting ovulation rate in swine on chromosome 8, 1706
Fine mapping of quantitative trait loci and assessment of positional candidate genes for backfat on bovine chromosome 14 in a commercial line of *Bos taurus*, 1919
Full pedigree quantitative trait locus analysis in commercial pigs using variance components, 2155
Quantitative trait loci analysis for growth and carcass traits in a Meishan × Duroc F2 resource population, 2938
Quantitative trait locus detection in commercial broiler lines using candidate regions, 1158

R

Rabbits
Relationships between uterine and fetal traits in rabbits selected on uterine capacity, 1265
Ractopamine
The effects of ractopamine on the behavior and physiology of finishing pigs, 416
Radio
Liquid supplement and forage intake by range beef cows, 294
Radioimmunoassay
Technical note: Time-resolved immunofluorometric assay for growth hormone in ruminants, 1294
Rams
Use of naloxone challenge to predict sexual challenge performance of young rams, 2111
Range Pastures
Influence of grazing dormant native range or winter wheat pasture on subsequent finishing cattle performance, carcass characteristics and ruminal metabolism, 3191
Rate
Chilling and cooking rate effects on some myofibrillar determinants of tenderness of beef, 1473
Rats
Comparison of the enzyme-hydrolyzed casein, guanidination, and isotope dilution methods for determining ileal endogenous protein flow in the growing rat and pig, 2525
Receptors
Association of single nucleotide polymorphisms in the growth hormone and growth hormone receptor genes with blood serum insulin-like growth factor I concentration and growth traits in Angus cattle, 641
Effect of photoperiod on hepatic growth hormone receptor 1A expression in steer calves, 1440
Evaluation of *melatonin receptor 1a* as a candidate gene influencing reproduction in an autumn-lambing sheep flock, 912
Leptin, Tumor Necrosis Factor-α (TNF), and CD14 in Ovine Adipose Tissue and Changes in Circulating TNF in Lean and Fat Sheep, 2590
Recombinant DNA
Detection of corn intrinsic and recombinant DNA fragments and Cry1Ab protein in the gastrointestinal contents of pigs fed genetically modified corn Bt11, 2546
Recommended Methods
A survey of methods of analysis for minerals in feedstuffs, 3218
Rectal Prolapse
Length of docked tail and the incidence of rectal prolapse in lambs, 2725
Reference Methods
A survey of methods of analysis for minerals in feedstuffs, 3218
Regression Analysis
Analyses of growth curves of Nellore cattle by multiple-trait and random regression models, 918
Genetic evaluation of growth in Nellore cattle by multiple-trait and random regression models, 927
Repeatability
Challenges in measuring insoluble dietary fiber, 3233
Estimation of genetic parameters for ultrasound-predicted percentage of intramuscular fat in Angus cattle using random regression models, 35
Reproducibility
Challenges in measuring insoluble dietary fiber, 3233
Reproduction
Direct and correlated responses to selection for yearling weight on reproductive performance of Nelore cows, 376
Effect of supplemental nutrient source on heifer growth and reproductive performance, and on utilization of corn silage-based diets by beef steers, 2367
Effects of lasalocid on circulating concentrations of leptin and insulin-like growth factor-I and reproductive performance of postpartum Brahman cows, 1363
Evaluation of *melatonin receptor 1a* as a candidate gene influencing reproduction in an autumn-lambing sheep flock, 912
Nutritional- and suckling-mediated anovulation in beef cows, 48
Ovarian cyclicity in thyroid-suppressed ewes treated with propylthiouracil immediately before onset of seasonal anestrus, 29
Performance of sows fed high levels of nonstarch polysaccharides during gestation and lactation over three parities, 2247
Plasma reduced folates, reproductive performance, and conceptus development in sows in response to supplementation with oxidized and reduced sources of folic acid, 735
Reproductive Performance
Parturition body size and body protein loss during lactation influence performance during lactation and ovarian function at weaning in first-parity sows, 1517
Selective protein loss in lactating sows is associated with reduced litter growth and ovarian function, 753
The importance of a high feed intake during lactation of primiparous sows nursing large litters, 594
Research
Postmodernism for animal scientists, 2989
Residual Feed Intake
Estimates of genetic parameters and selection strategies to improve the economic efficiency of postweaning growth in lambs, 2704
Resistance
Pre-harvest factors influencing the acid resistance of *Escherichia coli* and *E. coli* O157:H7, 1080

Sleep time following anesthesia in mouse lines selected for resistance or susceptibility to fescue toxicosis, 2562
Resource Allocation
Reallocation of body resources in lactating mice highly selected for litter size, 939
Restricted Feeding
Combinations of alfalfa hay and wet corn gluten feed in limit-fed growing diets for beef cattle, 1671
Stock-piled forage or limit-fed corn as alternatives to hay for gestating and lactating beef cows, 1099
Retail Marketing
Retail yields from beef chuck and round subprimals from two grade groups when merchandised as single muscle cuts, 1482
Returns
Risk-adjusted expected return for selection decisions, 2984
Ribosomal Ribonucleic Acid
Technical note: Specific PCR amplification of protozoal 18S rDNA sequences from DNA extracted from ruminal samples of cows, 812
Ribosomal RNA
Identification of mitochondrial DNA substitutions related to meat quality in Japanese Black cattle, 68
Risk
Risk-adjusted expected return for selection decisions, 2984
Roughage
Effects of roughage source and level on intake by feedlot cattle, 8
Rumen
Diet and procedures used to detach particle-associated microbes from ruminal digesta influence chemical composition of microbes and estimation of microbial growth in Rusitec fermenters, 537
Effects of 9,10 anthraquinone on ruminal fermentation, total-tract digestion, and blood metabolite concentrations in sheep, 323
Effects of urea infusion and ruminal degradable protein concentration on microbial growth, digestibility, and fermentation in continuous culture, 329
Effects of volatile fatty acid supply on their absorption and on water kinetics in the rumen of sheep sustained by intragastric infusions, 2609
Influence of fibrolytic enzymes on the hydrolysis and fermentation of pure cellulose and xylan by mixed ruminal microorganisma in vitro, 1040
Simplified in situ method for estimating ruminal dry matter and protein degradability of concentrates, 520
Rumen Contents
Composition and digestive tract retention time of ruminal particles with functional specific gravity greater or less than 1.02, 2639
Rumen Development
Effects of small ruminal boluses used for electronic identification of lambs on the growth and development of the reticulorumen, 879
Rumen Digestion
Effects of moisture, roller setting, and saponin-based surfactant on barley processing, ruminal degradation of barley, and growth performance by feedlot steers, 2145
Rumen Epithelium
Effects of small ruminal boluses used for electronic identification of lambs on the growth and development of the reticulorumen, 879
Rumen Fermentation
Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Effects of enzyme supplementation of a total mixed ration on microbial fermentation in continuous culture, maintained at high and low pH, 2617
Rumen Microorganisms
Technology to complement forage-based beef production systems in the West, 18
Rumen Protozoa
Technical note: Specific PCR amplification of protozoal 18S rDNA sequences from DNA extracted from ruminal samples of cows, 812
Ruminants
Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Effect of soil type and fertilization level on mineral concentration of pasture: Potential relationships to ruminant performance and health, 1603
Pancreatic exocrine secretion in steers infused postruminally with casein and cornstarch, 1051
Screening of exogenous enzymes for ruminant diets: Relationship between biochemical characteristics and in vitro ruminal degradation, 2628
Tannins for suppression of internal parasites, 102
The history of energetic efficiency research: Where have we been and where are we going?, 27
Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37

S

Salmonella
Effect of feeding the ionophores monensin and laidlomycin propionate and the antimicrobial bambermycin to sheep experimentally infected with *E. coli* O157:H7 and *Salmonella typhimurium*, 553
Science Education
Internationalization of the Animal Science undergraduate curriculum: A survey of its current status, barriers to its implementation and its value, 1088
Scientists
Postmodernism for animal scientists, 2989
Scours
Response of early-weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, 1781
Screening
Screening of exogenous enzymes for ruminant diets: Relationship between biochemical characteristics and in vitro ruminal degradation, 2628
Seasonal Variation
Season of the year influences testosterone secretion in bulls administered luteinizing hormone, 1023
Selection
Bayesian inference about parameters of a longitudinal trajectory when selection operates on a correlated trait, 2714
Correlated Response in Placental Efficiency in Swine Selected for an Index of Components of Litter Size, 74
Direct and correlated responses to selection for yearling weight on reproductive performance of Nelore cows, 376
Estimates of genetic parameters and selection strategies to improve the economic efficiency of postweaning growth in lambs, 2704
Evaluation of *melatonin receptor la* as a candidate gene influencing reproduction in an autumn-lambing sheep flock, 912
Genetic Parameter Estimates for Serum Insulin-Like Growth Factor-I Concentration and Ultrasound Measurements of Backfat Thickness and Longissimus Muscle Area in Angus Beef Cattle, 2164
Investigation of breeding strategies to increase the probability that German shepherd dog and Labrador retriever dog guides would attain optimum size, 2950
Reallocation of body resources in lactating mice highly selected for litter size, 939
Reducing the cost of beef production through genetic improvement in residual feed intake: Opportunity and challenges to application, 9
Results from nine generations of selection for increased litter size in swine, 624
Serum urea concentration as a predictor of dietary lysine requirement in selected lines of pigs, 91
Selection Index
Evaluation of strategies for selection for lean growth rate in pigs, 1150
Genetic evaluation of an index of birth weight and yearling weight to improve efficiency of beef production, 2425
Selection Responses
Genetic evaluation of an index of birth weight and yearling weight to improve efficiency of beef production, 2425
Selenium
Effects of supplementary selenium source on the performance and blood measurements in beef cows and their calves, 856
Some recollections of early swine research with selenium and vitamin E, 145

Semen
Effect of boar exposure at time of insemination on factors influencing fertility in gilts, 9
Growth and pubertal development in Brahman-, Boran-, Tuli-, Belgian Blue-, Hereford- and Angus-sired F1 bulls, 1414
Influence of hormone supplementation to extended semen on artificial insemination, uterine contractions, establishment of a sperm reservoir, and fertility in swine, 821
Seminal Plasma
Uterine immune reaction and reproductive performance of sows inseminated with extended semen and infused with pooled whole dead semen, 2818
Serum
Effect of spray-dried bovine serum on intake, health, and growth of broilers housed in different environments, 2776
Sex
Lipogenic enzyme activities in different adipose depots of Pirenaican and Holstein bulls and heifers taking into account adipocyte size, 432
Sheep
Content of ileal EAAC1 and hepatic GLT-1 high-affinity glutamate transporters is increased in growing vs. nongrowing lambs, paralleling increased tissue D- L-glutamate, plasma glutamine, and alanine concentrations, 1030
Dehydration in stressed ruminants may be the result of a cortisol-induced diuresis, 512
Discrete time survival analysis of lamb mortality in a terminal sire composite population, 1399
Effect of feeding the ionophores monensin and laidlomycin propionate and the antimicrobial bambermycin to sheep experimentally infected with *E. coli* O157:H7 and *Salmonella typhimurium*, 553
Estimates of genetic parameters and selection strategies to improve the economic efficiency of postweaning growth in lambs, 2704
Evaluation of *melatonin receptor la* as a candidate gene influencing reproduction in an autumn-lambing sheep flock, 912
Evaluation of the South African Dorper as a terminal sire breed for growth, carcass, and palatability characteristics, 368
Expected increases in genetic merit from using optimized contributions in two livestock populations of beef cattle and sheep, 2964
Length of docked tail and the incidence of rectal prolapse in lambs, 2725
Leptin, Tumor Necrosis Factor-α (TNF), and CD14 in Ovine Adipose Tissue and Changes in Circulating TNF in Lean and Fat Sheep, 2590
Ovarian cyclicity in thyroid-suppressed ewes treated with propylthiouracil immediately before onset of seasonal anestrus, 29
Role of ovarian progesterone and potential role of prostaglandin $F_{2\alpha}$ and prostaglandin E_2 in modulating the uterine response to infectious bacteria in postpartum ewes, 285
Silage
Effect of grain processing and silage on microbial protein synthesis and nutrient digestibility in beef cattle fed barley-based diets, 1057
Simmental
Estimated copper requirement of Angus and Simmental heifers, 865
Genetic parameters for carcass traits and their live animal indicators in Simmental cattle, 1427
Simulation
Simulating the partitioning of dietary amino acids: New directions, 60
Simulation Models
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Predicting the consequences of social stressors on pig food intake and performance, 2995
Production and economic potentials of cattle in pasture-based systems of the western Amazon region of Brazil, 2923
Slow fiber cluster pattern in pig longissimus thoracis muscle: Implications for myogenesis, 973
Sires
The growth performance of the progeny of two swine sire lines reared under different floor space allowances, 1126
16S rDNA Polymerase Chain Reaction-Denaturing Gradient Gel Electrophoresis
Molecular ecological analysis of porcine ileal microbiota responses to antimicrobial growth promoters, 3035
Skatole
Effects of butyrate on apoptosis in the pig colon and its consequences for skatole formation and tissue accumulation, 239
Skeletal Muscle
Complementary DNA macroarray analyses of differential gene expression in porcine fetal and postnatal muscle, 2179
Effect of dietary protein on calpastatin in canine skeletal muscle, 2199
Recent Advances that Impact Skeletal Muscle Growth and Development Research, 1
Slaughter
Endocrine, blood metabolite, and meat quality changes in goats as influenced by short-term, preslaughter stress, 1499
Small Intestine
The effect of pregnancy on visceral growth and energy use in beef heifers Introduction, 1853
Social Stress
Predicting the consequences of social stressors on pig food intake and performance, 2995
Society
Critical perspectives in animal agriculture: A response, 2908
Postmodernism for animal scientists, 2989
Somatoliberin
Effects of plasmid-mediated growth hormone releasing hormone supplementation in young, healthy Beagle dogs, 2301
Somatotropin
Abundance of message for insulin-like growth factors-I and -II and for receptors for growth hormone, insulin-like growth factors-I and -II, and insulin in the intestine and liver of pre- and full-term calves, 2294
A gonadotropin-releasing factor vaccine (Improvac) and porcine somatotropin have synergistic and additive effects on growth performance in group-housed boars and gilts, 1959
Association of single nucleotide polymorphisms in the growth hormone and growth hormone receptor genes with blood serum insulin-like growth factor I concentration and growth traits in Angus cattle, 641
Effect of photoperiod on hepatic growth hormone receptor 1A expression in steer calves, 1440
Effects of growth hormone and feeding level on endocrine measurements, hormone receptors, muscle growth and performance of prepubertal heifers, 2189
Effects of plasmid-mediated growth hormone releasing hormone supplementation in young, healthy Beagle dogs, 2301
Endocrine responses in mares and geldings with high body condition scores grouped by high vs. low resting leptin concentrations, 2311
Hormonal regulation of calcium homeostasis in two breeds of dogs during growth at different rates, 1568
Technical note: Time-resolved immunofluorometric assay for growth hormone in ruminants, 1294
The Effect of Dietary Energy Source on Serum Concentration of Insulin-like Growth Factor-I, Growth Hormone, Insulin, Glucose, and Fat Metabolites in Weanling Horses, 1581
The ontogeny of the somatotropic axis in male and female Hereford calves from birth to one year of age, 2811
Thyrotropin releasing hormone interactions with growth hormone secretion in horses, 2343
Sows
Bioeconomic evaluation of sow longevity and profitability, 2915
Duration of Lactation, Endocrine and Metabolic State, and Fertility of Primiparous Sows, 2088
Effect of ambient temperature on mammary gland metabolism in lactating sows, 217
Effects of dietary electrolyte balance on the chemistry of blood and urine in lactating sows and sow litter performance, 3067
Effects of dietary fiber on performance of multiparous lactating sows in a tropical climate, 717
Efficacy of sucrose and milk chocolate product or dried porcine solubles to increase feed intake and improve performance of lactating sows, 2475
Fender design and insulation of farrowing huts: effects on performance of outdoor sows and piglets, 955
Impact of energy intake and pregnancy status on rate and efficiency of gain and backfat changes of sows postweaning, 209
Parturition body size and body protein loss during lactation influence performance during lactation and ovarian function at weaning in first-parity sows, 1517

Performance of sows fed high levels of nonstarch polysaccharides during gestation and lactation over three parities, 2247
Plasma reduced folates, reproductive performance, and conceptus development in sows in response to supplementation with oxidized and reduced sources of folic acid, 735
Quantification of mammary gland tissue size and composition changes after weaning in sows, 2583
Selective protein loss in lactating sows is associated with reduced litter growth and ovarian function, 753
Specific window of prolactin inhibition in late gestation decreases mammary parenchymal tissue development in gilts, 1823
The importance of a high feed intake during lactation of primiparous sows nursing large litters, 594
Soyabean Oilmeal
Effects of supplemental energy and/or degradable intake protein on performance, grazing behavior, intake, digestibility, and fecal and blood indices by beef steers grazed on dormant native tallgrass prairie, 304
Soybean Husks
Effect of supplemental nutrient source on heifer growth and reproductive performance, and on utilization of corn silage-based diets by beef steers, 2367
Soybean Oil
Effectiveness of short-term feeding strategies for altering conjugated linoleic acid content of beef, 1862
Effects of increasing dietary L-carnitine on growth performance of weanling pigs, 2259
Soybean Oilmeal
Determination of True Digestive Utilization of Phosphorus and the Endogenous Phosphorus Outputs Associated with Soybean Meal for Growing Pigs, 2766
Effects of soybean meal particle size on growth performance of nursery pigs, 2118
Evaluating processing temperature and feeding value of extruded-expelled soybean meal on nursery and finishing pig growth performance, 2032
Use of carbohydrases in corn–soybean meal-based nursery diets, 2496
Soybeans
Determining whether transgenic and endogenous plant DNA and transgenic protein are detectable in muscle from swine fed Roundup Ready soybean meal, 1447
Effect of soybean meal particle size on amino acid and energy digestibility in grower-finisher swine, 697
Spatial Distribution
Slow fiber cluster pattern in pig longissimus thoracis muscle: Implications for myogenesis, 973
Specific Gravity
Composition and digestive tract retention time of ruminal particles with functional specific gravity greater or less than 1.02, 2639
Spermatozoa
Effect of capacitation of stallion sperm with polyvinylalcohol or bovine serum albumin on penetration of bovine zona-free or partially zona-removed equine oocytes, 2080
Fertility assessment through heterospermic insemination of flow-sorted sperm in cattle, 1814
Spray Drying
Effect of spray-dried bovine serum on intake, health, and growth of broilers housed in different environments, 2776
Stallion
Effect of capacitation of stallion sperm with polyvinylalcohol or bovine serum albumin on penetration of bovine zona-free or partially zona-removed equine oocytes, 2080
Effects of deslorelin acetate implants in horses: Single implants in stallions and steroid-treated geldings and multiple implants in mares, 1300
Standards
Design and standards for genetic evaluation of swine seedstock populations, 2409
Starch
Carcass, sensory, and adipose tissue traits of Brangus steers fed casein-formaldehyde-protected starch and/or canola lipid, 2457
Challenges with nonfiber carbohydrate methods, 3226
Starch Digestion
Pancreatic exocrine secretion in steers infused postruminally with casein and cornstarch, 1051
Statistical Analysis
A mixture model-based cluster analysis of DNA microarray gene expression data on Brahman and Brahman composite steers fed high-, medium-, and low-quality diets, 1900
Steaks
Color stability of semitendinosus, semimembranosus, and biceps femoris steaks packaged in a high-oxygen modified atmosphere, 2230
Steers
A dose-response study of melengestrol acetate on feedlot performance and carcass characteristics of beef steers, 2699
Effectiveness of short-term feeding strategies for altering conjugated linoleic acid content of beef, 1862
Effect of supplemental nutrient source on heifer growth and reproductive performance, and on utilization of corn silage-based diets by beef steers, 2367
Effects of flax supplementation and a combined trenbolone acetate and estradiol implant on circulating insulin-like growth factor-I and muscle insulin-like growth factor-I messenger RNA levels in beef cattle, 3028
Growth factor messenger RNA levels in muscle and liver of steroid-implanted and nonimplanted steers, 965
Time course of changes in growth factor mRNA levels in muscle of steroid-implanted and nonimplanted steers, 2733
Steroids
Oxytocin-induced secretion of prostaglandin $F_{2\alpha}$ in postpartum beef cows: Effects of progesterone and estradiol-17β treatment, 1830
Stillbirths
Stillbirth in the pig in relation to genetic merit for farrowing survival, 2419
Stimuli
The effect of stimulus height on visual discrimination in horses, 1715
Stochastic Processes
Slow fiber cluster pattern in pig longissimus thoracis muscle: Implications for myogenesis, 973
Stockpiling
Stock-piled forage or limit-fed corn as alternatives to hay for gestating and lactating beef cows, 1099
Stress
Dehydration in stressed ruminants may be the result of a cortisol-induced diuresis, 512
Effect of ketoprofen, lidocaine local anesthesia, and combined xylazine and lidocaine caudal epidural anesthesia during castration of beef cattle on stress responses, immunity, growth, and behavior, 1281
Effect of repeated ketoprofen administration during surgical castration of bulls on cortisol, immunological function, feed intake, growth, and behavior, 1253
Endocrine, blood metabolite, and meat quality changes in goats as influenced by short-term, preslaughter stress, 1499
Environmental stress in confined beef cattle, 110
The effect of abrupt weaning of suckler calves on the plasma concentrations of cortisol, catecholamines, leukocytes, acute-phase proteins and in vitro interferon-gamma production, 2847
Strongylidae
Mortality of Creole kids during infection with gastrointestinal strongyles: A survival analysis, 2401
Subcutaneous Injection
The effect of vitamin E supplementation on discoloration of injection-site lesions in retail cuts and the greening reaction observed in injection-site lesions in muscles of the chuck, 1885
Substitution
Effects of *DGAT1* variants on milk production traits in German cattle breeds, 1911
Sucrose
Effect of carbohydrate source on growth performance, carcass traits, and meat quality of growing-finishing pigs, 2488
Efficacy of sucrose and milk chocolate product or dried porcine solubles to increase feed intake and improve performance of lactating sows, 2475
Sugars
Challenges with nonfiber carbohydrate methods, 3226
Supplementary Feeding
Early weaning to reduce tissue mobilization in lactating sows and milk supplementation to enhance pig weaning weight during extreme heat stress, 2041
Supplement Feeding Programs
Effects of supplemental energy and/or degradable intake protein on performance, grazing behavior, intake, digestibility, and fecal and blood indices by beef steers grazed on dormant native tallgrass prairie, 304

Surfactants
Effects of moisture, roller setting, and saponin-based surfactant on barley processing, ruminal degradation of barley, and growth performance by feedlot steers, 2145
Surveys
A Long-term Study of Knowledge, Risk and Ethics for Students Enrolled in an Introductory Biotechnology Course, 1348
Internationalization of the Animal Science undergraduate curriculum: A survey of its current status, barriers to its implementation and its value, 1088
Survival
Bioeconomic evaluation of sow longevity and profitability, 2915
Discrete time survival analysis of lamb mortality in a terminal sire composite population, 1399
Effects of feeding supplemental fat to beef cows on cold tolerance in newborn calves, 885
Mortality of Creole kids during infection with gastrointestinal strongyles: A survival analysis, 2401
Susceptibility
Sleep time following anesthesia in mouse lines selected for resistance or susceptibility to fescue toxicosis, 2562
Sustainability
Production and economic potentials of cattle in pasture-based systems of the western Amazon region of Brazil, 2923
Swine
Design and standards for genetic evaluation of swine seedstock populations, 2409
Porcine leptin inhibits lipogenesis in porcine adipocytes, 3008
Swine manure composition affects the biochemical origins, composition, and accumulation of odorous compounds, 2131
Swine Housing
Performance of finishing pigs in hoop structures and confinement during winter and summer, 1663
Synchronization
A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166
Synchronization
Resynchronization of estrus in cattle of unknown pregnancy status using estrogen, progesterone, or both, 1681
Supplemental norgestomet, progesterone, or melengestrol acetate increases pregnancy rates in suckled beef cows after timed inseminations, 571
Synchronization of *Bos indicus* × *Bos taurus* cows for timed artificial insemination using gonadotropin-releasing hormone plus prostaglandin $F_{2\alpha}$ in combination with melengestrol acetate, 830
Synchronized Females
The effects of varying the interval from follicular wave emergence to progestin withdrawal on follicular dynamics and the synchrony of estrus in beef cattle., 1562

T

Tail
Length of docked tail and the incidence of rectal prolapse in lambs, 2725
Tannins
Tannins for suppression of internal parasites, 102
Teaching
Diet and evaluators affect perception of swine waste odor: An educational demonstration, 3211
Experiential learning in the animal sciences: Development of a multispecies large animal management and production practicum, 3202
Teat Score
Simulation study of teat score in first-parity Gelbvieh cows: Parameter estimation, 2959
Temperature
Effect of ambient temperature on mammary gland metabolism in lactating sows, 217
Influence of dietary protein level, amino acid supplementation, and dietary energy levels on growing-finishing pig performance and carcass composition, 3075
Influences of dietary protein level, amino acid supplementation and environmental temperature on performance, body composition, organ weights and total heat production of growing pigs, 1998
Tenderness
Beef customer satisfaction: Trained sensory panel ratings and Warner-Bratzler shear force values, 143
Characterization and consumer acceptance of three muscles from Hampshire × Rambouillet cross sheep expressing the callipyge phenotype, 2213
Chilling and cooking rate effects on some myofibrillar determinants of tenderness of beef, 1473
Effectiveness of the SmartMV Prototype BeefCam System to Sort Beef Carcasses into Expected Palatability Groups, 441
Effect of repeated administration of combination trenbolone acetate and estradiol implants on growth, carcass traits, and beef quality of long-fed Holstein steers, 2395
Effect of sire on μ- and m-calpain activity and rate of tenderization as indicated by myofibril fragmentation indices of steaks from Brahman cattle, 2440
Effects of growth implants on consumer perceptions of meat tenderness in beef steers, 3052
Effects of repetitive use of hormonal implants on beef carcass quality, tenderness, and consumer ratings of beef palatability, 984
Estimated genetic parameters for palatability traits of steaks from Brahman cattle, 54
Influence of steam-peeled potato-processing waste inclusion level in beef finishing diets: Effects on digestion, feedlot performance, and meat quality, 2675
Mechanical measures of uncooked beef longissimus muscle can predict sensory panel tenderness and Warner-Bratzler shear force of cooked steaks, 1721
Online prediction of beef tenderness using a computer vision system equipped with a BeefCam module, 457
Prerigor injection using glycolytic inhibitors in low-quality beef muscles, 997
Relationships of consumer sensory ratings, marbling score, and shear force value to consumer acceptance of beef strip loin steaks, 2741
Testes
Growth and pubertal development in Brahman-, Boran-, Tuli-, Belgian Blue-, Hereford- and Angus-sired F1 bulls, 1414
Relationships of testicular iron and ferritin concentrations with testicular weight and sperm production in boars, 503
Season of the year influences testosterone secretion in bulls administered luteinizing hormone, 1023
Testosterone
Season of the year influences testosterone secretion in bulls administered luteinizing hormone, 1023
Use of naloxone challenge to predict sexual performance of young rams, 2111
Theca Cells
Insulin-like growth factor binding proteins in granulosa and thecal cells from bovine ovarian follicles at different stages of development, 2826
Threshold Models
Evaluation models and genetic parameters for calving difficulty in beef cattle, 933
Thymus
Effects of dexamethasone on lymphoid tissue in the gut and thymus of neonatal calves fed with colostrum or milk replacer, 2322
Thyroid Gland
Ovarian cyclicity in thyroid-suppressed ewes treated with propylthiouracil immediately before onset of seasonal anestrus, 29
Thyrotropin Releasing Hormone
Thyrotropin releasing hormone interactions with growth hormone secretion in horses, 2343
Time Allocation
Retail yields from beef chuck and round subprimals from two grade groups when merchandised as single muscle cuts, 1482
Toxicity
Effects of feeding ergovaline on lamb performance in a heat stress environment, 1538
Evaluation of vaccination against methyllycaconitine toxicity in mice, 232
Sleep time following anesthesia in mouse lines selected for resistance or susceptibility to fescue toxicosis, 2562
The tocicity and kinetics of larkspur alkaloid, methyllycaconitine, in mice, 1237
Toxicosis
Use of nonergot alkaloid-producing endophytes for alleviating tall fescue toxicosis in sheep, 1316

Trace Elements
A survey of methods of analysis for minerals in feedstuffs, 3218
Trans Fatty Acids
Biohydrogenation of unsaturated fatty acids in continuous culture fermenters during digestion of orchardgrass or red clover with three levels of ground corn supplementation, 1611
Transgenic Plants
Effect of feeding glyphosate-tolerant (Roundup-Ready events GA21 or nk603) corn compared with reference hybrids on feedlot steer performance and carcass characteristics, 2600
Technology to complement forage-based beef production systems in the West, 18
Transponders
Effects of small ruminal boluses used for electronic identification of lambs on the growth and development of the reticulorumen, 879
Transport
Effect of transportation and commingling on the acute-phase protein response, growth, and feed intake of newly weaned beef calves, 1120
Quantitative analysis of acid-base balance in *Bos indicus* steers subjected to transportation of long duration, 1434
Trenbolone
Effect of repeated administration of combination trenbolone acetate and estradiol implants on growth, carcass traits, and beef quality of long-fed Holstein steers, 2395
Growth factor messenger RNA levels in muscle and liver of steroid-implanted and nonimplanted steers, 965
Trenbolone Acetate
Effects of flax supplementation and a combined trenbolone acetate and estradiol implant on circulating insulin-like growth factor-I and muscle insulin-like growth factor-I messenger RNA levels in beef cattle, 3028
Time course of changes in growth factor mRNA levels in muscle of steroid-implanted and nonimplanted steers, 2733
Trifolium pratense
Biohydrogenation of unsaturated fatty acids in continuous culture fermenters during digestion of orchardgrass or red clover with three levels of ground corn supplementation, 1611
Triiodothyronine
Endocrine responses in mares and geldings with high body condition scores grouped by high vs. low resting leptin concentrations, 2311
Tropical Climate
Effects of dietary fiber on performance of multiparous lactating sows in a tropical climate, 717
Troponins
Amino acid sequences of multiple fast and slow troponin T isoforms expressed in adult bovine skeletal muscles, 1185
Trypsin
Influence of substrate and/or neurohormonal mimic on in vitro pancreatic enzyme release from calves postruminally infused with partially hydrolyzed starch and/or casein, 1323
Tumor Necrosis Factor
Central and peripheral concentrations of tumor necrosis factor-α in Chinese Meishan pigs stimulated with lipopolysaccharide, 1274
Estradiol plus progesterone treatment modulates select elements of the proinflammatory cytokine cascade in steers: Attenuated nitric oxide and thromboxane B_2 production in endotoxemia, 1546
Leptin, Tumor Necrosis Factor-α (TNF), and CD14 in Ovine Adipose Tissue and Changes in Circulating TNF in Lean and Fat Sheep, 2590

U

Ultrasound
Accuracy of predicting weight and percentage of beef carcass retail product using ultrasound and live animal measures, 466
Comparison of different methods to assess the composition of pig bellies in progeny testing, 1177
Genetic Parameter Estimates for Serum Insulin-Like Growth Factor-I Concentration and Ultrasound Measurements of Backfat Thickness and Longissimus Muscle Area in Angus Beef Cattle, 2164
Genetic parameters for carcass traits and their live animal indicators in Simmental cattle, 1427
Prediction of retail product weight and percentage using ultrasound and carcass measurements in beef cattle, 1736
The relationship between ultrasound measurements and carcass fat thickness and longissimus muscle area in beef cattle, 676
Universities
Value-added animal agriculture: Inclusion of Race and Gender in the Professional Formula, 2895
Urea
Effects of urea infusion and ruminal degradable protein concentration on microbial growth, digestibility, and fermentation in continuous culture, 329
Influence of dietary urea level on digestive function and growth performance of cattle fed steam-flaked barley-based finishing diets, 2383
Serum urea concentration as a predictor of dietary lysine requirement in selected lines of pigs, 91
Urea Recycling
Nitrogen metabolism and recycling in Holstein heifers, 545
Uterine Diseases
Role of ovarian progesterone and potential role of prostaglandin $F_{2\alpha}$s and prostaglandin E_2 in modulating the uterine response to infectious bacteria in postpartum ewes, 285
Uterus
Effect of fish meal supplementation on plasma and endometrial fatty acid composition in nonlactating beef cows, 2840
Evaluation of the uterine environment and embryos of prepubertal gilts, 2575
Expression of the uterine Mx protein in cyclic and pregnant cows, gilts, and mares, 1552
Oxytocin-induced secretion of prostaglandin $F_{2\alpha}$ in postpartum beef cows: Effects of progesterone and estradiol-17β treatment, 1830
Progesterone increases susceptibility of gilts to uterine infections after intrauterine inoculation with infectious bacteria, 1242
Relationships between uterine and fetal traits in rabbits selected on uterine capacity, 1265
Uterine immune reaction and reproductive performance of sows inseminated with extended semen and infused with pooled whole dead semen, 2818
Utilization
Large round bale feeder design affects hay utilization and beef cow behavior, 109

V

Vaccination
A gonadotropin-releasing factor vaccine (Improvac) and porcine somatotropin have synergistic and additive effects on growth performance in group-housed boars and gilts, 1959
Evaluation of vaccination against methyllycaconitine toxicity in mice, 232
Valine
Growth, carcass traits, and plasma amino acid concentrations of gilts fed low-protein diets supplemented with amino acids including histidine, isoleucine, and valine, 1529
Values
Science, values, and common ground, 2904
Variance Components
A comparison via simulation of least squares Lehmann-Scheffé estimators of two variances and heritability with those of restricted maximum likelihood, 1950
Full pedigree quantitative trait locus analysis in commercial pigs using variance components, 2155
Video Cameras
Effectiveness of the SmartMV Prototype BeefCam System to Sort Beef Carcasses into Expected Palatability Groups, 441
Online prediction of beef tenderness using a computer vision system equipped with a BeefCam module, 457
Villi
Use of carbohydrases in corn–soybean meal-based nursery diets, 2496
Viremia
Effect of dietary *Echinacea purpurea* on viremia and performance in porcine reproductive and respiratory syndrome virus-infected nursery pigs, 2139

Virus
The role of acidogenic diets and β-hydroxybutyate on lymphocyte proliferation and serum antibody response against bovine respiratory viruses in Holstein steers, 3088
Vision
The effect of stimulus height on visual discrimination in horses, 1715
Vitamin B_{12}
Influence of dietary cobalt source and concentration on performance, vitamin B_{12} status, and ruminal and plasma metabolites in growing and finishing steers, 3151
Vitamin E
Some recollections of early swine research with selenium and vitamin E, 145
The effect of vitamin E supplementation on discoloration of injection-site lesions in retail cuts and the greening reaction observed in injection-site lesions in muscles of the chuck, 1885
Volatile Fatty Acids
Ammonia, volatile fatty acids, phenolics, and odor offensiveness in manure from growing pigs fed diets reduced in protein concentration, 1754
Effects of volatile fatty acid supply on their absorption and on water kinetics in the rumen of sheep sustained by intragastric infusions, 2609
Pre-harvest factors influencing the acid resistance of *Escherichia coli* and *E. coli* O157:H7, 1080
Voluntary Intake
The multifactorial nature of food intake control, 139
Vomitoxin
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on feed intake, serum chemistry, and hematology of horses, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2123
Effects of feeding a blend of grains naturally contaminated with *Fusarium* mycotoxins on growth and immunological measurements of starter pigs, and the efficacy of a polymeric glucomannan mycotoxin adsorbent, 2792

W

Weaning
Effect of early weaning on the performance of three-year-old, first-calf beef heifers and calves reared in the subtropics, 1136
Effect of fishmeal replacement with spray-dried animal plasma and colistin on intestinal structure, intestinal microbiology, and performance of weanling pigs challenged with *Escherichia coli* K99, 1220
Effects of antimicrobials and weaning on porcine serum insulin-like growth factor binding protein levels, 1456
Fenceline contact of beef calves with their dams at weaning reduces the negative effects of separation on behavior and growth rate, 116
Influence of litter size and creep feeding on preweaning gain and influence of preweaning growth on growth to slaughter in barrows, 2434
Nutritional evaluation of egg byproducts in diets for early-weaned pigs, 2270
The effect of abrupt weaning of suckler calves on the plasma concentrations of cortisol, catecholamines, leukocytes, acute-phase proteins and in vitro interferon-gamma production, 2847
Weaning Weight
Estimates of genetic parameters and genetic change for reproduction, weight, and wool characteristics of Targhee sheep, 630
Weight Gain
A dynamic model of metabolizable energy utilization in growing and mature cattle. II. Metabolizable energy utilization for gain, 1382
Weight Losses
The importance of a high feed intake during lactation of primiparous sows nursing large litters, 594
Winter Wheat
Influence of grazing dormant native range or winter wheat pasture on subsequent finishing cattle performance, carcass characteristics and ruminal metabolism, 3191
Women
A Long-term Study of Knowledge, Risk and Ethics for Students Enrolled in an Introductory Biotechnology Course, 1348

X

Xylan
Influence of fibrolytic enzymes on the hydrolysis and fermentation of pure cellulose and xylan by mixed ruminal microorganisma in vitro, 1040
X-Y Separation
Fertility assessment through heterospermic insemination of flow-sorted sperm in cattle, 1814

Y

Yeasts
Effects of bacterial direct-fed microbials and yeast on site and extent of digestion, blood chemistry, and subclinical ruminal acidosis in feedlot cattle, 1628
Effects of supplementary selenium source on the performance and blood measurements in beef cows and their calves, 856
Growth performance, nutrient digestibility, and fecal microflora in weanling pigs fed live yeast , 1004
Yields
Retail yields from beef chuck and round subprimals from two grade groups when merchandised as single muscle cuts, 1482

Z

Zebu Breed
Direct and correlated responses to selection for yearling weight on reproductive performance of Nelore cows, 376
Zinc
Effect of mannan oligosaccharides on growth performance of weanling pigs, 2482
Effects of breed (Angus vs Simmental) and copper and zinc source on mineral status of steers fed high dietary iron, 318
Effects of organic forms of zinc on growth performance, tissue zinc distribution, and immune response of weanling pigs, 2063
Growth performance, nutrient digestibility, and fecal microflora in weanling pigs fed live yeast, 1004
Zinc Oxide
Response of early weaned pigs to an enterotoxigenic *Escherichia coli* (K88) challenge when fed diets containing spray-dried porcine plasma or pea protein isolate plus egg yolk antibody, zinc oxide, fumaric acid, or antibiotic, 1790

A

Acidosis
  Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
Amino Acids
  Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
  Simulating the partitioning of dietary amino acids-New directions, 60
Artificial Insemination
  A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166
  The use of controlled internal drug release devices for the regulation of bovine reproduction, 28

B

Beef Cattle
  A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166
  Effects of roughage source and level on intake by feedlot cattle, 8
  Environmental stress in confined beef cattle, 110
  The multifactorial nature of food intake control, 139
Beef Production
  Genomic and computing strategies in the optimization of the genetic component of specification beef, 24
Biotechnology
  Consumer attitudes toward biotechnology: Lessons for animal-related applications, 196
Body Composition
  Modeling chemical and physical body composition of the growing pig, 159

C

Cattle
  Controlling variation in feed intake through bunk management, 133
  Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
  The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Cellulase
  Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Cellulose Digestion
  Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Chemical Composition
  Modeling chemical and physical body composition of the growing pig, 159
Consumer Attitudes
  Consumer attitudes toward biotechnology: Lessons for animal-related applications, 196
Controlled Release
  The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Corpus Luteum
  Nitric oxide and the ovary, 1
Cow
  Nutritional- and suckling-mediated anovulation in beef cows, 48

D

Denervation
  Heterogeneity of Protein Expression within Muscle Fibers, 94
Development
  Heterogeneity of Protein Expression within Muscle Fibers, 94
Digestibility
  Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Digestion
  Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Digestive Tract
  Tannins for suppression of internal parasites, 102

E

Energy
  Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Environment
  Environmental stress in confined beef cattle, 110
  The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Enzymes
  Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Estradiol
  The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Estrous Cycle
  A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166

F

Feed Additives
  Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Feeding Behavior
  Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
Feed Intake
  Controlling variation in feed intake through bunk management, 133
  Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
  Environmental stress in confined beef cattle, 110
Feedlots
  Controlling variation in feed intake through bunk management, 133
Fiber
  Effects of roughage source and level on intake by feedlot cattle, 8
  Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37
Foodborne Diseases
  Preslaughter intervention strategies to reduce food-borne pathogens in food animals, 17
Forage
  Tannins for suppression of internal parasites, 102

G

Genetic Engineering
Consumer attitudes toward biotechnology: Lessons for animal-related applications, 196
Genetic Improvement
Genomic and computing strategies in the optimization of the genetic component of specification beef, 24
Genetic Variation
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Genome Analysis
Genomic and computing strategies in the optimization of the genetic component of specification beef, 24
Genotypes
Characterization of pig genotypes for growth modeling, 187
Gonadotropin-Releasing Hormone
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28
Growth
Characterization of pig genotypes for growth modeling, 187
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Growth Models
Modeling chemical and physical body composition of the growing pig, 159

H

Heat Production
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86

I

Insulin-Like Growth Factor
Nutritional- and suckling-mediated anovulation in beef cows, 48
Intake
Effects of roughage source and level on intake by feedlot cattle, 8
Intervention
Preslaughter intervention strategies to reduce food-borne pathogens in food animals, 17

L

Lipids
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Luteinizing Horomone
The use of controlled internal drug release devices for the regulation of bovine reproduction, 28

M

Management
Controlling variation in feed intake through bunk management, 133
Effect of bunk management on feeding behavior, ruminal acidosis and performance of feedlot cattle: A review, 149
Management Alternatives
Environmental stress in confined beef cattle, 110
Models
Characterization of pig genotypes for growth modeling, 187
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Simulating the partitioning of dietary amino acids: New directions, 60
Muscle
Heterogeneity of Protein Expression within Muscle Fibers, 94
Muscle Fibers
Heterogeneity of Protein Expression within Muscle Fibers, 94
Myosins
Heterogeneity of Protein Expression within Muscle Fibers, 94

N

Nitric Oxide
Nitric oxide and the ovary, 1
Nutrition
Tannins for suppression of internal parasites, 102

O

Ovaries
Nitric oxide and the ovary, 1
Ovarian Follicles
Nitric oxide and the ovary, 1
Ovulation
Nitric oxide and the ovary, 1
Nutritional- and suckling-mediated anovulation in beef cows, 48

P

Parasites
Tannins for suppression of internal parasites, 102
Pathogens
Preslaughter intervention strategies to reduce food-borne pathogens in food animals, 17
Phosphorus
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Physical Properties
Modeling chemical and physical body composition of the growing pig, 159
Physiology
The multifactorial nature of food intake control, 139
Phytase
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Phytin
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Pigs
Characterization of pig genotypes for growth modeling, 187
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
Modeling chemical and physical body composition of the growing individual pigs, 178
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Simulating the partitioning of dietary amino acids: New directions, 60
Some recollections of early swine research with selenium and vitamin E, 145
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Postpartum Period
Nutritional- and suckling-mediated anovulation in beef cows, 48
Poultry
Does supplemental dietary microbial phytase improve amino acid utilization? A perspective that it does not, 78
The Enviropig physiology, performance, and contribution to nutrient management advances in a regulated environment: The leading edge of change in the pork industry, 68
Prediction
The multifactorial nature of food intake control, 139

Probiotics
Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Protein
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Partitioning of energy intake to heat, protein, and fat in growing pigs, 86
Simulating the partitioning of dietary amino acids: New directions, 60

R

Reproduction
Nutritional- and suckling-mediated anovulation in beef cows, 48
Roughage
Effects of roughage source and level on intake by feedlot cattle, 8
Rumen Fermentation
Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Ruminants
Bacterial direct-fed microbials in ruminant diets: Performance response and mode of action, 120
Tannins for suppression of internal parasites, 102
Use of Exogenous Fibrolytic Enzymes to Improve Feed Utilization by Ruminants, 37

S

Selenium
Some recollections of early swine research with selenium and vitamin E, 145
Simulation
Simulating the partitioning of dietary amino acids: New directions, 60
Simulation Models
Modeling stochasticity: Dealing with populations rather than individual pigs, 178
Stress
Environmental stress in confined beef cattle, 110
Synchronization
A review of methods to synchronize estrus in replacement beef heifers and postpartum cows, 166

T

Tannins
Tannins for suppression of internal parasites, 102

V

Vitamin E
Some recollections of early swine research with selenium and vitamin E, 145
Voluntary Intake
The multifactorial nature of food intake control, 139

Subject index for Volume 81, Supplement 1 (Joint annual meeting abstracts, 2003)[1]

A

α-Linolenic acid, 3
α-Tocopherol, 55, T56
Absorption, 355
Acceleration of ripening and cholesterol removal, W291
Accession, T205
Accuracy, 382
Acid, T209
Acid and bile resistant , W264
Acid-base balance, W219
Acidosis, 112
ACTH, W128
Acute phase proteins, 621
Adaptation, 361, W120
Additives, 179, 673
Adenosine, W2
ADG, 227
ADICP, T192
ADIP amino acid profile, 674, T125
Adipocyte characteristics, 430
Adipocyte differentiation, 373
Adipocytes, 682
Adiponectin, W1
Adipose, 372, W1
Adipose metabolism, 437
Adipose tissue, 25, 27, 28
Adjustment factors, 340
Adrenergic receptors, W21
Aerobic stability, 44
Aflatoxin, 226
Aflatoxin B1, T57
AFLP, W98
Age, 483, W195
Age at puberty, T74
Aging, 1
AI, T22
AI fertility, 261
Alfalfa, T197, W229
Alfalfa and particle length, 583
Alfalfa hay, 416, T200, W199
Alfalfa silage, 179, 673
Alfalfa:corn silages, 249
Alkaloid metabolism, 61
Alpha linolenic acid, T103
Alpha-amino nitrogen, T99
Alpha-linolenic acid, 525
Alternative housing, 619
Aluminum sulfate, T178
Amaferm®, W205
Ambient temperature, 227
Amide, 135
Amino acid, 674, 675, T162
Amino acid digestibility, T200
Amino acid digestion, W191
Amino acid flow, W190
Amino acids, 98, 146, 234, T89
Ammonia, 98, 302, 305, 436, T122
Ammonia emissions, T178
Ammonia utilization, T175
Amylase, W189
Anabolic, W34
Anabolic steroid, 379
Analysis, 268
Androgen, W34
Anemia, W138
Anestrus, 500
Angiogenesis, 27
Angora goats, W127
Angus, T72
Animal health, 115
Animal identification, 678
Animal production food safety, 20, 21, 22, 23, 24
Animal transport, 542
Animal welfare, 104, 105
Anionic diets, T46
Anionic-cationic, W3
anthelmintic resistance, T51
Anti-inflammatory, 354
Antibiotic, 461
Antibiotic resistance, W194
Antibiotics, 196
Antigonadatropic decapeptide, T5
Antimicrobial, 525
Antimicrobial proteins, T210
Antimicrobial resistance, 113, 114, 115, 116, 458
Antioxidant, T80, W70
Antioxidants, T102
AO extract inhibitor, W206
AO Supplement, W203
AO supplement, W204
Apoptosis, T50, W30
Apparent digestibility, W198
Apple pomace silage, W198
Aquaculture, 651
Aroma, 169
Aroma extract dilution analysis, 35, 162
Artificial insemination, 1, 20, 263
Ascorbic acid, 59
Aspergillus flavus, T58
Aspergillus fumigatus, T58
Ass's milk, T106
Assessment, 626
Assessment of environment, 452
Assisted reproduction, 15
Associative effects, 442, W170
Atherogenicity, 177
Atretic follicle, 27
Autoaggregation, W263

B

δ-Aminolevulinic acid, T79
β Carotene, T137
β-cyclodextrin, T216, W291
β-galactosidase, T211
Bacillus, T217
Back fat, 377
Background, 106
Backgrounding, 368
Backgrounding steers, W160
Bacteria, 114, 116, W206
Bacterial Counts, T179
Bacterial fermentation residue, T140
Bactericidal, 527
Bactericidal reagents, T210
Bacteriocin, W272
Bacteriophage, 701
Bacteriophage inhibition, W275

[1]Please note: the numbers following key words in this index refer to abstract numbers, not page numbers.

Bakery's yeast, 122
Balance, T174
Balance experiment, W106
Barley, 47, 130, W135
Batch pasteurizer, T43
Bayesian inference, 631
Bedding, W249
Bedding material, T179
Beef, 229, 290, 315, 346, 428, 438, 616, T183, W148
Beef bulls, 568
Beef Cattle, 94, 143, 343, 426, 478, 589
Beef cattle, 79, 92, 96, 138, 144, 340, 341, 342, 349, 350, 352, 408, 429, 433, 436, 440, 454, 477, 481, 547, 643, 646, 657, 662, 680, T130, W97
Beef cow, 472, 661
Beef Cows, 201, 204, 205, 213
Beef cows, 145, 206, 225
Beef NRC, 667
Beef quality, 291
beef quality assurance, W247
Beef tenderness, 292
Beef-cattle, 493
Beefmaster cattle, W85
Behavior, 105, 126, 495, 620, W228
behavior, T180
Bermudagrass, W240
Bermudagrass hay, 93, 228
Beta-glucan, 59
Beta-lactam resistance, 459
Betaine, 558
Bifidobacteria, W263
Bifidobacterium, W273
Binary responses, T68
Binary traits, 448
Bio-equivalence, 601
Bioequivalence testing, 605
Biohydrogenation, 135, 576, 581, T132
Biomarker, 678
Biotechnology, 101
Biotechnology crops, 605
Biotin, T54
Birth weight, W217
Blood glucose, 432
Blood metabolites, 686, W19
Bloodmeal, 672
BLUP, 446
Bmal1, W16
Boar, T21
Boar Fertility, T22
Boars, 387, 569, T23
Body Composition, W48
Body composition, 382, 540, T181, W107
Body condition, 235
Body condition loss, T182
Body condition score, 347, 513, 516
Body condition scores, T110
Body score, 58
Body weight prediction, T110
Boer goat, T71
Boer Goats, W136
Bone, 390, 393
Bonsmara, 345
Bos indicus, 203, 455, 456, 567
Bovidae, 29
Bovine, 51, 56, 57, 132, 467, 564, T6, W17
Bovine embryo, 566
Bovine mammary epithelial cells, 31
Brachiaria cultivars, W158
Brahman, T73
Brangus, T3
Breed, 427, W13
Breed difference, W79
Breeding, 643, W251
Breeding values, 265
Breeds, 266, 342, 570
Brine temperature, 168, 171
Broiler, 194, 379, T84
Broilers, 195
Bromocriptine, 410
Brown fat, 29
Brown mid-rib corn, T61
Brown midrib, 242, 245
Brown midrib-3, 219
bST, T26, W6
Bucks, 618
Bulk density, 47
Bull, 261
Bull fertility, 260, W214
Bulls, 210, 411
Bunk management, W208
Bunker silo, 181
Bunker silos, 660
Burns-Kascer sensitivity analysis, 19
Butter, 177
Buttermilk, 33, T228
Buttermilk powder, T217
Butyrate, T50
Bypass protein, 94
Byproduct, 308
Byproduct feeding, W182

C

c2 Bacteriophage inhibition, W274
c2 phage-peptide, W275
C4-grasses, 592
CAFO regulation, 331
Calcium, 255, 290, 303, 391, T84, W286
Calcium propionate, 417
Calcium Salt, 135
Calcium salts, 129
Calcium salts of fatty acids, T140
Calf, 82, 83, 84, 87, 538, 572, 687, T42
Calf health, 457
Calf hutches, T178
Calf management, 457
Calf morbidity, 310
Calf mortality, 310
Calf nutrition, 457
Calf raising, 689
Calf removal, 48
Calibration, 38
Calpain, 292, 294, T63
Calpastatin, 293, 294
Calves, 85, 86, 362, 468, 482, 536, 658, 663, 690, T40, W55
Calving difficulty, 518
Calving season, 662
Cane molasses, 432
Canine, 356, T95
Canine model, 355
Canola, 69
Canola meal, W197
Canola seed, W178
Capillary electrophoresis, 165
Cappuccino, 163
Caprine cheese, 282
Carbohydrate, W192
carbohydrate, 422
Carbohydrate digestible fraction, W168
Carbon Dioxide, 175, 176
Carbon dioxide, T229
Carcass, 203, 212, 345, 347, 411, 657, W216
Carcass characteristics, 300
Carcass evaluation, W147
Carcass merit, 456
Carcass quality, 312, 431, W79
Carcass traits, W96
Career, 102
Carrageenan, 166, T236
Carrying capacity, W243
Cascade, 503
Case study, 107
Casein, T236
Casein micelle, 166, T209
CAST, 439

Castration, W116
Cat, 357
Catecholamine, 288
Catfish, 651, W18
Cation-anion difference, 656
Cats, 276
Cats and dogs, 277

Author index for Volume 81, Supplement 2 (Sectional abstracts, 2003)[1]

The Author Index is created directly and automatically from the abstracts as submitted. For example, if an author's name is typed differently on multiple abstracts, then multiple or similar entries may exist.
